The Association for Dental Support Organizations (ADSO) views itself as the primary champion and representative of the group-practice/dental-support business model in the U.S. The association represents the interests of emerging DSOs through education, training and mentorship, and it further supports national DSOs through its advocacy efforts.

Because of ADSO’s access to sector leaders, the association has been able to regularly host a comprehensive DSO annual conference, which this year is set for March 11–13 in National Harbor, Md., at the Gaylord National Resort and Convention Center. By calling on its members to share their insights and experiences, the association has been able to deliver a uniquely thorough educational experience for a sector that has been growing every year since its inception in 2014.

According to the association, it’s an exciting time to be a DSO or group practice leader — especially with the cooperation and support available within the ADSO community, which enables members to effectively share insights in support of the continued development of the business model.

This year, for the first time, the summit will have sessions and panels organized into tracks to help attendees better determine exactly which educational opportunities will be the most valuable to them. The 2020 summit tracks are: Leadership; Growth & Development; Compliance; Operations; Marketing; Technology; and Partnering For Growth.

The Partnering For Growth track will include topics touched upon in the other six tracks but specifically from the standpoint of emerging DSOs in the earliest stages of their growth.

The association invites prospective attendees to join the gathering in March at National Harbor to hear from some of the most successful names in the industry as they share what they have learned on their paths to success. Membership community, which enables members to effectively share insights in support of the continued development of the business model.

The Thomas P. Hinman Dental Meeting — described by organizers as the nation’s leading dental meeting and comprehensive source of continuing education in dentistry — has announced several new educational programs and tracks for dentists of all ages and levels of experience. Hinman 2020, which will be held March 19 to 21, will offer the “GO Track” for emerging and new dentists, the “SILVER Track” for experienced dentists planning for retirement and a Student Program designed especially for dental students.

The Gaylord National Resort & Convention Center (next to the Capital Wheel) on the Potomac in National Harbor, Md., hosts the ADSO 2020 Summit. Photo/Provided by www.visitmaryland.org
AD

with ADSO is not required for DSO and group-practice attendees, but it’s worth noting that members do receive complimentary registrations.

Organizations that provide products and services to DSOs and group practices who are interested in attending, sponsoring, speaking or exhibiting at the ADSO Summit 2020 must join the ADSO Industry Partner program. You can request additional information by sending an email to Membership@TheADSO.org.

If you would like to know more about ADSO’s annual summit, you can email ADSO at Info@TheADSO.org, or you can call (703) 940-3860.

The association’s mission is to work with members to create practice environments where dentists can choose the administrative services that best enable them to focus on patients, expand access to quality dental care and improve the oral health of their communities.

Booth 1005
to help everyone from the new dentist who wants to set up a practice for success to the established dentist who may be looking to transition the practice in preparation for retirement,” said Dr. Bob O’Donnell, general chair for Hinman 2020. “Also, Hinman invites dental students to attend the meeting to take advantage of numerous networking opportunities, free courses and an enormous exhibit hall featuring every dental product and service imaginable.”

Designed specifically for new and emerging dentists, the “GO Track: How New Dentists Can Go Further, Faster!” (Course Fr500) is a half-day session led by Dr. Sully Sullivan on Friday, March 20, from 1 to 4 p.m. Sullivan practices in Brentwood, Tenn., and is the creator and host of the Millennial Dentist Podcast.

Sessions include “What It Takes to Transition from Associate to Owner,” “Keys to Early Success After Graduating Dental School” and “Leveraging Technology to Go Further, Faster.”

With emphasis on the established dentist, the “SILVER Track” offers a full day of courses that can be taken together or individually on Saturday, March 21, between 9 a.m. and 4 p.m.

Topics cover everything from forming multi-generational partnerships to understanding the value of your practice: The courses include “Collaboration of Generations is a Recipe for Success,” “Stress, Life Balance and Second Chances,” “An Aggressive, But Legal Approach to Taxes” and “Understanding the Value of the Dental Practice in a Seller’s Market.”

Hinman 2020 offers several networking opportunities for dental students, including Happy Hour in the Exhibit Hall – Friday, March 20, 4 to 5 p.m., and Hinman’s Night Out at the Tabernacle, Friday, March 20, 7 to 10:30 p.m. In addition, students can take advantage of more than 280 courses (half of which are free) during the three-day meeting, including these special courses:

• “GO Track: How New Dentists Can Go Further, Faster!” with Dr. Sully Sullivan
• “Top 10 Management Tools for a Successful Practice” with Lois Banta
• “Owning Your Practice: The Key to Your Financial Future” with Charles Loretto
• “Stuff Worth Knowin’ About Money, Practice and Life” with Dr. Wayne Kerr
• “Hands-On Oral Surgery Workshop for Dental Students Only” with Dr. Amy Kuhmichel.

