Innovative loupes expand your vision

The panoramic field loupe’s viewable areas are twice as large as prismatic expanded field-designed loupe and up to five times greater than Galilean loupe, providing unprecedented field of view, clarity, definition and color.

By Designs for Vision Staff

Designs for Vision is showing several new product lines at dental meetings in 2020, including the Thomas P. Hinman Dental Meeting and the Academy of Osseointegration meeting.

Significant advancement

Designs for Vision will be showing the new patented (US pat. 8928975B2) 3.5x and 4.5x Panoramic Loupes. According to the company, the Panoramic Field Loupes represent the most significant advancement in telescope design in more than 100 years.

The viewable areas are twice as large as prismatic expanded-field-designed loupe and up to five times greater than Galilean designed optics. Panoramic Field Loupes provide unprecedented field of view, clarity, definition and color, according to the company.

Revolutionary optical design

Designs for Vision is also featuring the REALITY 5 Star rated Micro 3.5EF Scopes and Micro 4.5EF Scopes, which use a revolutionary optical design that reduces the size of the prismatic telescope by 50 percent and reduces the weight by 40 percent while providing an expanded field view of the oral cavity.

The company also is introducing the Micro 3.0EF in its line of Micro Series Loupes. The Micro 3.0EF has a field of view of 100 mm and weighs less than 70 grams.

You can see the lightest 3.0x magnification with the new 3.0x Galilean loupe from Designs for Vision.

The lightweight Galilean design enables users to step up in magnification while retaining a sharp 70 mm field of view.

Hands-free infrared

Designs for Vision is also introducing patented (U.S. pat. 8,851,709 and RE46,463) hands-free infrared technology with the Wireless IR HD™ and the Micro IR HD® headlights. These headlights feature HDi. Designs for Vision’s exclusive advanced photonic design that provides uniform light distribution with maximum intensity.

This feature optically focuses the light from the LED to provide 45 percent more light with uniform distribution at 5,800° Kelvin, the ideal color temperature.

Improved infection control

The patented IR feature enables improved infection control by letting practitioners operate the headlight without touching the system.

The IR headlights use a built-in infrared signal to enable turning the light on or off simply and safely. Onboard biometrics sense the position of the headlight to filter out unintended signals while working.

‘Facilitate proper treatment options in cariology, oral hygiene, periodontology, implantology and restorative dentistry’

You can choose High Definition Imaging with either a wired or wireless design to meet your preference, and any of the HDi headlights will illuminate the entire oral cavity.

Designs for Vision’s Wireless headlights free users from being tethered to a battery pack. The simple modular designs uncouple the headlights from a specific frame or single pair of loupe. Prior technology married a cordless light to one pair of loupe via a cumbersome integration of the batteries and electronics into the frame. The compact design of the LED DayLite WireLess headlights are independent of any frame/loupe.

Lightest, smallest power pack

The LED DayLite Micro HDi uses the new High Definition Imaging with a lightweight headlight in combination with the Micro power pack. The Micro power pack is the lightest and smallest power pack. The complete unit includes two power packs, and each power pack can run up to 10 hours.

See for yourself

See the Visible Difference® yourself by visiting Designs for Vision’s booths, No. 1005 at Himan and No. 913 at AO. To arrange a visit in your office, call (800) 345-4009 or email info@dvimail.com.
Glidewell’s 4th annual educational symposium scheduled for Anaheim

May 1 is the early bird pricing deadline for the highly popular November event

By Glidewell Dental Staff

Glidewell, a leader in dental education and a technological innovator in restorative dentistry for 50 years, has announced the fourth annual Glidewell Symposium. Scheduled for Nov. 6–7 at the Anaheim Convention Center in Anaheim, Calif., the event will provide practical clinical education and business strategies designed to make an immediate difference in dental practices, according to the company. Topics will cover all phases of general dentistry, from restorative techniques and materials to dental implants and tissue regeneration, in-office scanning and milling, dental sleep medicine and practice management. Attendees will earn 12 hours of continuing education units.

“We are excited to bring the Glidewell Symposium to Southern California this year,” said Dr. Neil Park, scientific chair of the Glidewell Symposium and vice president of clinical affairs at Glidewell. “Building on the success of our previous events, we’re gathering more than 20 speakers — these are educators, thought leaders and practicing clinicians — to share their best practices and clinical insights. We’ll once again provide our unique two-day educational format that has proven to be very popular, while also presenting even more opportunities for attendees to explore the rewarding field of dentistry.”

