Some favorites of our faculty

ICON A5
The inherent function of every feature is expressed through its design. It’s why the A5 looks as dynamic as the experience it delivers. The A5 uses the most cutting-edge materials and techniques to achieve its stellar performance. A perfect blend of art and science.

OPMI PROergo
Comfort and precision. What you see when looking at OPMI PROergo from ZEISS is a surgical microscope with a sleek, attractive design that matches the overall image of any practice. What you do not see is the heart and soul of the instrument—the technology that drives it. The cables, light source, light guide and control console have all been completely integrated into the microscope.

**XA ABUTMENT**

Developed in collaboration with BORG center, the new XA range of prosthesis comes from the biological concept that correlates healthy soft tissue and long-lasting hard tissue. The presence of a micro-threading at the basis of the abutments guides the fibroblast growth and stimulates the production of collagen, supporting the bone regeneration thanks to the tapered morphology of the abutment and helping in preserving the over time.