The Hinman Dental Meeting is designed with a commitment to quality and professionalism and a high regard for the value of continuing education. The Thomas P. Hinman Dental Meeting is sponsored by the Hinman Dental Society, a non-profit organization, and excess revenue is invested and gifted in the form of individual scholarships to dental, hygiene and assisting students and in contributions to institutions that foster dental education. For more details and to register for Hinman 2020, you can visit Hinman.org. Contact Sylvia Ratchford, executive director, at (404) 231-1663.

Innovative loupes expand your vision

The panoramic field loupe’s viewable areas are twice as large as prismatic expanded field-designed loupes and up to five times greater than Galilean loupes, providing unprecedented field of view, clarity, definition and color.

By Designs for Vision Staff

Designs for Vision is showing several new product lines at dental meetings in 2020, including the Thomas P. Hinman Dental Meeting and the Academy of Osseointegration meeting.

Significant advancement

Designs for Vision will be showing the new patented (US pat. 8928975B2) 3.5x and 4.5x Panoramic Loupes. According to the company, the Panoramic Field Loupes represent the most significant advancement in telescope design in more than 100 years.

The viewable areas are twice as large as prismatic expanded-field-designed loupes and up to five times greater than Galilean designed optics. Panoramic Field Loupes provide unprecedented field of view, clarity, definition and color, according to the company.

Revolutionary optical design

Designs for Vision is also featuring the REALITY 5 Star rated Micro 3.5EF Scopes and Micro 4.5EF Scopes, which use a revolutionary optical design that reduces the size of the prismatic telescope by 50 percent and reduces the weight by 40 percent while providing an expanded field view of the oral cavity.

The company also is introducing the Micro 3.0EF in its line of Micro Series Loupes. The Micro 3.0EF has a field of view of 100 mm and weighs less than 70 grams.

You can see the lightest 3.0x magnification with the new 3.0x Galilean loupes from Designs for Vision.

The lightweight Galilean design enables users to step up in magnification while retaining a sharp 70 mm field of view.

Hands-free infrared

Designs for Vision is also introducing patented (U.S. pat. 8,851,709 and RE46,463) hands-free infrared technology with the Wireless IR HDI™ and the Micro IR HDI headlights. These headlights feature HDI. Designs for Vision’s exclusive advanced photonic design that provides uniform light distribution with maximum intensity.

This feature optically focuses the light from the LED to provide 45 percent more light with uniform distribution at 5,800 Kelvin, the ideal color temperature.

Improved infection control

The patented IR feature enables improved infection control by letting practitioners operate the headlight without touching the system.

The IR headlights use a built-in infrared signal to enable turning the light on or off simply and safely. Onboard biometrics sense the position of the headlight to filter out unintended signals while working.

Designs for Vision has added the High Definition Imaging to all of its headlights, including the LED DayLite® WireLess™ IR and the LED DayLite WireLess Mini, providing a lightweight cordless solution with light intensity comparable to many cored headlights.

High-def, wired or wireless

You can choose High Definition Imaging with either a wired or wireless design to meet your preference, and any of the HDI headlights will illuminate the entire oral cavity.

Designs for Vision’s Wireless headlights free users from being tethered to a battery pack. The simple modular designs uncouple the headlights from a specific frame or single pair of loupes. Prior technology married a cordless light to one pair of loupes via a cumbersome integration of the batteries and electronics into the frame. The compact design of the LED DayLite WireLess headlights are independent of any frame/loupes.

Lightest, smallest power pack

The LED DayLite Micro HDI uses the new High Definition Imaging with a lightweight headlight in combination with the Micro power pack. The Micro power pack is the lightest and smallest power pack. The complete unit includes two power packs, and each power pack can run up to 10 hours.

See for yourself

See the Visible Difference® yourself by visiting Designs for Vision’s booths, No. 1005 at Hinman and No. 913 at AO. To arrange a visit in your office, call (800) 345-4009 or email info@dvimail.com.