On the first day of the symposium, the general session will feature presentations designed to offer solutions to the challenges of everyday dentistry. Keynotes will be presented by prosthodontist Dr. Gordon J. Christensen, cofounder of Gordon J. Christensen Clinicians Report®, and by Dr. Jack Hahn, an implant-dentistry pioneer who has been placing and restoring implants for five decades. These recognized experts will share stories about their clinical research and wisdom gained as practicing dentists.

On the second day of the event, attendees can choose from several tracks for focused, in-depth lectures, and hone in on clinical information, tools and techniques to better serve their patients. In addition, following Saturday’s focused tracks, all attendees will be invited to the Glidewell Expo, a hosted barbecue and VIP party at the Glidewell campus in nearby Newport Beach. Free transportation will be provided, and the afternoon event will include hands-on educational programs, a tour of Glidewell’s Intelligent Manufacturing center, and a variety of other activities. On both days of the symposium, attendees will also be able to browse interactive exhibits featuring 3-D printing, intraoral scanning, in-office milling, the CAD/CAM workflow, dental implants, and regenerative and restorative materials.

The 2020 Glidewell Symposium is for dentists, hygienists, and chairside and front-office staff. Tuition for both days is $325. Early bird pricing is available for $275 when registering by May 1. Tuition includes a complimentary breakfast, lunch and cocktail reception with hosted bar on Friday, as well as a complimentary breakfast and afternoon programs, food and entertainment on Saturday.

For the complete symposium schedule and to register, you can visit glidewellsymposium.com or you can call (866) 791-9539.

Dental Superheroes Are Made, Not Born.

“I’m always trying to improve my dentistry; my clinical skills and patient results. They say you’re only as good as your five closest friends, and being an Aacd member surrounds me with other dental superheroes who help instill in me a passion to get more out of my career.”

Fighting nosocomial infections

Cross-infections occurring after surgery are a major cause of a real health issue.

2,000,000

Number of nosocomial infections in the United states *

* according to the World Health Organization

To meet this health challenge, HYGITECH has developed a wide range of sterile surgical kits.

• Economic and practical
• Save time for the preparation of the surgical room
• Simplifies traceability with peel-off sticker

→ Discover on the next page
Preparation

**PROTECT KIT**

**HYGITECH**

2+1

This set contains everything you need to perform any type of implant surgery. Each kit has been sterilized with ethylene oxide.

The kit contains 45 items:
1. Polyethylene gloves
2. Bridge table cover (35.5” x 47”) (90 x 120 cm)
3. Surgical drape (29.5” x 29.5”) (75 x 75 cm)
4. Elastic cap handle covers
5. Tube support with adhesive
6. Protective sleeves for tubing (3.5” x 47”) (8 x 120 cm)
7. Protective PVC “X” ray cover
8. Adhesive protective covers for control panel (6.3” x 6.3” (16 x 22 cm)
9. Non-linting elastic bands
10. Adhesive film (2” x 3.15”) (5 x 8 cm)
11. Surgical hat
12. Bouffant caps
13. Tie-on masks
14. Pairs of overshoes
15. Sterile brushes with nail cleaner
16. Paper hand towels
17. Surgical gown with cotton cuffs
18. Assistant gown with cotton cuffs
19. Patient gown with cotton cuffs
20. Surgical drape with aperture and adhesive (27.5” x 39”) (70 x 100 cm)
21. U-shaped surgical drape with adhesive (39” x 39”) (100 x 150 cm)
22. Wrapping paper

IMPLANFIELD KIT
HYGITECH

The sterile ImplanField kit is designed for protecting the operating theatre. It is recommended for surgeries that are not implantology- or endodontology-specific. Indeed, these surgeries do not usually require an operating room where there are more surfaces to cover.

from $15.33 per kit

The kit contains 25 items:
- 1 Polyethylene gloves  
- 2 Tube support with adhesive  
- 2 Elastic cap handle covers  
- 3 Non-latex elastic bands  
- 3 Protective sleeves for tubing (3.5’’ x 47’’ x 8x120cm)  
- 6 plastic bag (2x 3.5’’ x 5x60cm)  
- 7 Protective X-ray cover (60x70cm)  
- 1 Adhesive protective cover for control panel (6.3’’ x 8.9’’ x 16x22cm)  
- 9 Surgical drapes (29.5’’ x 29.5’’ x 75x75cm)  
- 10 Instrument table cover (35.5’’ x 47’’ x 90x120cm)  
- 11 Surgeon’s table cover (39.5’’ x 75’’ x 100x180cm)  
- 12 Surgical drape with apron and adhesive (29.5’’ x 35.5’’ x 75x30cm)  
- 13 U-shaped surgical drape with adhesive (39’’ x 59’’ x 100x150cm)  
- 14 Adhesive films (2x 3.5’’ x 5x60cm)  
- 15 Wrapping paper

