**CAD/CAM international magazine of digital dentistry (CAD/CAM)** is a quarterly C.E. publication devoted to digital dentistry. It covers the most significant developments in the field with the aim of providing comprehensive knowledge and information on the latest technology that can profitably be integrated into treatment concepts. The magazine presents the latest research and case studies, as well as pertinent industry news, trends in procedures and techniques, and the newest education and events. Topics include rapid prototyping, digital imaging, virtual articulation, dental materials, impressioning, radiography, software processing and innovations in digital dentistry.

The **cone beam** supplement, which is inserted in every issue of CAD/CAM, is focused on digital radiography and cone beam computed tomography (CBCT) in dentistry. It covers the most important developments in the domain and is targeted at experts who use digital radiography, such as implantologists, orthodontists, prosthodontists and endodontists.

**CAD/CAM** is distributed at all major international congresses, exhibitions and opinion leaders worldwide (mainly the US, Middle East & Africa, Asia Pacific and Europe) and distributed at many specialty-specific events.

Local language editions of **CAD/CAM** are available in China, Czech Republic & Slovakia, Germany (digital dentistry), Iran, Italy and Poland (digital).

Please note: Complimentary PR as well as product and industry news are offered in support of advertising. The publication of clinical articles and case studies is limited in each edition. Therefore, submissions are subject to review and approval by the managing editor.
