Westerners have plenty to look forward to at DTSC Symposia

People from around the world flock to the annual Greater New York Dental Meeting, and with very good reasons beyond the fact that there is no registration fee.

There’s something for everybody—even for those who might make the trip from the West Coast.

Again this year, Dental Tribune America has partnered with the meeting’s organizers to offer four days of symposia in the areas of endodontics, implantology, cosmetic and digital dentistry.

The meeting is scheduled for Nov. 29 to Dec. 2. Each day will feature four individual one-hour lectures on various topics led by experts in their fields. Participants not only earn C.E. credits, but also gain an invaluable opportunity to learn diverse aspects of dentistry and how to integrate a variety of treatment options into their practice.

**DTSC Symposia at the GNYDM — C.E. Program 2009**

Using the most state-of-the-art materials, Dr. Glazer will explain the advantages and methods used to achieve the maximum esthetic and functional results for patients.

**November 30, 10–11 a.m.**

*E4D Sky: Dentistry’s Destination*

Gary Severance, DDS and Lee Culp, DDS

Demonstrating everything that dental professionals need for the design and fabrication of single-unit glass ceramic restorations, either chairside or benchtop, the program will be an interactive, entertaining and amazing display of all that modern dentistry offers for comprehensive care.

**November 30, 11:30 a.m.–12:30 p.m.**

*Know Your Products & Tools for Today’s Healing Dentistry*

Fay Goldstep, DDS

**December 1, 10–11 a.m.**

*Restoration of the Endodontically Treated Tooth: A Step-by-step Discussion of Clinical Innovations*

George Freedman

**December 2, 10–11 a.m.**

*My First Esthetic Implant Case: Why, How and When?*

Marius Steigmann

**Dental Tribune Study Club schedule at-a-glance**

- **November 29, 10–11 a.m.**
  - George Freedman: One-step Adhesion, One-step Cementation

- **November 29, 11:30 a.m.–12:30 p.m.**
  - Dan McEwen: High-resolution Cone-beam with PreXion 3-D

- **November 29, 1:30–2:30 p.m.**
  - Steven Weinberg: Simplify Esthetic Dentistry

- **November 29, 3–4 p.m.**
  - Howard Glazer: The Beauty of Bonding

- **November 30, 10–11 a.m.**

  - TBA: Affordable Soft-tissue Diode Lasers

- **December 1, 1:30–2:30 p.m.**
  - David Hoexter: Esthetics Using Cosmetic Periodontal Surgery

- **December 1, 3–4 p.m.**
  - Lynn Mortila: You’ve Taken Implant Training … What Do You Do Next?

- **December 2, 10–11 a.m.**
  - George Freedman: Restoration of the Endodontically Treated Tooth: A Step-by-step Discussion of Clinical Innovations

- **December 2, 11:30 a.m.–12:30 p.m.**
  - Barry Levin: Immediate Tooth Replacement in the Esthetic Zone

- **December 2, 1:30–2:30 p.m.**
  - Ron Scheidore: More Than Just Teeth and Gums

- **December 2, 3–4 p.m.**
  - Marius Steigmann: My First Esthetic Implant Case: Why, How and When?
This program focuses on the new technological advances that have made healing possible: scientific, accurate, reproducible and clinically significant caries detection; the potpourri of the ingredients and tools that the dentist needs for healing therapies; gioners, the new healing composite resin; photo-activated disinfection to promote remineralization and healing; and user-friendly laser technology to keep peri treatment in your office.

• Nov. 30, 1:30–2:30 p.m.
  Oralverse: In Practice
  Steven Glassman, DDS
  OraVerse is a local anesthesia reversal agent that accelerates the return to normal sensation after routine dental procedures. Clinical documentation showing the safety and efficacy of the drug in clinical trials will be highlighted.

• Nov. 30, 3–4 p.m.
  The Advantage of Small FoV High-resolution CBCT Imaging
  Dan McEowen, DDS
  This presentation will instruct you on how to take a 360 degree rotation with either 512 or 1,024 projections during the scanning time. You will learn how to produce ready-to-go 3-D, sagittal and coronal images within 30 seconds after the scan axial.
  Dr. McEowen will introduce PreXion 3-D, the only CBCT scanning unit using its own built-in graphic cards, as well as 3-D rendering boards, which result in the highest resolution when considering all smaller FoV CBCT scanning devices.

