ParaPost Taper Lux

Translucent Esthetic Post System

Coltène Whaledent

New from Coltène Whaledent, the latest addition to the prestiuous ParaPost range, ParaPost Taper Lux which has been specifically produced to provide the dentist with a post that fits closer into the canal with a crown-down greater taper file technique. This tapered post is better suited for narrow, thin root canals that require minimal amount of tooth structure removal during preparation of post space. The translucent fiber resin material in ParaPost Taper Lux eliminates shadows, transmits polymerization light for fast cementation and the unique rounded head design reduces stress points and locks in core material, also with retention ledges and tapered in apical third (.04) to match rotary tapered canal preparations. ParaPost Taper Lux is radiopaque, readily removed and adheres to standard ParaPost sizes in a colour-coded system.

For further information call free phone 0800 295454 ext 227224 or visit our website www.coltenewhaledent.com ■

Simplify Your RCT with R&S from Dental Sky

Simplify Your RCT with R&S from Dental Sky

The R&S range of endodontic instruments are market leaders in Europe and with Dental Sky as the exclusive UK distributors they are sure to be a success in this country.

Being high quality, R&S en- dontic instruments bring re-liability to all of your endodontic work. The useful R&S Endoac- cess Nickel-titanium instru- ments provide easy access by widening the coronal third. With a non-cutting tip to avoid damage to the canal R&S Endoac- cess Nickel-titanium in- struments help to simplify the introduction of endodontic instru- ments. R&S Cat Files have been shown to be stronger and more flexible than regular K-files due to the square cross-section of the instrument. These stainless steel files can slide smoothly through the canal es- tablishing a glide path in the canal for successive shaping.

The 21mm R&S Nerve Broaches are available in a range of sizes from 15-60 in pack of 12 instruments; all colour co-ordinated to allow for easy identification.

To see the full range of R&S Endodontic Instruments or further information please call Dental Sky on 0800 294 4700. ■

Quality Endodontic Distributors Ltd

NEW HotShot™ Cordless Backfill Obturation Delivery Device

QED are pleased to an- nounce that they have become the sole UK distributors for the NEW HotShot™ Cordless Backfill Obturation Delivery Device.

The NEW HotShot™ enables fast and easy delivery of warm obturation material for the endodontic backfill technique, fa- cilitating rapid obturation of even the most difficult root canals more completely, in less time, and with less patient dis- comfort.

The HotShot™ is cordless, compact and easy to handle. It features variable temperature settings which allow Practition- ers to control the flow charac- teristics of the material; a rechargeable lithium ion battery which will support hours of use from a single charge; and a choice of needle size 25g and 25g with a 3600 swivel for im- proved access.

For further information telephone Quality Endodontic Dis- tributors Ltd on 01755 404999, email sales@qedendo.co.uk, fax 01755 561254 visit www.qedendo.co.uk or contact your lo- cal QED Salesperson. ■

Accuracy Meets Control

accuracy and control. By us- ing NSK’s iPex digital apex loca- tor you get all the information at a glance to be able to do exactly that.

The revolutionary iPex of- fers a major advancement over traditional methods, by en- abling you to accurately meas- ure the length of the root canal in all conditions, including dry, wet and even during irrigation. It can automatically selecting the best possible frequency to suit the prevailing clinical condition. iPex makes a significant con- tribution to safer interventions and patient comfort.

Predictability is assured with iPex’s large LCD display and audio signal. Offering you clear visibility and simple oper- ation at all times, iPex instantly provides accurate information for safer, more precise root canals.

Using this reliable apex loc- ator can increase your confi- dence when performing com- plex endodontic treatments, helping you offer patients the definitive clinical result.

To experience the world’s most advanced digital en- dontodic treatment solution please contact Jane White at NSK on 0800 054 1809 or your preferred dental supplier.

QED are pleased to an- nounce that they have become the sole UK distributors for the NEW LightSpeed™ & SimpliFill® The perfect combination

QED are pleased to an- nounce that we have become the sole UK distributors for the NEW LightSpeed™ and Simpli- Fill® products.

The NEW LightSpeed LSX™ instrumentation system is the only endodontic instrument de- signed to create canal prepara- tions that are Biologically Opti- mal, unlike tapered endodontic instruments which may cut in- discriminately, LSX™ instru- ments only cut where they need to cut.

The New SimpliFill® Obruta- tion Delivery Device is the only carrier-based obturation sys- tem that features a removable carrier, leaving nothing in the canal except for the obturation material. Other systems which leave the carrier behind may re- sult in difficulty placing posts or retreatment. With a simple twist the SimpliFill® carrier is re- moved leaving an Apical Plug securely in place.

SimpliFill® plugs and LSX™ preparations are a natural fit.

No other system can prepare the canal so accurately and provide so perfect a matching plug obtu- rator.

Switch to Sterile files now!

DENTSPLY Maillefer are now providing all their trusted brands of both stainless steel and Nickel titanium files, pre- sterilised at no added extra cost to you

For dentists looking to pro- vide the highest quality en- dontics, the NEW pre-steri- lised files DENTSPLY Maillefer are a MUST!

You have an innovative cross section which is an “ap- proximate equilateral spherical triangle”. This convex triangular cross-section allows more free space for debris removal. Whilst retaining its core strength, it also allows excellent flexibility and maintains a perfect cutting edge.

Pre-sterilised K and H Type SteriFiles® are sterilised by gamma irradiation and individ- ually blister packed. They are fabricated from high-grade stainless steel, which maximises both flexibility and strength. The K Type file features an enhanced non-cutting tip, they are the first choice for preparing curved and narrow canals.
