Where Science Meets The Art Of Beauty

By Dental Tribune MEA/CAPPmea

"Where Science Meets The Art Of Beauty" is the theme for this year’s fast-approaching 9th Dental Facial Cosmetic Conference/Exhibition (DFCIC) to be held at the InterContinental Festival City, Dubai from 01-05 November 2017. The 9th DFCIC will host over 36 international dental experts from various countries and dental specialties, the experts will be there with a single goal to share their knowledge and expertise with our attendees.

Beyond the excellent scientific content that will be offered at the 9th DFCIC, we will also be hosting over 35 companies that have signed up for exhibiting their latest products, which you will not only be able to interact with but also purchase the latest tools, materials, trends and developments to help your practice advance further.

Keeping regional requirements and challenges in mind, CAPP Events has also innovated a new approach to providing FREE CME in partnership with chosen exhibitors to maximize your time and engagement. Being a science lead conference, there is also space allocated for the research driven members of the dental community to display their latest research posters which will lead to a healthy scientific discourse and display the direction of the most current regional research.

For the keen amongst you, CAPP Events has also organized 20 hands-on training courses pre- and post-conference between 01-05 November 2017. These hands-on courses have been designed in a way to appeal to both the General Dentists and the Specialists across the board with current hot topics. Ranging from Minimal Invasive Veneers to the Diagnosis and Management of Dentofacial Deformities and everything in between (full list provided below).

The conference will be accredited by DHA and HAAD and enjoys up to 35 CE Credits through CAPP as an ADA CERP Recognized Provider of Continuing Education.

Dental Hygienist Seminar
This year’s event is a continuation of the partnership between CAPP and Colgate Oral Care Academy with the support of the International Federation for Dental Hygienists (IFDH). In keeping with the current regional needs, the consortium wanted to highlight the needs of the Dental Hygienists who are a growing segment in the local dental profession. The specialized skills of a dental hygienist are necessary to keep our patients’ oral health in check.

For more information, visit www.cappmea.com/aesthetic.
cavity disease-free and because of this fact and with the essential support of Colgate Oral Care Academy, we have arranged a whole day of educational events for the Dental Hygienists. The Dental Hygienist seminar is a full day event within the DFCIC which will take place on Friday 03 November 2017 and will see over 7 experts in the field present to all our participants and talk on topics ranging from ‘Working Posture In Daily Life Work’ to ‘Integrating Oral Cancer Screening Into Your Practice’ and ‘Periodontal Assessment & Diagnosis’. Considering the current move towards Implant Dentistry there is also a lecture on ‘The Hygienists Role In Maintaining Implant Supported Restorations’.

At a Glance
- 15 CME at a glance at various booths inside the trade show /exhibition – Over 30 leading dental manufacturers to showcase latest novelties (03-04 Nov 2017)

Preliminary Program | 03-04 Nov