• Dec. 1, 10 – 11 a.m.
  Technological Resources and Biological Concepts in Minimally Invasive Endodontics
  Renato Leonardo, DDS
  This course is ideal for the progressive general practitioner with a minimally-invasive practice. Along with hands-on training, clear demonstrations and an educational presentation, lecture participants can expect information about vital and non-vital pulp therapy, the Anatomic Endodontic Technology (A.E.T.) System and the Apical Delivered Obturation (A.D.O.) System.

• Dec. 1, 1:30–2:30 p.m.
  Restorative of the Endodontically Treated Tooth: A Step-by-step Discussion of Clinical Innovations
  Dr. George Freedman, DDS
  The restoration of the endodontically treated tooth is one of the most common procedures in dentistry today. This program examines numerous recent advances that facilitate the dentist in restoring the endodontically treated tooth: bonded, tooth-colored fiber-reinforced posts and cores; faster, better and more accurate impression techniques; one-step predictable temporization.
  Dr. Freedman will show how changing the background of the desired image will enhance it to appear brighter, cleaner, healthier, yet physiological, as well.

• Dec. 2, 10 a.m.
  Restoration of the Endodontically Treated Tooth: A Step-by-step Discussion of Clinical Innovations
  Dr. George Freedman, DDS
  The restoration of the endodontically treated tooth is one of the most common procedures in dentistry today. This program examines numerous recent advances that facilitate the dentist in restoring the endodontically treated tooth: bonded, tooth-colored fiber-reinforced posts and cores; faster, better and more accurate impression techniques; one-step predictable temporization.
  This multi-focus hands-on program, participants will have an opportunity to rehabilitate a flared canal and then to cement posts while creating resin cores suitable for ceramic or ceramo-metal restorations.

• Dec. 2, 11:30 a.m.–12:30 p.m.
  Immediate Tooth Replacement in the Esthetic Zone
  Barry Levin, DDS
  The time frame of three to six months of unloaded healing is not always mandatory any longer. With osteoconductive implant surfaces, newer implant materials and proper diagnoses, patients can often experience implant therapy without the inconvenience of removable temporary appliances and bonded provisional restorations.

• Dec. 2, 1:30–2:30 p.m.
  More Than Just Teeth and Gums
  Ron Schefidore, DDS
  Dental professionals are now incorporating blood screening, evidence-based practice in their daily practice and incorporating restorative technology into the restorative armamentarium.

• Dec. 2, 3–4 p.m.
  Oral Sedation Dentistry
  David Hoexter, DMD
  A beautiful smile — the desired image — must be healthy and maintainable. In today’s society this goal is subjective and influenced by our interpretation of esthetics. Using periodontal techniques, specifically cosmetic periodontal surgical techniques, Dr. Hoexter will show how changing the background of the desired image will enhance it to appear brighter, cleaner, healthier, yet physiological, as well.

• Dec. 2, 10:30 a.m.–12:30 p.m.

based supplementation, laser therapy, DNA testing and physician referrals into their office protocol to improve dental treatment outcomes and improve the overall health of dental patients. Amazing patient testimonials and treatment outcomes discussed.

• Dec. 2, 3–4 p.m.
My First Esthetic Implant Case: Why, How and When?

Marius Steigmann, DDS
Esthetic dental implants are of increasing importance in today’s dentistry. Success from the esthetic aspect requires bone height and width, soft-tissue architecture and prosthetic restorations close to nature.
Out of these three elements, it is the soft-tissue frame that can be maintained or reconstructed not only using surgery, but also with the right prosthetic elements.
The DTSC program is made available through educational grants provided by:
• SHOFU
• PreXion
• VOCO
• ADM
• Novolar Pharmaceuticals
• Ultradent
• Chase
• AMD Lasers
• DMG
• Straumann
The symposia are free for registered Greater N.Y. Dental Meeting attendees, but pre-registration is recommended. Also, due to limited seating, register early to ensure preferred seating.
For registration please visit www.gnydm.com or send an e-mail to info@gnydm.com. International attendees requiring visas should e-mail customerservice@gnydm.com.
For more program details, please check the schedule at www.DTStudyClub.com.
