Meeting on implants informs and inspires

By Michmershuizen, Managing Editor Endo Tribune

The future of implant dentistry is bright. That was the message delivered at the Long Island Dental Implant Symposium, held Sept. 17 at the Huntington Hilton in Melville, N.Y. The event featured presentations by three well-known speakers and was sponsored by Astra Tech and Town & Country Dental Studios. More than 50 dentists attended, according to organizers of the event.

Dr. Roger P. Levin, whose consulting business, the Levin Group, is dedicated to helping dentists increase production and profitability while having fun at the same time, led off the day with a simple message. Forget the bad news about the economy, he said. The public needs us, and the public wants us. And yes, people are still spending money on elective dentistry.

The key, Levin said, is to understand today’s new breed of patient. People now are increasingly affluent. Most are educating themselves on treatment options by visiting internet sites before even walking into a practice. They feel pressure to look good, and more than anything they want convenience. “Whoever makes it easiest wins,” he said.

At the same time, Levin said, it is important to provide patients with various payment options, such as 5 percent off for cash up front, half up front and half by the end of the treatment, or financing via credit. “Have a finance person whose job it is to get an option accepted,” he said. “The fact is that it always comes down to money.”

It’s also vital, Levin said, to educate each and every patient about the benefits of implants, so that if they ever lose a tooth they will think of you. “Everyone in your practice should be familiar with the benefits of implant dentistry,” he said. “Your office should ‘scream’ implants — your staff should be implant evangelists.”

Levin said that when talking to patients about implants, it is important to “speak English, not dental.” After all, he said, people just want to know five things: What is it? What will it do for me? How long will it take? How much does it hurt? How much will it cost? It is useful to use scripting, he said, to shift the conversation about elective dentistry from money to benefits. “Stop talking technical, talk benefits,” he said.

The good news, Levin said, is that advances like the Atlantis abutment, manufactured by Astra Tech and made available through Town & Country Dental Labs, plus diagnostic tools like cone beam scanning, available from companies like i-dontics, make working with implants faster, easier and more profitable than ever before.

Dr. Julian Osorio, inventor of the Atlantis abutment, offered a presentation on the thinking behind the patient-specific, CAD/CAM technology that has dramatically simplified and improved the implant restorative process. Osorio explained how Atlantis abutments eliminate the need for final impressions and cut chair time in half. The final result, he said, is improved clinical outcomes for patients.

Dr. Alan A. Winter, co-founder, president and CEO of i-dontics, a company that provides digital cone beam scanning, explained why 3-D imaging is such an indispensable tool for the pre-surgical planning of dental implants.

Also participating in the daylong symposium was Cadent, a digital impression company whose iTero system is designed to make restorations more predictable and better-fitting.

HANDS-ON WORKSHOP

Narrow Body Implants to Stabilize, Cushion and Retain Lower Dentures

Without the use of: Housings O-Rings, Or Adhesives

Participate in the real-time procedure, installing Atlantis™ implants on a hard model. Retrofit the lab-made aesthetic denture and reline it with the Tuf-Link™ silicone material.

All steps and instruments are precisely the same as used in your office. Participants keep the model for staff training and patient education.

2008 Workshop Schedule
Oct 15 Columbus, OH
Oct 17 Nashville, TN
Oct 22 Richmond, VA
Oct 24 Orlando, FL
Oct 29 Newark, NJ
Nov 5 New York, NY
Nov 5 Chicago, IL
Nov 14 San Francisco, CA
Nov 17 Miami, FL

Accreditation: 4 credits will be awarded upon completion of the course.
Keith Rosselin, DDS Hands-on Course Instructor

FMA APPROVED FOR LONG TERM USE
