

Implant Prosthodontics and Anterior/Posterior Diagnostic Waxing during Module 3 of the Restorative & Aesthetic Diploma

By Dental Tribune MEA / CAPPmea

CAPP Tipton Dental Academy and The British Academy of Restorative Dentistry (BARD) welcomed two groups of dentists from 18 different countries to Module 3 of the Restorative and Aesthetic Dentistry Certificate and Diploma programme between 10-13 February 2017 (Group 1) and 15-18 February 2017 (Group 2) in Dubai, UAE at the CAPP Training Institute.

The first two days of the module began with Implant Prosthodontics presented by Prof. Göran Urde from Malmö University in Sweden where he is also the Director at Futurum Clinic, Bridging Innovation & Research. The delegates placed implants on the Phantom Heads in the CAPP Training Institute during the hands-on training of the module.

The third and fourth days comprised of lectures from Prof. Paul Tipton on

The Art & Science of Smile Design and a hands-on training from Bill Sharpling from Kings College London Dental Institute on Anterior and Posterior Diagnostic Waxing.

The next modules are scheduled for May 2017. After Module 4, delegates will be graduating from Year 1 Certificate. Participants then have the opportunity to continue to Year 2 where they can obtain a Diploma in Restorative and Aesthetic Dentistry

issued by BARD and also serving as a pathway to Masters in Clinical Dentistry (MClinDent) Restorative and Cosmetic Dentistry with City of London Dental School and BPP University or Master of Science (MSc) in Restorative and Aesthetic Dentistry with The University of Manchester and Healthcare Learning.

The organisers have now officially opened registrations for dental professionals willing to start the pro-

gramme in October 2017 (group 3). ^{DT}

"Prof Tipton's lectures are wonderful, I enjoyed all of them and learned a lot. During the hands-on I enjoyed most waxing up veneers. Staff is welcoming and helpful."

"Prof. Urde is an amazing speaker with in depth knowledge who spends the time to answer every single question. The hands-on implant placement on the Phantom Heads was great... "
