Dental implant world joins AAID in San Diego

San Diego will be the site of the AAID Annual Educational Conference from Oct. 11-14. Photo/www.freeimages.com

Record 28 hands-on workshops and 11 seminars planned for annual educational conference

By AAID Staff

The dental implant world is joining the American Academy of Implant Dentistry in San Diego at AAID’s 66th Annual Educational Conference, Oct. 11-14.

More than 1,000 implant dentistry professionals are expected to travel from around the world to learn from the top experts in implant dentistry, as well as from each other, over three-and-one-half days.

A full day of presentations by clinicians from a dozen different countries will comprise AAID’s Leonard Linkow Memorial Global Symposium on Friday, Oct. 13.

A record 28 hands-on workshops and 11 seminars are planned for the annual educational conference.

AAOEMS to host its 99th annual meeting in San Francisco

By AAOMS Staff

The American Association of Oral and Maxillofacial Surgeons (AAOMS) will host its 99th Annual Meeting, Scientific Sessions and Exhibition — one of the largest and most comprehensive educational conferences in the world developed exclusively for oral and maxillofacial surgeons and their staff — from Oct. 9-13 in San Francisco.

Approximately 4,000 doctors and other attendees will converge to learn and share innovations in clinical research, procedures and practice to ultimately improve patient outcomes. Oral and maxillofacial surgeons and their dental colleagues can gain expertise from attending sessions presented by renowned researchers and clinicians on topics ranging from sleep apnea treatment and management of gunshot wound injuries to replacement of the temporomandibular joint and the evolution of cleft lip and palate surgery.

Coversing the entire breadth of the specialty, the 26-plus hours of scientific and educational sessions are divided into more than 15 comprehensive curriculum tracks focusing on trauma management, reconstruction, corrective jaw surgery and more.

Highlights of the more than 110 educational sessions include:

- The popular preconference program will focus on office-based anesthesia, and the Anesthesia Assistant Module will cover historical perspectives and state-of-the-art treatments, and a TMJ Module will discuss diagnosis and nonsurgical and surgical therapies for the temporomandibular joint – the most constantly used joint in the body.
- The Chalmers J. Lyons Memorial Lecture will explain “The Hidden Costs of Antibiotics,” including their unintended consequences and role in contributing to modern plagues.
- New this year, two cadaver workshops about pathology and cosmetic facial surgery at the University of the Pacific’s Arthur A. Dugoni School of Dentistry will allow participants to perform procedures under faculty supervision.
- A two-day “Beyond the Basics” coding workshop will provide crucial information on issues such as health-care laws, reimbursement issues and compliance.
- The AAOMS Annual Meeting is designed to be the most extensive educational program and exhibition for oral and maxillofacial surgeons, faculty, residents and professional staff,” said AAOMS President Douglas W. Fain, DDS, MD, FACS. “We have planned four days of stimulating courses and intriguing exhibits that will benefit doctors, their staff and their practices. We look forward to numerous opportunities for learning, innovation and networking.”

More than 200 vendors will display their products and services to benefit oral and maxillofacial surgery practices at the three-day exhibit hall at the Moscone Convention Center South. The exhibit hall also will feature a Social

Glidewell Dental to present educational symposium in Dallas

By Glidewell Dental Staff

Glidewell Dental, a leading dental restorative manufacturer, is ranked as one of the world’s leading producers of custom restorative service and recognized as an industry-leading materials and devices manufacturer. Established in 1970 in Orange County, Calif., Glidewell continues to build on its storied history of technological innovation and continuous excellence. With a commitment to making dental practitioners, students, non-members and the scientific community aware of these new developments, Glidewell is proud to announce the inaugural Glidewell Dental Symposium, scheduled for Nov. 17 at the Dallas Marriott Las Colinas in Irving, Texas. This 1-day event will provide an expansive look at a variety of tools and techniques available to the modern practice. By showcasing time-tested solutions, the symposium is intended to provide an educational experience while hearing from and visiting with esteemed speakers and distinguished leaders. Dr. Jack Hahn, a noted pioneer within the modern practice, will provide the closing keynote.

