Endodontics

The simple way to faster, more effective surgery
Ash® Rubber Dam

The advantages of using an Ash® Rubber Dam are numerous, and the X-Smart Dual from DENTSPLY can greatly contribute to success in endodontic treatments.

When properly in place, an Ash® Rubber Dam provides clinicians with a clean, dry work field. Complete moisture control helps improve visibility and prevents salivary contamination, thus protecting the preparation area from re-infection.

Patient safety remains at the forefront for DENTSPLY. The use of an Ash® Rubber Dam assists with this greatly, as it protects the patient against the accidental inhalation of an instrument or material. A relaxed patient is likely to allow better access to the mouth, meaning that procedures can be carried out effectively and efficiently.

The Ash® Rubber Dam from DENTSPLY helps simplify endodontic procedures, offering a more efficient service for both practitioners and patients.

The R&S range of endodontic instruments are market leaders across Europe and with Dental Sky as the exclusive UK distributors they are sure to be a success in the UK.

The latest addition to the range is the new CMA nickel-titanium rotary file system. The CMA System was designed specifically for endodontic treatments by minimizing the number of instruments necessary and providing one uncomplicated sequence for both treatment and retreatment.

CMA weighs for Crown, Medial and Apical A2 to enlarge the apical portion of the canal.

CMA provides safe, secure and reliable rotary instruments with several unique design features including a shorter handpiece to ease access to molars and a helical shape to aid removal of debris from the canal. CMA instruments also have a cross-section with 3 cutting angles for excellent cutting efficiency and feature a non-cutting tip to ensure the instruments respect the integrity of the root canal.

CMA files are available in starter kits in 21mm or 25mm or in refill packs of 6.

To download the full CMA product brochure and view a demonstration video please visit www.dentalsky.co.uk or for further information please contact Dental Sky on 0800 204 4700.

Dealing with dental phobia is a surprisingly common, yet usually completely unspoken about concern. Some sufferers cope by avoiding the dentists’ surgery. Others try to tough it out and, many report that they do not realize that their condition is not only recognised, but can be treated.

Currently the highest rated site on google.com for the key phrase “Dental Phobia” is the website offers features including patient case studies, Q and A boards for discussion and detailed explanations of the most common dental procedures. Dentsplyhol.co.uk also offers an extensive directory of Dental Phobia-Certified practitioners across the country. This extensive database helps clients find a dentist who understands their fear and can offer the level of care and sympathy that they need. Promoting the fact that a practice is understanding, and offers a tailored service for nervous patients will not only improve client relationships, but also encourage nervous patients to face up to their oral health, and help them conquer their fears. For more information about Dental Phobia Certification or to find out how to qualify for placement on the dental phobia directory, visit www.dentisphyco.co.uk.

DENTSPLY listens to Professor Steele

Practitioners have always shared the belief that prevention is better than cure, and DENTSPLY listens to Professor Steele. Some sufferers cope by avoiding the dentists’ surgery. Others try to tough it out and, many report that they do not realize that their condition is not only recognised, but can be treated. The Castron™ ultrasonic scaler is number one in the market for a reason; it effectively removes subgingival biofilm to help towards improving periodontal health. The Castron Plus is used with a variety of inserts, including the new Castron™ Thintip for subgingival root surface debridement, to the Castron™ Softtip™ insert, which allows comprehensive scaling around titanium implants.

Professor Crispian Scully is one of the most prolific authors in Dentistry and a member of the Society of Authors and Royal Society of Medicine Prize in 2004. The first edition of the textbook won the New Authored Book Award from the British Medical Association (BMA) has awarded a highly commended certificate to Professor Crispian Scully CBE.

