Patients are demanding esthetic, reliable and conservative options to replace their defective amalgam restorations. The Same Day Inlay/Onlay technique was pioneered to improve both patient care and practice economics. Learn this amazing technique and earn eight Academy of General Dentistry credits. You can eliminate temporaries, the second visit and embarrassing emergencies between appointments. With less time and no lab bill, your bottom line will benefit as well.

Due to the success Dr. Lorin Berland has had with Same Day Inlay/Onlays, he has created an instructional CD outlining the techniques, materials and equipment necessary to provide this wanted and needed service.

their respective specialized fields, leading to the enhancement of the business effectiveness, market presence and corporate value of all three companies.

Melonakos said, “Mr. Negoro’s insight and vision for the future will also be critical to lead the transfer of technology and collaborations between Shofu, Mitsui and Sun Medical.”

With a joint task force, Shofu, Mitsui and Sun Medical plan to promote the development of new products in the dental field, optimize manufacturing technology, explore new advancements in materials technology and enhance chemical products currently in development.

President Negoro said, “Our goals remain unchanged, which include speeding up the development of new products and expanding our business globally.”

Melonakos added, “This is a sign that Shofu recognizes new product innovation as one of the most important components of success and growth in the future.”
