Exhibit-floor education options expand for dentists and auxiliary staff at Hinman 2019

**Exclusive exhibit hall hours, March 21–22**

The 2019 Thomas P. Hinman Dental Meeting, scheduled for March 21-23 (Thursday through Saturday) in Atlanta, is introducing four new educational opportunities on the exhibit floor at this year’s meeting. The quick-paced sessions will feature 10-minute presentations from exhibitors sharing the latest products, technology, and services for dental practices and professionals. The new sessions include:

- **Auxiliary Breakfast & Learn on Thursday from 8:30–9:30 a.m.**
- **Dentist Lunch & Learn on Thursday from noon–1 p.m.**
- **Dentist Breakfast & Learn on Friday from 8:30–9:30 a.m.**
- **Auxiliary Lunch & Learn on Friday from noon–1 p.m.**

**Hinman Hoops area**

“Our 2019 exhibit hall offers more than ever before with numerous opportunities to earn free C.E. and learn about the latest developments in dentistry,” said Dr. Jonathan Dubin, general chair for Hinman 2019. “Also, you can enjoy everything the exhibit hall offers without missing the NCAA Basketball Tournament, which will be shown on screens located in our popular Hinman Hoops area.”

In addition to the extra C.E. opportunities, Hinman 2019 is offering exclusive exhibit hall hours on Thursday and Friday. Dental professionals are invited to visit Hinman’s exhibit hall on Thursday from 3–5 p.m. and Friday from 5–6 p.m. to take advantage of dedicated professional networking and shopping time.

The exhibit hall will feature more than 400 exhibiting companies showcasing new technology, equipment, products, and services for the entire dental staff. The exhibit hall will be open on Thursday from 9:30 a.m.–5 p.m.; Friday from 9:30 a.m.–6 p.m.; and Saturday from 9:30 a.m.–3 p.m.

**C.E. table clinics**

Attendees can obtain free C.E. credit in the exhibit hall throughout the meeting. Table clinics, at the back of aisle 1900 on all three days, offer more than 100 tabletop presentations, each about 10 minutes in length, provided by dental community volunteers — including military personnel. Participants receive one hour of C.E. credit for each hour they spend in the Table Clinic area.

Table Clinic hours are: Thursday from 10 a.m.–1 p.m. and 2–5 p.m., Friday from 10:30 a.m.–1:30 p.m. and 3–6 p.m., and Saturday from 10 a.m.–1 p.m.

**Health pavilion, learning lab, more**

Hinman’s Total Health Pavilion returns this year, in booth No. 1553. Attendees will be able to learn about healthy living, sample nourishing snacks, talk to lifestyle experts — and earn C.E. credit.

The exhibit hall will also feature the Learning Lab Co-Op, offering lab tech expertise for dentists and technicians alike. Lectures (in the Georgia World Congress Center course rooms) and demonstrations (booth No. 201) will be offered all three days. Also in the 2019 exhibit hall:

- **Hinman Hoops area** located in our popular Hinman Hoops area
- **Hinman Marketplace** with non-dental-related exhibitors in booth Nos. 347 to 560
- **The Hinman Shop** located in the marketplace (booth No. 456), will offer Hinman souvenirs. Proceeds will help fund student scholarships
- **The Attendee Power Lounge** in booth No. 757, enables attendees to meet with friends and colleagues or rest, relax and charge mobile devices, courtesy of Dentsply Sirona
- **Hinman Eatery & Dining Dollars** enables attendees to save on lunch in the Hinman eateries with Dining-Dollar coupons provided in the Hinman Program and Exhibits Guide. The Eatery hours are from 11 a.m.–3 p.m. on Thursday and Friday and from 10 a.m.–2 p.m. on Saturday.
- **Wi-Fi** is free in the exhibit hall and in all course rooms at the Georgia World Congress Center

Science, industry and pediatric dentistry.

The annual session of the American Academy of Pediatric Dentistry this year is in the academy’s hometown, Chicago, from May 23–26. The meeting’s host site is the landmark Chicago Hilton on South Michigan Avenue, just across the street from Grant Park’s 8th Street Fountain and Formal Gardens and a short stroll from the iconic Buckingham Fountain. Twelve blocks north is the city’s internationa knoobj known shopping destination, the Magnificent Mile.

