Participants will learn:

- Understand the clinical features suggestive of oral cancer
- Be familiar with new methods of detection and imaging of oral cancer
- Be familiar with oral cancer screening methods for your practice

This course offers a description of the evaluation and treatment concepts were given by Dr James Glande, all Italy, as well as other internationally renowned speakers in the field of endodontics.

“Most of these techniques are already available and used in clinical practice throughout the Asia Pacific region,” commented APEC’s president Prof. Luke Sung Kim, who is also Chairman of the Department of Conservative Dentistry at the Kyungpook National University’s School of Dentistry at the Kyungpook University of the South Korea.

Dentists must have a good understanding of the anatomy of the jaws prior to treating acquired or congenital tooth loss, dental and osseous pathology and trauma, as well as orthognathic deformities, temporomandibular disorders and soft tissue and skeletally based sleep disease. CBCT offers a three-dimensional view of the maxilla, mandible, orbits and the dentition allowing all dentists to acquire more diagnostic information prior to invasive or noninvasive therapy. Numerous examples revealing Cone Beam to be an indispensable aid to every day dentistry will be presented.

Overall, up to 750 dental professionals attended the three-day event, of which every fourth attendee came from abroad. Hands-on workshops on the use of NiTi files and microscopes were well attended, according to the organisers, and topics related to working length determination, biomechanical canal preparation, and pulp regeneration enjoyed widespread attention. Presentations about the latest developments and treatment concepts were given by Dr James L. Gutmann, U.S., Prof. Gianluca Gambarini and Drs Politino/Politi, all Italy, as well as other internationally renowned speakers in the field of endodontics.

“Several of these news reports already available and used in clinical practice throughout the Asia Pacific region,” commented APEC’s president Prof. Luke Sung Kim, who is also Chairman of the Department of Conservative Dentistry at the Kyungpook National University’s School of Dentistry at the Kyungpook University of the South Korea.

Kyo Kim, who is also Chairman of the Department of Conserva-tive Dentistry at the Kyungpook National University’s School of Dentistry at the Kyungpook University of the South Korea, noted that APEC’s congress takes place every two years, with smaller meetings or events held at larger international endodontic congresses in the intervening period. According to Kim, the next general meeting will take place in Jordan in early 2015.