The BMA annual competition awards prizes in 24 categories and aims to encourage and reward excellence in medical publishing. Oral and Maxillofacial Medicine was commended in the Medical Book category. The UCL Eastman Dental Institute is also committed to providing access to lifelong learning through a wide range of flexible learning Certificate, Diplomas and Master programmes. For more details about the UCL Eastman Dental Institute, please visit www.eastman.ucl.ac.uk or telephone 020 7915 1059

DENTSYL Ultrasonic Scalers: One Tip – One Clinical Indication

Developed with the input and reviewed by distinguished dental professionals, the Thintip has received much support already. Testimonials received include: "I can’t believe how well I could access areas that were almost impossible to reach before. Excellent adaption to furcal and in-furcations. I love it! I want it now one!" The new Thintip is available to purchase from your dental supplier. For more information, please call telephone +44 (0)800 072 3313 or visit www.dentspy.co.uk

DENTSPLY Castron Thintip

Recently developed and launched in the UK with phenomenal success, DENTSPLY’s world leaders in scaling instruments, are now available in the UK. Exclusively designed for the new Castron™ Thintip™ to the UK, 10th tip a diameter 40% thinner than the existing Slimline insert, this new tip allows excellent access in all areas, superior biofilm removal and greater patient comfort.

The insert works with all 30K Castron ultrasonic scaler to reach inter-proximal surfaces, concavities and concavities in the right tissue attachment, without losing the tactile sensation you rely upon.

Developed with the input and reviewed by distinguished dental professionals, the Thintip has received much support already. Testimonials received include: "I can’t believe how well I could access areas that were almost impossible to reach before. Excellent adaption to furcal and in-furcations. I love it! DENTSPLY Cavitron™ Softtip™

Designed with a quick onset of just 30 seconds and a relatively short duration (20 minutes), it is both quick for the practitioner and patient. Developed in conjunction with some of the world’s leading endodontic specialists, the Start-X™ range of five ultrasonic tips offers users a high level of workflow precision and an incredibly simple approach to the canal.

Based on the simple concept of ONE TIP – ONE CLINICAL INDICATION, each tip in the range offers practitioners a different benefit. Start-X™ Tip 1 refines the access cavity by removing restorations, calculus and dentine from the access cavity walls. Start-X™ Tip 3 removes calcified debris from the pulpal or from the root canal coronal third. Start-X™ Tip 4 will remove screw or cast metal posts.

Start-X™ tips from DENTSPLY simplify the most popular endodontic procedures, offering a more efficient service for both practitioners and patients. For more information, or to book an appointment with your local DENTSPLY Product Specialist, call 0800 072 3313 or visit www.dentspy.co.uk

DENTSYL Inventory Circle

Inventory Circle is the place for you to find dental supplies and equipment at greatly reduced prices. Inventory Circle is the place to go for dental practitioners with little or no previous experience in conscious sedation, as well as those wanting to update their knowledge and skills.

The emphasis of the course is to equip clinicians with the knowledge, skills, and confidence to provide effective and safe sedation for their patients. The speakers are all leaders in their field with a practical knowledge of how to approach the topic. To be covered include:

- Patient assessment and clinical examination
- Behavioural management techniques
- Treatment planning and post management
- Prevention and management of sedation complications
- Basic life support – resuscitation and medical emergencies
- Pharmacology of sedation

For more information, please contact the Course Administration Team on 020 7945 1214 or email cpa@eastman.ucl.ac.uk

DENTSPLY End of Line Supplies

End of line supplies are referred to in the industry. He began on the engineering side, overseas installations and service, and then went on to manage the company for a few years before he sold the business in 1990.

Ian has gained a wealth of experience in almost thirty years in the dental industry. He began on the engineering side, overseeing installations and service, and then went on to manage the company for a few years before he sold the business in 1990.

DENTSPLY Product Specialist, call 0800 072 3313 or visit www.dentspy.co.uk

More and more dental practices are using their products every week! Inventory Circle is the place to find for dental supplies and equipment at greatly reduced prices. DENTSPLY Inventory Circle

www.inventorycircle.com

The newest high specification facilities include a comprehensive training suite and dental skills training room, equipped with 26 state of the art clinical simulation units. Practitioners’ clinical skills will greatly benefit from the availability of this equipment.

Dr Jackson stressed the importance of maintaining high standards and discussed the meeting challenges faced by modern dentists today. Focused points included gaining an approach to the best quality of composite resin and methods-used to achieve life-like restorations.