The Sunstar Welcome Reception will be held at the Museum of Science and Industry, in Chicago’s historic Hyde Park neighborhood. Attendees will be able to meet with new and old friends and colleagues against the backdrop of an endlessly fascinating and interactive experience. Among the museum’s most famed high- lights are opportunities to explore a full-size replica of the Titanic, walk through a 40-foot-long underwater tunnel, pilot a fighter-jet flight simulator, lord over a 3,500-square-foot model railroad and peep into the Apollo 8 command module.

The opening ceremony keynote speaker is retired Colonel Nicole Malachowski, the first female pilot of the Air Force Thunderbirds Aerial Demonstration Team. Her address, “Headwinds of Change,” could also serve as an overarching theme of the meeting’s scientific program, with an agenda packed full of timely topics reflecting dentistry’s dizzying pace of advancements. Topics include pediatric esthetics, brain development, precision medicine, obstructive sleep apnea, sedation, a dental benefits symposium and an evidence-based training workshop.

The scientific sessions open on Thursday with the preconference course “Speak Up for Patient Health: Critical Conversations on Controversial Issues.” The interactive session offers practical advice on how to effectively discuss difficult topics such as weight issues, eating disorders, substance use, transgender issues, pregnancy, sexual practices and sexually transmitted infections.

The meeting’s two-day exhibit hall will be on Monday and Tuesday, May 27-28. IDIQ 2019 marks the third edition of the CELAbutton event. In collaboration with the Order of Dental Technicians of Quebec (OTTDQ), the meeting provides a full day of sessions and clinical tables, as well as an exhibition featuring specialized products and services.

The Historic Welcome Reception will be held at the Art Institute of Chicago, designed around a concept of modularity. “world-class space with Chicago swagger, tourist information and more. The meeting’s two-day exhibit hall will be on Monday and Tuesday, May 27-28. IDIQ 2019 marks the third edition of the CELAbutton event. In collaboration with the Order of Dental Technicians of Quebec (OTTDQ), the meeting provides a full day of sessions and clinical tables, as well as an exhibition featuring specialized products and services.

Dental Days of Quebec set for May 25–28

The 49th International Dental Days of Quebec (JDIQ), the annual conference of the Ordre des Dentistes du Quebec, will be held from May 25–28 (Saturday through Tuesday) at the Montréal Convention Center (the Palais des Congrès de Montréal) in Montréal, Quebec, right near the heart of the old-world charm of historic Old Montréal.

The annual C.E. and exhibition event is the annual meeting place for Quebeccer dentists and dental team members while also attracting attendees from across the world. With more than 12,000 participants, it is considered the largest dental conference in Canada.

The mission of the Ordre des Dentistes du Quebec, representing approximately 5,300 dentists, is to ensure the quality of dental services through high standards of practice and ethics and to promote oral health among the people of Quebec.

The C.E. courses feature theoretical and practical training presented by renowned speakers from Canada and around the world. The courses and workshops focus on topics related to dental practice, as well as the technical and scientific advancements that influence the current and future practice of dentistry.

Find the ‘Power of the Complete Team’ in Florida

Discover the ‘Power of the Complete Team’ at the 2019 Florida Dental Convention (FDC), June 27-29, at the Gaylord Palms Resort and Convention Center in Orlando. This year’s program focuses on collaboration among the entire dental team. FDC2019 offers 130-plus courses to enhance and refine skills for everyone on the dental team. Attendees can earn up to 20 hours of C.E. credit. Course highlights include topics such as Botox/dermal fillers, dental implants, all-on-four dentures, insurance coding, reading body language and much more.

Exclusively at FDC2019, “Dawson Seminar 1: From TMJ to Smile Design” is being offered for a substantially discounted price. In this introductory seminar to The Dawson Academy’s “The Concept of Dentistry® Series,” participants will learn the timeless message that good, esthetic and complete dentistry must begin with a thorough understanding of dental occlusion and the functions of the masticatory system. In addition to this Dawson Seminar 1, attendees will be able to take advantage of individual breakout sessions being presented by a number of Dawson Academy faculty members.