Facilitate proper treatment options in cariology, oral hygiene, periodontology, implantology and restorative dentistry’
Glidewell’s 4th annual educational symposium scheduled for Anaheim

May 1 is the early bird pricing deadline for the highly popular November event

By Glidewell Dental Staff

Glidewell, a leader in dental education and a technological innovator in restorative dentistry for 50 years, has announced the fourth annual Glidewell Symposium. Scheduled for Nov. 6–7 at the Anaheim Convention Center in Anaheim, Calif., the event will provide practical clinical education and business strategies designed to make an immediate difference in dental practices, according to the company. Topics will cover all phases of general dentistry, from restorative techniques and materials to dental implants and tissue regeneration, in-office scanning and milling, dental sleep medicine and practice management. Attendees will earn 12 hours of continuing education units.

“We are excited to bring the Glidewell Symposium to Southern California this year,” said Dr. Neil Park, scientific chair of the Glidewell Symposium and vice president of clinical affairs at Glidewell. “Building on the success of our previous events, we’re gathering more than 20 speakers — these are educators, thought leaders and practicing clinicians — to share their best practices and clinical insights. We’ll once again provide our unique two-day educational format that has proven to be very popular, while also presenting even more opportunities for attendees to explore the rewarding field of dentistry.”

On the first day of the symposium, the general session will feature presentations designed to offer solutions to the challenges of everyday dentistry. Keynotes will be presented by prosthodontist Dr. Gordon J. Christensen, cofounder of Gordon J. Christensen Clinicians Report®, and by Dr. Jack Hahn, an implant-dentistry pioneer who has been placing and restoring implants for five decades. These recognized experts will share stories about their clinical research and wisdom gained as practicing dentists.

On the second day of the event, attendees can choose from several tracks for focused, in-depth lectures, and hone in on clinical information, tools and techniques to better serve their patients. In addition, following Saturday’s focused tracks, all attendees will be invited to the Glidewell Expo, a hosted barbecue and VIP party at the Glidewell campus in nearby Newport Beach. Free transportation will be provided, and the afternoon event will include hands-on educational programs, a tour of Glidewell’s Intelligent Manufacturing center, and a variety of other activities. On both days of the symposium, attendees will also be able to browse interactive exhibits featuring 3-D printing, intraoral scanning, in-office milling, the CAD/CAM workflow, dental implants, and regenerative and restorative materials.

The 2020 Glidewell Symposium is for dentists, hygienists, and chairside and front-office staff. Tuition for both days is $325. Early bird pricing is available for $275 when registering by May 1. Tuition includes a complimentary breakfast, lunch and cocktail reception with hosted bar on Friday, as well as a complimentary breakfast and afternoon programs, food and entertainment on Saturday.

For the complete symposium schedule and to register, you can visit glidewellsymposium.com or you can call (866) 791-9539.

Dental Superheroes Are Made, Not Born.

“I’m always trying to improve my dentistry; my clinical skills and patient results. They say you’re only as good as your five closest friends, and being an Aacd member surrounds me with other dental superheroes who help instill in me a passion to get more out of my career.”

Fighting nosocomial infections

Cross-infections occurring after surgery are a major cause of a real health issue.

2,000,000

Number of nosocomial infections in the United states *

* according to the World Health Organization

To meet this health challenge, HYGITECH has developed a wide range of sterile surgical kits.

• Economic and practical

• Save time for the preparation of the surgical room

• Simplifies traceability with peel-off sticker

→ Discover on the next page
**Preparation**

**PROTECT KIT**

**HYGITECH**

This set contains everything you need to perform any type of implant surgery. Each kit has been sterilized with ethylene oxide.

The kit contains 45 items:

1. Polyethylene gloves
2. Bridge table cover (35.5” x 47” / 90x120cm)
3. Surgical drape (29.5” x 35.5” / 75x90cm)
4. Elastic cap handle covers
5. Tube support with adhesive
6. Protective sleeves for tubing (3.5” x 47” / 8x120cm)
7. Protective PVA X-ray cover
8. Adhesive protective cover for control panel (6.3” x 8.9” / 16x22cm)
9. Non-latex elastic bands
10. Adhesive film (2” x 31.5” / 5x80cm)
11. Surgical hat
12. Bouffant cap
13. Tie-on masks
14. Pair of overshoes
15. Sterile brushes with nail cleaner
16. Paper hand-towels
17. Surgical gown with cotton cuffs
18. Assistant gown with cotton cuffs
19. Patient gown with cotton cuffs
20. Surgical drape with aperture and adhesive (29.5” x 35.5” / 75x90cm)
21. U-shaped surgical drape with adhesive (39” x 59” / 100x150cm)
22. Wrapping paper

IMPLANFIELD KIT
HYGITECH

The sterile ImplanField kit is designed for protecting the operating theatre. It is recommended for surgeries that are not implantology- or endodontology-specific. Indeed, these surgeries do not usually require an operating room wearing there are more surfaces to cover.