DUO KIT
HYGITECH

High quality sterile kit comprising all necessary surgical drapes, protective items and clothing garments for the surgeon and his assistant.

from $14.53 per kit

The kit contains 32 items:
- 1 Polyethylene gloves  
- 2 Surgical drapes (29.5’’ x 29.5’’ x 75x75cm)  
- 2 Elastic cap handle covers  
- 2 Protective sleeves for tubing (3.5’’ x 47’’ x 8x120cm)  
- 3 Non-latex elastic bands  
- 6 Adhesive protective cover for control panel (6.3’’ x 8.9’’ x 16x22cm)  
- 7 Surgical cap  
- 2 Bouffant caps  
- 9 Tie-on masks  
- 10 Pairs of overshoe rubber  
- 11 Surgical brush with nail cleaner  
- 4 Paper hand-towels  
- 13 Assistant gown with cotton cuffs  
- 14.5 Surgical gown with cotton cuffs  
- 15 U-shaped surgical drape with adhesive (31.5’’ x 39’’ x 80x100cm)  
- 16 Wrapping paper

11 INSTRUMENT SET
HYGITECH

Comprehensive sterile examination kit, a ready-to-use tray for all kinds of procedures.

Contents: 1 mouth mirror + 1 probe  
+ 1 pair of tweezers + 1 ear-hold mask  
+ 1 lapula + 1 saliva ejector + 1 tray

NON-ABSORBABLE SURGICAL SUTURES
DEMETECH

A high range suture and market leader in the USA which has established itself as a distinguished product for more than 25 years.

BRAIDED SILK SUTURE DEMESILK
The Demesil suture is a non-absorbable biological silk suture, composed of fibroin. It can be used in a variety of ways:
- Excellent knot tying
- Absorbs over time until the complete patient healing
- Thread color: black

BRAIDED POLYSTER SUTURE DEMEBOND
The Demebond suture is a non-absorbable suture of synthetic origin, 100% sterile and made of polyester.
- Absorbable strength over time until the complete patient healing
- Thread color: green

MONOFILAMENT NYLON SUTURE DEMELON
- Minimal tissue reaction and easy passage through tissues
- Excellent knot tying
- Excellent elasticity
- Thread color: black

MONOFILAMENT PTFE SUTURE DEMEPTE
- Very smooth surface for minimal tissue reaction
- Excellent knot tying
- Excellent flexibility and handling
- Thread color: white

from $2.72 per suture

ABSORBABLE SURGICAL SUTURES
DEMETECH

BRAIDED PGA SUTURE DEMESORB
- Very good tensile strength: 50% of its tensile strength is maintained after 3 weeks
- Precise positioning of the knots
- Easy passage through tissues with minimal resistance
- Absorption time: 80 to 90 days
- Thread color: Purple

BRAIDED PGA RAPID SUTURE DEMEQUICK
- Very good tensile strength: progressive decrease of the strength until total complete disappearance after 10 days
- Precise positioning of the knots
- Easy passage through tissues with minimal resistance
- Rapid absorption time: 45 to 52 days
- Thread color: purple

BRAIDED PGA SUTURE DEMECYRL
- Very good tensile strength: 50% of its tensile strength is maintained after 3 weeks
- Precise positioning of the knots
- Easy passage through tissues with minimal resistance
- Absorption time: 60 to 72 days
- Thread color: purple

MONOFILAMENT PCCL SUTURE DEMECAPRONE
- Excellent initial tensile strength
- Loss of tensile strength almost total at 21 days
- Very smooth surface for minimal tissue reaction
- Excellent knot tying
- Excellent flexibility and handling
- Absorption time: 90 to 120 days
- Thread color: purple

from $4.15 per suture

BRIDGE TABLE
HYGITECH

Bridge tables simplify the work in the operating theatre. The drapes-covered table is positioned over the patient and carries the instruments needed for the operation. Built in durable, shiny stainless steel, the HYGITECH Bridge table has a wide and solid tray, which enables the dentist to have all the materials he needs for the surgery at hand. The edges of the table have no lip, allowing the surgeon to grasp instruments easily.

HEIGHT ADJUSTABLE
MAYO TABLE - HYDRAULIC
HYGITECH

MAYO tables are positioned right next to the surgeon and supports the irrigation motor during implant surgery. The HYGITECH Mayo table is made of stainless steel 18/10 AISI 304 and has a smooth surface to facilitate its maintenance.

The height is adjustable with a hydraulic foot pedal making it easy to use. The table also has a wheel lock system to prevent it from moving during surgery.

Made in France.