New this year, attendees can visit the exhibit hall for free with an “Exhibit Hall Only” pass. It’s available to any dental professional or guest who opts to register as “Exhibit Hall Only” to take advantage of the offer. More than 300-plus exhibiting companies and organizations will be on the exhibit floor with the profession’s latest technology, materials, instrumentation and other products and services.

The adage, “Come for the C.E. and stay for the fun,” takes on new meaning at the Gaylord Palms Resort. Without ever having to leave the site, attendees will be able to relax at the adult-only pool or tap into your inner child on one of the many waterslides.

Other fun events during FDC2019 include Thursday’s “Beer Tasting in Paradise,” featuring a five-course tasting and beer pairing where all proceeds will benefit the FDA Foundation. Then, join your colleagues at an all-request show at “Dueling Pianos.” On Friday, you can walk the plank to “Pirate Island” for live music and family-friendly fun. If you are looking for nightlife, end the day celebrating the new dentists and ASDA students at “The After Party.”

Beyond the on-site events, you can “Stay for the Magic” and enjoy the area’s Walt Disney World theme parks at a discounted price for convention attendees. Meeting organizers encourage you to bring your team and join your colleagues, June 27-29, to discover the “Power of the Complete Team.” You can register at www.floridadentalconvention.com. For questions, you can email fdc@floridadental.org or call (850) 681-3629. (Source: Florida Dental Convention)

Ultra-bright light is ultralight in weight

High-definition, uniform light at maximum intensity

By Designs for Vision Staff

Designs for Vision is introducing an advanced photonic design that provides uniform light distribution with maximum intensity. The patent-pending headlights optically focus the light from the LED to provide 45 percent more light with uniform distribution.

The new LED DayLite® Micro HD™ uses the new high-definition imaging in an ultra-lightweight headlight in combination with the new Micro power pack. According to the company, the Micro is the market’s lightest and smallest power pack. The complete unit includes two power packs, and each power pack can run up to 10 hours.

Designs for Vision also has added high-definition imaging to the LED DayLite WireLess Mini HDI, providing a lightweight cordless solution with light intensity comparable to many corded headlights.

You can choose high-definition imaging with either a wired or wireless design to meet your preference, and either HDI headlight will illuminate the entire oral cavity.

Designs for Vision’s WireLess headlights free you from being tethered to a battery pack. The simple modular designs unscouple the headlights from a specific frame or single pair of loupes.

Prior technology married a cordless light to one pair of loupes via a cumbersome integration of the batteries and electronics into the frame.

The compact design of the LED DayLite WireLess headlights are independent of any frame/loupes.

Designs for Vision is also featuring the “REALITY five-star-rated” Micro 3.5EF Scopes, which use an innovative optical design that reduces the size of the prismatic telescope by 50 percent and reduces the weight by 40 percent — while providing an expanded-field, full-oral-cavity view at 3.5x magnification.

Building on an established award-winning design, the newest addition to the Micro Series line is the Micro 4.5EF Scopes, which reduce both the size and weight of the telescopes by 44 percent.

Designs for Vision has expanded into a new 67,500-square-foot location at 4000 Veterans Memorial Highway in Bohemia, N.Y. To see photos of the new facility you can visit www.DesignsForVision.com/move.htm.

You can see the Visible Difference® yourself by visiting the Designs for Vision booth at the Thomas P. Hinman Dental Meeting (booth No. 1005) in Atlanta or at the Academy of Osseointegration Annual Meeting (booth No. 738) in Washington, D.C.

You also can arrange a visit in your office by calling Designs for Vision at (800) 345-4009 or emailing the company at info@dvimail.com.

DMG, one of the world’s leading manufacturers of restorative materials and preventive products, has introduced a precision placement delivery system for a wide range of dental materials. The DMG Composite Dispenser is particularly effective with DMG’s Ecosite Bulk Fill composite.

The dispenser is designed to simplify workflow by placing materials precisely and accurately. It’s built for fast, easy placement of composites, cements, glass ionomers and more. It has ergonomic handle grips and maneuvers easily, enabling an effortless load. According to DMG, the Composite Dispenser provides quick, easy and precise placement of materials; convenient autoclaving for infection control; comfort and ease when holding and maneuvering; and effortless loading.

