Mouthwash link with cancer

Dr Nigel Carter, the chief executive of the British Dental Health Foundation, rejected the findings and said: ‘A recent, and more thorough review of all available evidence carried out by leading experts on behalf of the foundation concluded there were no proven links between alcohol-containing mouthwashes and increased incidence of mouth cancer. The public should not worry.’

Last night, a spokeswoman for Johnson & Johnson Ltd UK, the manufacturer of Listerine, said: ‘There is no scientific evidence to support an association between the use of alcohol-containing mouthwashes, such as Listerine, and an increased risk of oral cancer.’

Dr Gregory, a former dental public health consultant for NHS Bedfordshire, is a fellow of the Faculty of Public Health, Royal College of Physicians and a member of the Faculty of Dental Surgery of the Royal College of Surgeons of England.

Dr Gregory said: ‘I am tremendously excited by this award, it is always a great privilege for the work that you do and this is a really fitting ending to a wonderful few months.’
