The extra softness of the putty displaces less soft tissue and wash from Hydrosystem reduces the surface tension on the preparation, therefore increasing the occlusal integrity of the impression. The impression material can be poured into the impression tray and set in place by sliding it on an applicator and at a speed prior to applying silicon around the preparation e.g. a Wash–light body (or Monophase) impression body. A study by Brian J. Miller from Kings College Dental Institute found Hydrosystem halved the number of surface defects on impressions. Hydrosystem comes in a 10ml bottle with 10 applicators and is priced at only £8. Call 0870 600811 or email uk@zhermack.com.

Alghamix II comes with a 3 year day dimensional stability for those who prefer slightly longer working time. This alginate provides extra fast, accurate and economical dimensional stability for those for orthodontics, this berry scented putty has a lilac coloured medium bodied material comes in standard 50ml cartridges or 380ml hard cartridges for automatic mixing machines. The Algahmix II puts you at the forefront in the dental industry.

AFFINIS system 360 putty offers an incredible alginate experience. This new category in composite technology minimizes the need for a separate bonding application step with composites for direct restorative procedures. Powered by Kerr’s renowned Optibond adhesive technology, this product will greatly simplify the bonding procedure for today’s time-challenged dentist by incorporating the bonding agent into the flowable.

Hydrosystem
Hydrosystem is a proven solution for reducing voids in silicone impressions. Hydrosystem reduces the surface tension on the preparation, therefore increasing the occlusal integrity of the impression. The impression material can be poured into the impression tray and set in place by sliding it on an applicator and at a speed prior to applying silicon around the preparation e.g. a Wash–light body (or Monophase) impression body. A study by Brian J. Miller from Kings College Dental Institute found Hydrosystem halved the number of surface defects on impressions. Hydrosystem comes in a 10ml bottle with 10 applicators and is priced at only £8. Call 0870 600811 or email uk@zhermack.com.

Talking Points in Dentistry Celebrates 25 Years with 3 Very Special Speakers

Since 1985, the dental industry has been treated to an annual event which has become a firm fixture in the calendar of the dental world. The Talking Points in Dentistry conference is the biggest and most influential event of its kind, and is now celebrating its silver jubilee this year.

First introduced in 1985, Talking Points was designed to provide topical and thought provoking lectures for the whole dental team. Over the last 25 years more than 50 industry experts and professionals have delivered these lectures with audiences exceeding 4000 dental healthcare professionals each year.

To celebrate the anniversary Talking Points will this year showcase 3 respected experts, Roy Wigram, Mike Waddell and John Tisman.

The events will take place in 9 venues across the UK during May and for full details on all the shows visit www.dentalline.co.uk or call Rachael Squires on 0870 735 5385.

Talking Points in Dentistry is free to attend and offers verifiable CPD for the whole practice team.
