Straumann abutments now available to 3Shape software users

“Many laboratories are steadfast users of both the 3Shape Dental System and Straumann abutments. Now, they can design highly aesthetic and functional customised abutments and send them directly for manufacturing at Straumann—thereby introducing a wider range of choices for dentists and their patients,” explained Flemming Thorup, President and CEO of 3Shape.

“In addition, 3Shape customers are now able to connect with Straumann dentists and, thus expand their business opportunities,” Frank Hemm, Executive Vice-President of Customer Solutions and Education at Straumann, added.

3Shape users who wish to benefit from this opportunity may contact Straumann for information on obtaining the libraries. However, availability will depend on the specific system configurations, the companies stated.