$15.33
per kit

The kit contains 25 items:
1. 4 Polyethylene gloves
2. 1 Tube support with adhesive
3. 2 Elastic cap handle covers
4. 3 Non-latex elastic bands
5. 3 Protective sleeves for tubing
6. 1 plastic bag (2’ x 3.15’ / 580cm)
7. 1 Protective X-ray cover (820cm / 050cm)
8. 1 Adhesive protective cover for control panel (6.3’ x 8.9’ / 16x22cm)
9. 2 Surgical drapes (29.5’ x 29.5’ / 75x75cm)
10. 1 Instrument table cover (35.5’ x 47’ / 90x120cm)
11. 1 bridge table cover (35.5’ x 75’ / 100x180cm)
12. 1 Surgical drape with aperture and adhesive (29.5’ x 35.2’ / 75x90cm)
13. 1 U-shaped surgical drape with adhesive (30’ x 59’ / 100x150cm)
14. 2 adhesive films (2’ x 3.15’ / 5x80cm)
15. 1 Wrapping paper

Duo Kit
HYGITECH

High quality sterile kit comprising all necessary surgical drapes, protective items and clothing garments for the surgeon and his assistant.

$14.53
per kit

The kit contains 32 items:
1. 4 Polyethylene gloves
2. 1 Surgical drape (29.5’ x 29.5’ / 75x75cm)
3. 2 Elastic cap handle covers
4. 2 Protective sleeves for tubing (35.5’ x 47’ / 8x20cm)
5. 3 Non-latex elastic bands
6. 1 Adhesive protective cover for control panel (6.3’ x 8.9’
7. 1 Surgical cap
8. 2 Bouffant caps
9. 2 Tie-on masks
10. 2 Pairs of overshoes
11. 1 Surgical brush with nail cleaner
12. 4 Paper hand-towels
13. 1 Assistant gown with cotton cuffs
14. 1 Surgical gown with cotton cuffs
15. 1 U-shaped surgical drape with adhesive (31.5’ x 39’ / 80x100cm)
16. 1 Wrapping paper

11 INSTRUMENT SET
HYGITECH

Comprehensive sterile examination kit, ready-to-use tray for all kinds of procedures.

$1.43
per item

Contents: 1 mouth mirror, 1 probe, 1 pair of tweezers, 1 tear-drop mask, 1 loupes, 1 saliva ejector, 1 tray

STERILE MIRROR
HYGITECH

Single use sterile mirror, 48’ (12cm) diameter with anti-fog technology, handle length 35’ (54cm).

$0.26
per item

Contents: 1 mouth mirror, 1 probe, 1 pair of tweezers.

**NON-ABSORBABLE SURGICAL SUTURES**  
**DEMETECH**

A high range suture and market leader in the USA which has established itself as a distinguished product for more than 25 years.

**BRAIDED SILK SUTURE DEMESILK**

The Demesilk suture is a non-absorbable biological silk suture, composed of fibers.  
- Elastic thread: easy to handle  
- Excellent knot tightening  
- Silicone coated to increase ductility and minimize tissue reaction  
- Elasticity  
- Thread color: black

**BRAIDED POLYESTER SUTURE DEMEBOND**

The Demebond suture is a non-absorbable suture of synthetic origin. 100% polyester and made of polyester.  
- Durability strength over time until the complete patient healing  
- Thread color: green

**MONOFILAMENT NYLON SUTURE DEMELON**

Minimal tissue reaction and easy passage through tissues  
- Excellent knot tightening  
- Excellent elasticity  
- Thread color: black

**MONOFILAMENT PTFE SUTURE DEMEPTEF**

- Very smooth surface for minimal tissue reaction  
- Excellent flexibility and handling  
- Excellent biocompatibility (biologically inert) - reduces the risk of inflammation  
- Thread color: white

**ABSORBABLE SURGICAL SUTURES**  
**DEMETECH**

**BRAIDED PGA SUTURE DEMESORB**

- Very good tensile strength: 50% of its tensile strength is maintained after 3 weeks  
- Precise positioning of the knots  
- Easy passage through tissues with minimal resistance  
- Absorption time: 60 to 90 days  
- Thread color: Purple

**BRAIDED PGA RAPID SUTURE DEMEQUIK**

- Very good tensile strength: progressive decrease of the strength until almost complete disappearance after 10 days  
- Precise positioning of the knots  
- Easy passage through tissues with minimal resistance  
- Rapid resorption time: 42 to 56 days  
- Thread color: purple

