A PREDICTABLE APPROACH TO AESTHETIC DENTISTRY

Dr IAN BUCKLE

Excellence in aesthetic restorations can be achieved simply and predictably when you know what to do and how to do it. Following the Four Steps to Predictable Aesthetic Dentistry coupled with a clear understanding of the aesthetic and functional goals we wish to achieve will lead to beautiful, comfortable, long-lasting restorations. This in turn results in an efficient, productive Practice with decreased stress for all.

The fee per delegate is £345 and qualifies for 6.5 hours CPD.

Kodak Dental Systems -
Logicon Caries Detector Software Challenge

Surface 4D – Logicon indicates caries penetrating into dentin that should be restored. Picture below taken during restoration confirms decay was already developing in the dentin (brown spot).

If you would like a demonstration of Logicon Software and to find out how you can obtain Logicon, contact Ernesto Jacomelli at Carestream Health, Inc. on 07764 351716 (free Line) or e-mail ernesto.jaconelli@cshdental.com.

Interested in computers? Looking for a change?

Logicon Caries Detector Software Challenge

JFT Dental Products Ltd is seeking a CAD draughtsman to assist in preparing computer materials for diagnostic, graft and surgical models. Those are custom made for each patient starting from a CT scan. Your job will be to liaise with customer to optimise the model scope, need and manufacturer’s patient database, generate virtual images and 3D views, and create custom printed film for automatic guide production. Knowledge of computer restorations, including implants is essential, but no hands-on skills need to be required.

For further information and to request a brochure/registration form, please contact:

07721 622765 or 01792 510112
