Yankee Dental Congress ‘Advancing the Vision’

Jan. 30–Feb. 1 in Boston

Yankee Dental Congress is New England’s largest meeting for professionals seeking the highest quality dental continuing education, as well as dental products, services, and resources. With 26,000 dental professionals in attendance encompassing all members of the dental team, Yankee Dental Congress is the fifth largest dental meeting in the United States. Held in Boston each January, Yankee is a top resource in New England for industry professionals on the cutting-edge of oral health care.

Yankee will be “Advancing the Vision” in at the 2020 meeting with a wide variety of 300-plus continuing education courses taught by industry experts, including more than 125 free courses. Attendees will be able to gain insight on evolving trends and best practices by visiting over 400 exhibitors demonstrating some of the most innovative dental technology solutions in the industry.

The meeting provides an opportunity to broaden perspective and grow your dental professional network.

The Yankee Dental Congress is sponsored by the Massachusetts Dental Society, in cooperation with the dental associations of Connecticut, Maine, New Hampshire, Rhode Island, and Vermont, and members receive discounted registration.

But all dental professionals are invited to the meeting, which will be held at the Boston Convention & Exhibition Center from Jan. 30 through Feb. 1.

INNOVATIVE, page A4

cally focuses the light from the LED to provide 45 percent more light with uniform distribution at 5,800° Kelvin, the ideal color temperature.

The patented IR feature enables improved infection control by letting practitioners operate the headlight without touching the system. The IR headlights use a built-in infrared signal to enable turning the light on or off simply and safely. Onboard biometrics sense the position of the headlight to filter out unintended signals while working.

Designs for Vision has added the High Definition Imaging to all of its headlights including the LED DayLite® WireLess™ IR and the LED DayLite WireLess Mini, providing a lightweight cordless solution with light intensity comparable to many corded headlights. You can choose High Definition Imaging with either a wired or wireless design to meet your preference, and any of the HDi headlights will illuminate the entire oral cavity.

Designs for Vision’s WireLess headlights free users from being tethered to a battery pack. The simple modular designs uncouple the headlights from a specific frame or single pair of loupes. Prior technology married a cordless light to one pair of loupes via a cumbersome integration of the batteries and electronics into the frame. The compact design of the LED DayLite WireLess headlights are independent of any frame/loupes.

The LED DayLite Micro HDi uses the new High Definition Imaging with a lightweight headlight in combination with the Micro power pack. The Micro power pack is the lightest and smallest power pack. The complete unit includes two power packs, and each power pack can run up to 10 hours.

See for yourself

You can see the Visible Difference® yourself by visiting Designs for Vision’s booth (No. 1051) at the AAOMS in Boston; or to arrange a visit in your office, call (800) 345-4009 or email info@dvimail.com.
