E4D University, D4D’s state-of-the-art education facility, is dedicated to advancing dentistry through utilization of the latest technologies, materials and techniques. With more than 9200 square feet, the facility features multiple classrooms/lecture halls, a business center, and a café, as well as the Operatory of the Future and the Imaging Integration Center for display and demonstration.

The faculty of dental, education, and communications professionals provides an array of basic and advanced training courses, self-paced tutorials, and video, print and online training materials specifically designed to further the capabilities of the experienced CAD/CAM user. Courses offered include the following:

**E4D Elements Class**
The E4D Dentist Elements course introduces the primary features and functions of the E4D Dentist system’s Design Center and Milling Center and the DentaLogic software that powers the system.

**Clinical Elements Of Success**
This one day hands on course enables associates and auxiliaries who did not attend the E4D Dentist Elements two day course to learn the clinical techniques and skills necessary for optimal E4D implementation in the practice.

**E4D CAD CAMp**
E4D CAD CAMp provides hands-on guided practice capturing digital impressions — intraorally, from impressions, and from models. Participants will learn the latest techniques for simplifying the design process as well as optimizing milling procedures.

**E4D Beyond The Basics**
This two day intermediate hands-on course will provide participants with comprehensive techniques on advanced scanning, design and practical principles needed to take the E4D system to the next level in clinical efficiency and functional esthetic success.

**Mastering Digital Dentistry: Posteros**
This two day advanced hands-on course will offer participants insight into the replication of posterior esthetics while focusing on proper function and occlusal harmony.

**Mastering Digital Dentistry: Smile Design**
This exciting two day hands-on course offers participants a unique insight into the replication of natural anterior esthetics while focusing on proper function and occlusal harmony.

**Focus on Veneers**
This two day intermediate hands-on course introduces concepts, design principles, and workflow for the production of multiple anterior restorations, including advanced characterization and stain and glaze techniques.

**CADapult Your E4D Practice**
This one day workshop is taught at locations around the US and is a great refresher providing demonstrations, lecture and participation to take participants to the next level in patient care and convenience with the E4D system.
