TAKING A PEAK INTO THE FUTURE: CERCON EYE Top-notch craftsmanship and automation benefits are no longer a contradiction in terms. The Carcon eye scanner delivers precision data in a matter of seconds – even if the model is complicated. And perfect data are the perfect beams on which to build an efficient CAD design using the integrated Carcon art software.

**Carcon-eye** - a sharp eye for details:
- Super-fast object data acquisition using serial scan.
- Precision surface reproduction with three matrix layers.
- Automatic definition of preparation margins.

For better dentistry
