

# Online Continuing Education Events — the new virtual congress movement in dentistry

In 2020, DTI introduced a number of virtual continuing education event formats that allow companies to take their live events online easily. With full technical and administrative support from DTI, major companies like 3Shape, Amann Girrbach, EMS, GC Europe, Ivoclar, Kuraray Noritake Dental, Osstell and Straumann broadcast a series of live webinars presented by numerous international speakers over 24 consecutive hours, a two-day online congress and a whole week of online education, respectively.

The Dental Tribune (DT) Study Club offers a variety of online continuing education (CE) event formats that allow companies to broadcast a vast number of lectures online to effectively reach out dental professionals of different specialties, including implantologists, endodontists or orthodontists.

The virtual event portfolio ranges from one- to two-day events to online symposia that run for one whole week.

The events will provide an interactive platform for dental professionals to enter into a dialogue with well-known experts and learn more about the newest research and the latest innovations. In addition, participants have the opportunity to earn 1 CE credit for each single webinar.\*

Designed to offer valuable benefits for industry partners and dental professionals alike, these unique event formats aim to generate qualified leads from the dental professional community for the host of the education-driven event.

*\* Please note that CE credits can only be provided for unbranded webinars, according to ADA CERP requirements.*

## Features

- accessible from all around the world
- several interactive 60-minute live webinars
- virtual classroom featuring the company logo and a download area for brochures or catalogues, etc
- customized navigation and listing of faculty and members
- Q&A sessions after each webinar (depending on the duration of each lecture)
- simultaneous interpretation

## Promotion via

- Dental Tribune website
- DTI's social media channels
- DT Study Club community with more than 500,000
- DT Study Club website
- editorial coverage

## Package includes

- design, programming and management of a customized webinar website in close collaboration with the sponsor (requests for adjustments during development process are welcome)
- administration of CE credits from an ADA CERP-recognized provider (for unbranded webinars)
- professional recording and editing of all webinars, which will be made available in the DT Study Club archive (and for CE Campus clients in the corporate archive)

## Benefits

- recognized alternative to exhibitions or congresses
- no travel expenses for speakers or participants
- live lectures are broadcast in real time via the Internet
- promotes both direct sales and accurate use of products

# Online Continuing Education Events — 24-hour webinar in dentistry

On the custom-branded 24-hour webinar website, companies have the exclusive opportunity to broadcast a series of online lectures for one whole day. Within a 24-hour period, up to 24 interactive 60-minute live webinars with up to 24 speakers can be hosted.

# Online Continuing Education Events — online education week

This event format allows companies to host a full symposium with live and on-demand webinars over several days within one week on their own custom-branded symposium platform.

## Osstell ISQ Online Symposium

# Online Continuing Education Events — microlearning platform

The microlearning platform is designed to deliver bite-sized learning in a flexible, engaging form. It offers concise 2- to 5-minute videos for every member of the dental team that serve as focused learning snippets, progressively unlocked to maintain engagement and retention.

## The GBT Microlearning Platform

The image displays the SDA+ Online GBT Microlearning Platform website and a tablet showing the same content. The website features a pink and white color scheme with a navigation bar at the top. The main heading is "Revolutionizing Oral Care: The GBT Microlearning Platform Season 2". Below this, a description states: "GBT Microlearning is an innovative online learning platform offering bite-sized, interactive lessons on Guided Biofilm Therapy (GBT) and related topics in modern dentistry." A list of benefits includes: "Learn how GBT can enhance the treatment experience for both patients and clinicians", "Understand the danger of copied instruments", "Discover how to best work with specific patient groups (like children or medically compromised patients)", and "Learn how marketing can influence your practice growth". A "WATCH NOW" button is visible. The tablet shows a grid of video thumbnails with titles such as "INITIAL INTRODUCTION OF HYPOX, HY TEAR AND THE OFFICE", "CHILD-FRIENDLY DENTISTRY: OVERCOMING DENTAL PHOBIA IN PEDIATRIC PATIENTS", "REDUCED STRAIN DISCOMFORT AND VIBRATIONS", "SOCIAL MEDIA ENGAGEMENT IS VITAL!", "REPAIRING PATIENTS ABOUT APPOINTMENTS", "PATIENT COMPLAINTS: THE ROLE OF TRAINED DISCOMFORTS", "GBT IN MEDICALLY COMPROMISED PATIENTS: SPECIAL CONSIDERATIONS AND BEST PRACTICES", "GBT IMPLEMENTATION: BEST PRACTICES AND CASE STUDIES", and "EFFECTIVE PATIENT COMMUNICATION: BUILDING TRUST AND UNDERSTANDING".