Together, the Composite Dispenser and Ecosite Bulk Fill can have a significant synergistic effect on a practice’s productivity, the company asserts. Ecosite’s technology avoids the two traditional drawbacks associated with bulk-fill composites: short working time and sub-optimal esthetics. Instead, according to the company, Ecosite offers a maximum depth of 5 mm, a single 20-second composite cure, low shrinkage stress — and exceptional adaptability, packability and handling. The company reports that the material also has high polishability, extra fluoride release and natural esthetics. It does not require a capping layer nor does it stick to instruments.

For more information about the DMG Composite Dispenser or Ecosite Bulk Fill, you can visit dmg-america.com.
The AO 2019 Annual Meeting, which takes place March 13-16 in Washington, D.C., will feature concurrent surgical and prosthetic tracks. (Photo/Provided by AO)

March meeting offers different focuses for varied audience

By AO Staff

To drive home its theme of "Current Factors in Clinical Excellence," the Academy of Osseointegration’s 2019 Annual Meeting will offer a full day of concurrent surgical and prosthetic tracks on March 15 to answer the clinical and scientific questions that all clinicians ask themselves, no matter his or her specialty.

Morning sessions

Whichever sessions attendees choose, each track will begin with its own respective plenary session entitled, "10 Years After.”

Moderators for "10 Years After" will include Edward Sevetz Jr., DMD, for the surgical track and Stephen Parel, DDS, for the prosthetic track. Topics of the "10 Years After" surgical track will include vertical and lateral ridge augmentation; full maxillary reconstruction; and augmentation using biologics.

"What differences have become routine in the past years, compared to the 'early' days? Techniques have better esthetic results and techniques can provide faster results. The bottom line is more patients can be treated, more successfully, more quickly and with better looking, enhanced smiles," said Sevetz, an AO and Osseointegration Foundation (OF) past president. "All meetings tell attendees about 'progress.' However, the AO Annual Meeting is where they will find the most scientifically oriented, evidence-based source for better patient care using osseointegration.”

For the Friday "10 Years After" prosthetic track, Parel, an AO past president, will moderate a series of seven topics, including "10 Years After” for zirconium and screw-retained prosthesis, overdenture and tilted implants.

Afternoon sessions

Following the plenary sessions, each of the tracks will continue their respective programming and return to the science that underpins implant dentistry, featuring sessions on peri-implant bone biology. For the surgical track, the two main sessions will include: "Osseointegration: Restoration of Homeostasis or..."

See AO, page B2
a Foreign Body Response?" moderated by J.E. Davies, BDS, PhD, DSc, and "Soft-Tissue Integration: What is Our Current Understanding?" under the direction of moderator AO Past President Clarence Lindquist, DDS.

For the prosthetic track, the first after-noon session will be entitled "The Evolution of Complex Maxillofacial Rehabili-tation." Moderated by Dennis Rohner, MD, DDS, three teams of surgeons/prosthodontists will discuss the latest developments in complex maxillofacial rehabilitation, representing what is pos-sibly the most challenging domain in the spectrum of implant dentistry.

The prosthetic track will conclude with "Current Thought in Restorative Ceramics" moderated by AO Past Presi-dent Russell Nishimura, DDS. Presenters will discuss indications and limitations of ceramic restorations on implants, present the advantages and defining the boundaries of their use in everyday clinical practice.

"We would like it so when attendees leave the meeting, they can apply some techniques and protocols or ways they can manage their offices when they return on Monday morning," Renouard concluded.

"OMS, Page B1" campaign over the $1 million mark.

"Knowing my colleagues as I do, I had every confidence we would reach our goal," Indresano said. "The OMS spe-cialty values research, education and academic excellence above all else. The generosity of our practitioners, faculty, affiliated organizations and even our residents was gratifying and foretells a bright future for AAOMS in its second century."

The centerpiece of the 2018 campaign is the AAOMS Centennial Tree, which will be displayed at AAOMS headquar ters in Rosemont. Its bronze, silver and gold leaves recognize gifts of $2,500, $5,000 and $10,000, respectively, and many of the inscriptions honor family members, mentors and colleagues.

"We're especially proud that 100 percent of the AAOMS Board of Trustees and the OMS Foundation Board of Direc-tors will be recognized on the Centennial Tree, along with every OMS serving on OMSNIC’s board," Banks said.

