Cervitec liquid: new formula is a success!

Cervitec liquid from Ivoclar Vivadent now features an enhanced formula.

By Ivoclar Vivadent

Cervitec liquid is a ready-to-use alcohol-free mouth rinse for professional oral hygiene in the dental office and at home. The new formula contains xylitol, the provitamin D-panthenol and 0.1 % chlorhexidine. Cervitec Liquid made an excellent first impression on the participants of the survey on the basis of its scent. Ninety-seven per cent of the respondents said that they liked it very much. They also gave the taste and feel of the liquid in the mouth a positive review. Eighty-six per cent rated the mouth rinse as being very mild to mild. Nonetheless, 87% reported that their breath felt clean and fresh after rinsing. As a result, it is not surprising that around 90% of the respondents said that they would continue using Cervitec Liquid in the future and recommend the product to someone else. The new delicate mint flavour has been well-received, even by very taste-sensitive individuals.

Rinsing with Cervitec Liquid is recommended for patients before and after implant, periodontal or orthodontic surgery in order to control bacteria in the oral cavity. It is also recommended for patients with a high caries risk, impaired oral hygiene or bad breath. Children over the age of six years may use Cervitec Liquid.

AD

Removes Doubt

Osseo 100 measure implant stability and osseointegration to enhance decisions about when to load the implant. Especially important when using protocols with shorter treatment time and treating higher risk patients.

Reduce treatment time
One-stage immediate loading, easy大楼ing

Manage higher risk patients
Compromised bone, smokers, brittle bone, diabetes, cancer, extended anticoagulation, metal implants etc.

3-step procedure

1. Osseo 100
2. Monitor
3. Load