**BRAIDED PGA SUTURE DEMECRYL**

- Very good tensile strength: 60% of its tensile strength is maintained after 3 weeks  
- Precise positioning of the knots  
- Easy passage through tissues with minimal resistance  
- Absorption time: 60 to 90 days  
- Thread color: purple

**MONOFILAMENT PCLL SUTURE DEMECAPRON**

- Excellent initial tensile strength  
- Loss of tensile strength: almost total at 21 days  
- Very smooth surface for minimal tissue reaction  
- Excellent knot tightening  
- Excellent flexibility and handling  
- Absorption time: 90 to 120 days  
- Thread color: purple

**SURGICAL ASPIRATION CANNULA HYGITECH**
Specially designed for implantology. Can be placed on all standard PVC aspiration tubes or other aspiration instruments. Conveniently shaped angle. Individual sterile packaging. 3 different diameters. Each box (No. 2 and 3) contains 2 autoclavable adapters: diameter 0.4’’ (11mm) and diameter 0.6’’ (16mm).

**STERILE IRRIGATION SET HYGITECH**
We offer a complete range of irrigation sets compatible with most implantology motors on the market. Irrigation is an essential element of an implant surgery and limits the heating of bone and adjacent tissues.

BRIDGE TABLE
HYGITECH

Bridge tables simplify the work in the operating theatre. The drapes-covered table is positioned over the patient and carries the instruments needed for the operation. Built in durable, shiny stainless steel, the HYGITECH Bridge table has a wide and solid tray, which enables the dentist to have all the materials he needs for the surgery at hand. The edges of the table have no lip, allowing the surgeon to grasp instruments easily.

HEIGHT ADJUSTABLE
MAYO TABLE - HYDRAULIC
HYGITECH

Mayo tables are positioned right next to the surgeon and supports the irrigation motor during implant surgery. The HYGITECH Mayo table is made of stainless steel AISI 316 and has a smooth surface to facilitate its maintenance.

The height is adjustable with a hydraulic foot pedal making it easy to use. The table also has a wheel lock system to prevent it from moving during surgery.

Made in France.

HYGITECH
smart dental surgery solutions

With almost 15 years of the surgical solutions, HYGITECH brings you serenity for the success of your surgeries.
By AO Staff

Patrick J. Henry, BDSc, MSD, DDSc (hc), a prosthodontist from Chittering, Australia, is the 13th recipient of the Nobel Biocare Brånemark Osseointegration Award. He will receive this distinguished award on March 19 during the opening symposium of the Academy of Osseointegration’s (AO) 2020 Annual Meeting in Seattle. Made possible by a grant from Nobel Biocare, this annual award is bestowed by the Osseointegration Foundation, the philanthropic arm of the Academy of Osseointegration. It honors an individual whose contributions to implant dentistry are exemplary in any or all of the foundation’s mission categories: research, education and charitable causes.

Dr. Henry holds professorial and research fellowship appointments at several universities. A retired AO fellow, he was a director on the AO board from 1998-2001. He has conducted continuing education programs in 43 countries, is a contributor to eight textbooks and author/co-author of 110 publications. In 1982, Henry established the Perth Osseointegration Training Centre, subsequently designated as the Brånemark Centre, Australia.

On March 21, Henry will provide an exclusive presentation entitled, “Some Aspects of Dogma and Confirmation Bias” at the annual Titanium Society breakfast meeting. Members of this limited circle participate in selecting the recipient of this award. Registration for AO’s Annual Meeting is still available online at https://ao2020.osseo.org/or on site at the Washington State Convention Center.

Australian prosthodontist Patrick J. Henry will receive the Nobel Biocare Brånemark Osseointegration Award (inset) at the Academy of Osseointegration Annual Meeting in March. Photo/Provided by AO
Designs for Vision’s ground breaking **REVEAL™** lights up the oral cavity like never before. Reveal provides hands-free Fluorescence Enhanced Theragnosis™ (FET™) combining diagnosis and fluorescence enhanced therapy to support decision making and facilitate proper treatment options in:

**CARIOLOGY**
- Identify enamel demineralization and bacterial contamination
- Distinguish between infected and affected dentin

**ORAL HYGIENE**
- Detect supra- and subgingival infected calculus

**PERIODONTOLOGY – IMPLANTOLOGY**
- Identify accumulation of perio-active bacteria

**RESTORATIVE DENTISTRY**
- Actively visualize and differentiate tooth structure and presence of dental restoration

*See the Visible Difference® at Booth 913 or contact us for an in-office demonstration DesignsForVision.com/REVEAL.htm*