"Through its annual fund, the foun-dation provides research grants to scientists and educational support to OMS faculty, students and early-career OMSs. In the past decade, the foundation helped fund the Multicenter Trial of Third Molar Patient Management, a series of clinical studies to improve wisdom teeth treatment. In addition, grants have been given to assist research in facial nerve regeneration and improvement of immunotherapy in head and neck cancers."

Annual fund resources also are used to support the following:

- AAOMS Resident Transitions into Practice Conference, which provides residents with non-clinical information such as financial strategies and coding.
- AAOMS Clinical Trials Methods Course, which provides an overview of research methodology and clinical trial design.
- Research Support Grants, which be-stow $75,000 grants to research proj-ects seeking to solve issues related to oral and maxillofacial surgery.
- Faculty Educator Development Awards, which encourage faculty re-tention in the OMS specialty.
- Student Research Training Awards, which award grants to projects that seek to attract qualified students to the OMS specialty.

Information about the foundation is available on OMSFoundation.org. The Centennial Tree donors and leaf inscriptions are listed at OMSFoundation.org/our-donors/centennial-tree-donors.

Glidewell Dental to present 3rd annual educational symposium in Orlando

By Glidewell Dental Staff

Glidewell Dental, a leader in dental education and a technological innovator in restorative dentistry for nearly 50 years, has announced the third annual Glidewell Dental Symposium.

Scheduled for Nov. 8–9, at the Hilton Bonnet Creek and Waldorf Astoria in Orlando, Fla., the event will provide practical clinical and business education, with a first day of fast-paced presentations and a second day of in-depth lectures and hands-on programs crafted specifically to help doctors overcome the challenges of everyday dentistry. Attendees enrolled for both days will earn up to 12 hours of continuing education (C.E.) credits.

“This is an exciting time to be involved in dentistry,” said Dr. Neil Park, scientific chair of the Glidewell Symposium and vice president of clinical affairs at Glidewell Dental. “From innovative technologies to progressive clinical techniques, there are many opportunities to help improve oral health and transform the smiles of patients. The Glidewell Symposium, now in its third year, aims to bring dentists the emerging science, technology and clinical methodologies that will define the future of dentistry. The curriculum is intended to help clinicians learn new tools and techniques to expand their service offerings, overcome challenges and meet the needs of patients.”

Dentists have conveyed a growing need for practical and hands-on dental education, as demonstrated by last year’s Glidewell Symposium, which more than doubled in size from the previous year and sold out three months before the event. In recognition of this strong enthusiasm, and to accommodate dentists in 2019, the Glidewell Symposium has moved to a world-class location in Orlando and will bring together even more experts from diverse areas of dentistry.

During this weekend of networking and education, topics will include everything from dental implants, restorative techniques and esthetic dentistry, to in-office milling, sleep-related dentistry and practice management. All courses are designed to provide real-world clinical and business solutions so that attendees can achieve immediate, tangible results when they return to their practices on Monday.

“In the general session on Friday, we will have a full day, with 16 fast-paced presentations that eliminate the nonessential information and get right to the heart of the clinical technique or business strategy being presented,” Park said. “And on Saturday, attendees can choose from nearly 20 focused lectures and hands-on programs that further expand on the topics that matter most to the individual attendee. We are taking the educational format that was so popular last year and making it even better.”

On both days of the event, attendees will also be able to browse interactive exhibits that feature the latest in 3-D printing, intraoral scanning, in-office milling, the CAD/CAM workflow, dental implants, and regenerative and restorative materials. There will be live demonstrations, virtual reality tours and opportunities for one-on-one discussions.

The 2019 Glidewell Dental Symposium is for dentists, hygienists, and chairside and front-office staff. Tuition for the Friday general session is $195, and to register for sessions on both Friday and Saturday, tuition is $320. Early bird pricing is available for $145 and $270, respectively, when registering by May 1. Friday tuition includes a complimentary breakfast, lunch and cocktail reception with hosted bar; Saturday tuition includes breakfast.

Because last year’s symposium sold out quickly, attendees are encouraged to register early to secure seats.

For the complete symposium agenda and to register, visit glidewellsymposium.com or call (866) 791-9539.