General Dentistry-approved PACE Program Symposium Attendees will have the opportunity to earn up to eight units of continuing education (C.E.) while hearing from and visiting with various, esteemed opinion leaders. Dr. Jack Hahn, a noted pioneer in the field of dental implantology, will provide the closing keynote. Whatever a clinician’s comfort or experience level, the symposium intends to provide an expansive look at some of the most exciting tools and techniques available to the modern practice. By showcasing time-tested solutions augmented by state-of-the-art methods and materials, the organizers hope to assist attending professionals in maximizing efficiency, optimizing results and furthering practice growth.

With new technology, there’s always the question: What is the cost of adoption? said Jim Glidewell, founder and president of Glidewell Dental, who is scheduled to deliver the symposium’s opening remarks. I’ve always preferred to ask, what is the cost of delay? In dentistry, we must strive first and foremost to provide the best possible service for our patients. In following this creed, I’ve found that those of us looking to advance the industry — adapting at the speed of change — often end up benefiting greatly ourselves.

Tuition for the event is set at $995. For the complete symposium agenda or to submit a registration request, visit GlidewellSymposium.com or call (866) 791-9539. Breakfast and lunch will be provided, along with an evening cocktail reception with hosted bar.

Glidewell Dental is among the world’s largest producers of custom restorative service and recognized as an industry-leading materials and devices manufacturer. Established in 1970 in Orange County, Calif., Glidewell continues to build on its storied history of technological innovation and continuing education, committed to making comprehensive treatment more accessible to patients domestically and internationally. Get Your Patients Selfie-Ready!

With Dentatus ANEW® Narrow Diameter Implants, implant treatment is:

minimally invasive · less time-consuming · more affordable

Dentatus ANEW 1.8, 2.2, 2.4 & 2.8mm diameters

dentatususa.com (800) 323-3136

By Dentatus Staff

Attend the AAID main podium lecture by Dr. Georgios Romanos Wednesday, Oct. 11, from 2–3 p.m., where he will present his findings on narrow-diameter implants in his lecture, “Implant Dentistry for Compromised Clinical Cases Without Bone Grafting.”

Dentatus implants are safe, long-term solutions that you can rely on to provide patients with immediate function with minimal discomfort, according to the company. What’s more, Dentatus is the only system of its kind where a crown can be changed and adapted over time without causing any damage to the implant itself, the company asserts.

The upside? In a single visit, a Dentatus ANEW® implant is placed and a temporary crown is fabricated. Patients can immediately enjoy the benefits of an aesthetic restoration and can conveniently schedule the next visit.

In the United States, Europe and Japan, more than 240 million people lack at least one tooth. In the United States alone, that number is 178 million. But, for a variety of reasons — medical, clinical, emotional, financial — or maybe simply lack of awareness that new teeth can be placed in one short minimally invasive procedure — it is a minority that seeks implant procedures.

Because Dentatus ANEW implants are considerably thinner than most other implants — available in 1.8, 2.2, 2.4 and 2.8 mm diameters — they overcome anatomical limitations.

Because there is no need to orthodontically move teeth to create interdental space or to undergo ridge augmentation in order to build bone, the Dentatus ANEW implant is both a time- and money-saver.

Simply put, you can put your trust in this tested system that involves fewer procedures, requires less chair time and uses less hardware than is needed with standard implants, according to the company. Dentatus Anew leaves more healthy bone intact — causing minimal trauma and is known to result in less bone loss. With just one short session, a secure provisional restoration is fabricated, allowing you — conveniently, and at your own pace — to schedule your next visit.

Visit Dentatus at AAID booth No. 413 to pick up a reprint and also be sure to check out the company’s newest campaign, “Get Your Patients Selfie-Ready” — an easy to read patient-education brochure touting the benefits of implants for your patients who have questions or hesitation about treatment. In our selfie-oriented world, a full complement of teeth is more important than ever before. The brochure explains how patients will walk out with a new tooth that feels secure, believably natural and permanent.
