Large diastema closure with Filtek™ Z350XT Universal Restorative

By SM

Female patient, 28 years old. Main complaint about the spacing between her teeth with complete rejection of orthodontic treatment and laminate veneers. Direct restoration was made using Filtek™ Z350XT Universal composite (Enamel A2, Dentine A2), Single Bond Universal adhesive, Sof-Lex™ finishing and polishing discs and interproximal finishing strips.

The patients’ request was finished composite for upper central using Enamel A2 and Dentine A2.
