Plenty to look forward to at DTSC Symposia

- Nov. 29, 10–11 a.m.; One-step Adhesive, One-step Cementation, George Freedman, DDS

Seventh generation adhesive materials have simplified the process of dental bonding and made esthetic procedures very predictable. These new products etch, bond and desensitize in a single step, and virtually eliminate postoperative sensitivity while decreasing the potential for marginal breakdown.

- Nov. 29, 11:30 a.m.–12:30 p.m.; High-resolution Cone Beam with Prevision 3-D, Dan McEowen, DDS

Cone-beam computed tomography (CBCT) offers new paradigms to dental radiography. From what have been conventional 2-D images, dentists now have the ability to look at the magnitude of bone loss, and the density and thickness of bone as well as any thickness as well as 5-D.

- Nov. 30, 1:30–2:30 p.m.; Simply Esthetic Dentistry, Steven Weinberg, DDS

Dr. Weinberg’s presentation is a comprehensive, clinically-oriented program addressing the constant state of evolution in esthetic materials and restorative techniques. Participants will learn about a variety of materials, techniques and philosophies to create beautiful, long-lasting anterior esthetic restorations in an exciting educational environment.

- Nov. 29, 3–4 p.m.; The Beauty of Bonding, Howard Glazer, DDS

This presentation will encompass the science of bonding, the art of composite restoration and the finesse of finishing and polishing. Using the most state-of-the-art materials, Dr. Glazer will explain the advantages and make them used to achieve the maximum esthetic and functional results for patients.

- Nov. 30, 10–11 a.m.; Esthetics — A Foundation for Comprehensive Care, R. Lee Culp, DDS

Demonstrating everything that dental professionals need for the design and fabrication of single-unit glass ceramic restorations, either chairside or benchtop, the program will be an interesting and entertaining display of all that modern dentistry offers for comprehensive care.

- Nov. 30, 11:30 a.m.–12:30 p.m.; Know Your Products & Tools for Today’s Healing Dentistry, Guy Goldshein, DDS

This program focuses on the new technological advances that have made healing possible: scientific, accurate, reproducible and clinically significant caries detection; the potpourri of the agents and tools that the dentist needs for healing therapies; goniomer, the new healing composite resin; photo-activated disinfection to promote remineralization and healing; and user-friendly laser technology to keep perio treatment in your office.

- Nov. 30, 1:30–2:30 p.m.; Oralverse: In Practice, Steven Glassman, DDS

Oralverse is a local anesthesia revers-al agent that accelerates the return to normal sensation after routine dental procedures. Clinical documentation showing the safety and efficacy of the drug in clinical trials will be highlighted.

- Nov. 30, 3–4 p.m.; The Advantages of Small FoV High-resolution CBCT Imaging, Dan McEowen, DDS

This presentation will instruct you on how to take a 560-degree rotation with either 512 or 1,024 projections during the scanning time. You will learn how to produce ready-to-go 3-D, sagittal and coronal images within 50 seconds after the scan axial.

- Dec. 1, 10 – 11 a.m.; Technological Resources and Biological Concepts in Minimally Invasive Endodontics, Renato Leonardo, DDS

This course is ideal for the progressive general practitioner with a minimally-invasive practice.

Along with hands-on training, clear demonstrations and an educational presentation, lecture participants can expect information about vital and non-vital pulp therapy, the Anatomoc Endodontic Technology (A.E.T.) System and the Apical Delivered Obturation (A.D.O.) System.

- Dec. 1, 11:30 a.m.–12:30 p.m.; Affordable Soft-tissue Diode Lasers, Speaker TBD

The newest diode lasers cover the widest range of clinical indications. They’re easy to use and incorporate into every practice. In fact, they’re so easy to afford that they should be installed in every operatory.

- Dec. 1, 1:30–2:30 p.m.; Esthetics Using Cosmetic Periodontal Surgery, David Hoexter, DMD

A beautiful smile — the desired image — must be healthy and maintainable. In today’s society this goal is subjective and influenced by our interpretation of esthetics. Using periodontal techniques, specifically cosmetic periodontal surgical techniques, Dr. Hoexter will show how changing the background of the desired image will enhance it to appear brighter, cleaner, healthier, yet physiologically, as well.

- Dec. 1, 3–4 p.m.; You’ve Taken Implant Training... What Do You Do Next? – Lynn D. Mortillo, RDN

This course will discuss integrating implants into your practice. Staff education, auxiliaries’ responsibilities, identifying implant patients, case presentation skills, documentation and record keeping will be discussed. Focus will also be given to the tools that can aid the implant focused prac-tice.

- Dec. 2, 10–11 a.m.; Icon – Innovative Caries Treatment without Drilling, George Freedman, DDS

The course topics include: from research to chair-side; preserving healthy tooth structure; interproximal and smooth surface treatment options; step-by-step clinical procedure; caries infiltration; present and future.

- Dec. 2, 11:30 a.m.–12:30 p.m.; The Advantage of 3-D, Immediate Tooth Replacement in the Esthetic Zone, Barry Levin, DDS

The time frame of three to six months of unloaded healing is not always translatable any longer. With osteoconductive implant surfaces, newer implant materials and proper diagnoses, patients can often experience implant therapy without the inconvenience of removable temporary appliances and bonded provisional restorations.

- Dec. 2, 1:30–2:30 p.m.; More Than Just Teeth and Gums, Ron Schefeld, DDS

Dental professionals are now incorporating blood screening, evidence-based supplementation, laser therapy, DNA testing and physician referrals into their office protocol to improve dental treatment outcomes and improve the overall health of dental patients. Amazing patient testimonials and treatment outcomes discussed.

- Dec. 2, 3–4 p.m.; My First Esthetic Implant Case: Why, How and When?, Marius Steigmann, DDS

Esthetic dental implants are of increasing importance in today’s den-tistry. Success from the esthetic aspect requires bone height and width, soft-tissue architecture and prosthetic restorations.

Out of these three elements, it is the soft-tissue frame that can be maintained or reconstructed not only using surgery, but also with the right prosthetic elements.

The DTSC program is made available through educational grants pro-vided by: SHOBU, PreXion, VOCO, D4D, Novolad Pharmaceuticals, Ultra-dent, Chase, AMD Lasers, DMG, Straumann. For registration — it’s free for GNYDM attendees — please visit www.gnydm.com or send an e-mail to info@gnydm.com.
