No Pain is your gain!

Over 9.5 million working days are lost annually in the UK due to back problems and most of these could be saved by sitting in a better position more of the time.

Sitting in comfort whilst working is easy to achieve with the ergonomically designed Dynamo Seat and In-Charge stools from Evident. These wonderful stools automatically correct your seating position, providing the perfect balance, maximum support and comfort, ensuring you work in comfort all day long.

We are so confident you’ll benefit from sitting on a Dynamo Seat or In-Charge stool; we’re offering a Free 2 week in-practice trial, so you can see for yourself the fantastic benefits of sitting comfortably.

The Dynamo Seat and In-Charge stools will also have an impact on your practice as they are available in a variety of styles and colours, however they won’t have an impact on your bank balance as they are remarkable value for money.

To sit in comfort everyday, please contact Evident on FreeCall 0800 321111 or visit www.evident.co.uk

Support Chairs

Ergonomically designed for optimum comfort!

Maintaining a correct posture is essential for operator efficiency, comfort and health. This is particularly important during procedures, where the clinician spends long periods bent over a patient. Poor posture can result in back pain, a problem that haunts many Dentists causing discomfort, reduced working hours and sometimes early retirement.

Support Chairs’ Support Stools have been developed for professionals working in sedentary positions, where both body support and the ability to move freely are essential. The seat and back of the Support Stool is designed to take the weight off the incumbent’s back and provide maximum comfort.

Each seat is manufactured to order so that they meet all the incumbent’s needs including specific requirements on colours and materials.

Support Stools are now also available with a new Swing and Swing Mini Armrest.

For further information contact your regular Dental Dealer or Support Chairs on 01296 581764, fax 01296 586585, email sales@support-stool.co.uk or visit www.supportstool.co.uk.

CEREC – Perfect Crowns A Reality

CEREC from Sirona Dental Systems enables practitioners to use a high-tech yet simple to operate device to produce all-ceramic restorations in a single surgery visit, without the need for impressions or temporary.

In recent years the advent of the CEREC crown software has improved the quality of treatment for patients, and enhanced the efficiency of the modern dental practice.

In addition to inlays, onlays and veneers, the crown software fully automates the process of making perfectly fitting, highly aesthetic crowns, with excellent compressive and tensile strengths. CEREC prostheses are almost undetectable in the mouth due to the perfect life like appearance.

The remarkable CEREC technology offers the very best in clinical excellence making dentistry a more enjoyable experience for the practitioner and patients alike. What’s more, patients love CEREC too!

For further information please contact Sirona Dental Systems on 0845 071 5040 or e-mail info@sironadental.co.uk.

Ergonomic Surgery Considerations and Design

If you are planning a surgery refurbishment, or are looking to expand your treatment room – consider A-dec and their extensive network of Equipment Specialists. With a level of experience that generates over 400 surgery designs in the UK every year, you can guarantee you’re in safe hands.

As a typical dental surgery in the UK is expected to be in service for around 114 years (on current replacement cycles), at A-dec we recognise there is much more to your refurbishment than just choosing a line of quality equipment, the ergonomic operating and design of a dental surgery should also be carefully considered and applied.

A-dec’s professional, highly trained, Equipment Specialists are available to visit your practice well in advance of the project commencing to listen to your needs and share in your vision.

For more information about the A-dec product line or to discuss your project ideas contact A-dec today;
Freefone: 0800 255285
Tel: 024 7655 0901
E-mail: info@a-dec.co.uk

Heka Dental … … you’re in safe hands!

Heka Dental’s UNIC is distributed in the UK by Dental Services Direct.

Ergonomically designed, it has a narrow back rest so that the operator can sit up straight in the most comfortable and ergonomically efficient way, with a clear view of the operating site.

Likewise the instrument arm is very easily moved with the lightest of touches, yet it stays exactly where you want it.

Finally the patented round foot control offers 360° flexibility because it can be activated from any direction with either right or left foot. This frees the operator from requiring a fixed working position. It can be used to regulate the speed and torque of instruments, adjust spray functions, activate the powerful chip-blow facility, reverse the micromotor direction, activate the operating light or call the assistant.

For further information on these or any other exciting products simply contact your local sales office: Scotland and the North: 08452 600510 South: 08452 600520 South West: 08452 600550

Designed with you in Mind

Your comfort is of primary importance when performing clinical procedures. With this in mind, NSK have designed the Ti-Max X Series to deliver an unrivalled combination of comfort and performance.

Prolonged, repetitive use of your handpiece can put increased strain on the hand and wrist, causing discomfort and ultimately affecting your performance and compromising your ability to deliver the best clinical results for your patients.

Ergonomically designed, the Ti-Max X Series boasts an extremely lightweight Titanium body which is on average 50% lighter than the equivalent stainless steel version.

Making an important contribution to the overall success of your practice, the Ti-Max X Series demonstrates the highest levels of excellence in comfort and design, making procedures easier and stress-free for the benefit of you and your patients.

To start practicing in comfort, please contact Jane White at NSK on 0800 654 1909 or your preferred dental supplier.

Is Your Spine S-Shaped?

A high proportion of dental surgeons suffer from back, neck and/or shoulder pain at some time during their working lives and this has been shown to be the most common cause of early retirement in the UK.

One of the most effective ways to prevent such musculoskeletal problems is to maintain the normal spinal curves when seated. The correct seating position using the Bambach Saddle Seat can alleviate many of the problems associated with muscle fatigue by encouraging an improved sitting posture.

The Bambach Saddle Seat helps to align the spine whilst maintaining the natural s-shape thus preventing the discs from being put under pressure. The hips are kept at the optimum angle of 45° to the spine so back and thigh muscles are at their most relaxed.
