Kuraray Noritake Dental proudly presents world-first innovations in dentistry at IDS 2013

Noritake Dental Supply Company and Kuraray Medical merged to form a new company called Kuraray Noritake Dental, which has continued to develop Kuraray and Noritake dental products, which represent highly aesthetic restorations in dental technology.

Kuraray Noritake Dental will be exhibiting its successful innovations at IDS 2013, and is proud to offer products developed through the combined, valuable experience of the original companies in the field of ceramic technology.

World-first products will be launched during the IDS and demonstrated during hands-on presentations by internationally well-known dental technicians.

Visitors can attend “Behind the scenes: Rule the opacity, gain ultimate control over porcelain” by Hiroki Goto and “Internal stain: World for reproduction of natural teeth” by Alek Aronin.

Be the first to visit us at our booth: Hall 11.3, Booth D 010/020/030.