Participants had the opportunity to use some of the products in the holistic Vivotrel range including the new, IPS Empress Direct composite system.

Further specialist seminars will be held nationally throughout 2010, the next one being with X-Treme Approach; with Oliver Bros at the Guildhall, Bath, 11th February. As places get reserved quickly it is advised to book holistic Vivotrel direct on 0114 284 7800 to confirm your attendance.

Dentomycin: The Best Adjunctive Treatment for Periodontal Disease
Available from Blackwell Supplies, Dentomycin is a periodontal gel that effectively reduces pocket depth and bacteria levels while actively promoting periodontal healing. The gel contains 2% Miconazole, an antifungal, well known for its ability to eliminate key periodontal pathogens.

Used in conjunction with scaling and root planing (SRP), Dentomycin achieves a marked reduction in bacteria in patients with periodontal disease. It has a positive anti-inflammatory action, which promotes connective tissue attachment. Dentomycin binds to the tooth surface and is released slowly, attacking the bacteria. Clinical studies have shown that Dentomycin treatment reduces the bacteria that cause periodontitis and reduces the depth of treated pockets. These changes indicate an improvement in gum health.

Dentomycin is supplied in easy to use, pre-filled applicators that allow the delivery of the gel directly into the periodontal pocket for immediate effect.

For more information please call John Jeseph of Blackwell Supplies on 020 7224 1677, fax 020 7224 1694 or email john.jeseph@blackwellsupplies.co.uk

A brighter future: Whitening buck’s the recession

Despite the recession there appears to be a burgeoning rise in patient demand for tooth whitening. A recent survey conducted by market research group Mintel identified that patients consider the look of their teeth as one of the biggest priorities.

Quoted by white

Philips has for the first time explained the benefits of HealthyWhite to patients through its ‘Patient Profiles’ information cards and fact sheets which have been created to help Dental Professionals communicate more effectively with their patients.

If you would like more information about HealthyWhite or would like to use the ‘Patient Profiles’ material, please visit www.canzone.co.uk or call 0800 057 222

Superior Sterilisation – SpectraM6
A leading infection control solutions provider, Yrfs Dental delivers dental professionals with advanced autoclaves and washer disinfectors, fully compliant to HTM 01-05 guidelines.

Yrfs’ groundbreaking SpectraM6 autoclave features:
• True Air Detection System – User executed test cycle, a predetermined volume of air can be detected and exit chamber during sterilising phase.
• Redundancy Engineered Independent Cycle Validation System – Dual independent temperature and pressure sensors give optimum cycle reliability and performance.
• Safety and Sensing Systems – System sensor, automatic temperature resetting and pressure cut out systems operate to rapidly heat and cool sterlisation areas that require user attention.
• Fully Rechargeable Batteries – Easy to remove large onboard waste tank, cooling system ensures waste is cooled to a safe temperature.

A unique chamber filling system with volumetric water dosing, fast and economic chamber filling, and SpectraM6 stackable design enables two machines to be safely mounted and operated one after the other without additional filtration.

For more information, or for a FREE compliance survey, please call Yrfs on 0845 241 5776 or email info@yrfsdental.com
www.yrfsdental.com

Flexible® – Get your hands on the most successful instruments

Ergonomically designed with soft-grip silicone handles, Flexible® hand instruments fit perfectly in your hand. With a wide grip at the working end and a narrow centre, the design helps stop hand fatigue and prevent ‘pinching’ of the handle, thus improving grip and rotational control.

Flexible® tips are replaceable, so should one break or be over sharpened, they can be easily replaced.

The complete range of DENTSPLY Flexible® products are guaranteed to simplify instrument set-up and help provide a more efficient service for both practitioners and patients.

For a limited time DENTSPLY is offering a promotion on Flexible® hand instruments: buy 5 and get 1 free (copy incentive to DENTSPLY please see web site for address).

The whole range is available to view online at www.dentsply.co.uk, or for further information, book an appointment with your local DENTSPLY Product Specialist by calling 0800 072 5553.
