Building on CEREC success.

The chairside CEREC 3D CAD/CAM system couldn’t be simpler. After taking an optical impression of the preparation and the antagonist, you are in complete control of the finished product. The accuracy of the impres- sions of the margins and the proximal contacts. From there on the CEREC system fabricates the crown, inlay, onlay or veneer. The system allows you to place the new prosthesis in the same visit saving you and your patient valuable time, laboratory fees and ultimately making your business more profitable.

Gum Strengthening toothpaste contains ingredients that help reduce and stop bleeding gums and that promote healthy growth of the gums issues. Beverly Hills Formula Dentist’s Choice has been formulated based on extensive research, aiming to incorporate all the ingredients and benefits dentists’ wanted to see in a premium toothpaste. The result: teeth that appear whiter, feel smoother and remain cleaner.

UCL Eastman CPD Course in Sports Dentistry

The Eastman’s Sports Dentistry course is aimed at dental practitioners with an active interest in sports and offers excellent training.

Delivered through lectures, seminars and clinical sessions, this nine day course spread over several months will include:

• Healing of hard and soft tissues to include suturing
• The recognition of neurological injury
• Stress and TMD dysfunction
• Tooth surface loss and the relationship with sporting activity

As well as the dental and maxillo-facial subjects covered, there will be lectures and demonstrations on the following topics:

• Sports psychology
• Psychology of sports injury
• Diet and nutrition
• Therapeutics and drugs in sport
• Medico-legal aspects of dental injuries

At the end of the course participants will be able to take an active role in the health care of sports people and advise team doctors, physical therapists and dieticians accordingly.

For further information or to register for September 2009, please contact the Programme Admin- istrator on 020 7905 1272, email cpd@eastman.ucl.ac.uk or visit www.eastman.ucl.ac.uk/cpd

Banish Tooth Whitening Sensitivity

Sensitivity is often an issue associated with Tooth Whitening, which applies to both home and power (surgery) whitening procedures.

GC has introduced Tooth Mousse that is the perfect ad- junct to your usual tooth whitening treatments. Apply immediately after tooth whitening to reduce and stop bleeding gums caused by dehydration in the surgery or to provide your patients with a tube to take home with their home whitening kit.

When CFP-ACP is applied to the tooth surfaces, it binds to biofilms, plaque, bacteria, hydroxyapatite and surrounding soft tissue localising bio-avail- able calcium and phosphate.

Saliva also enhances the effec- tiveness of CFP-ACP and the flavour of the tooth mouse helps to stimulate saliva flow. The longer CFP-ACP is main- tained in the mouth, the more effective the result.

There is a wide range of ben- efits for GC Tooth Mousse. It can be used to provide protection for teeth and to help neutralise an acidic oral environment.

For further information please contact GC UK on (0044) 1908 218999 or e-mail info@uk.gceurope.com

Are You Sitting Comfortably?

Introduce leading cutting-edge technology into your prac- tice with KaVo and see fantastic results.

The KaVo ESTETICA E80 is a suspended chair that gives the patient and dental exceptional freedom of movement. The area under the unit is completely open for the dentist and assis- tant; there is plenty of room for comfortable leg positioning.

The ESTETICA E80 takes your health into consideration as the individual working positions and habits ensures that your pos- ture is constantly healthy, stress- free and relaxed.

The Primus 105S is designed to offer all the quality and tech- nology advantages of a kaVo unit, with the added benefit of working flexibility. It also offers a number of new features in- cluding the Memos speed system, the Memospeed and multifunction foot control and all for highly competitive prices.

For further information, please contact KaVo at 01494 755 000, email: sales@kavo.com or visit www.kavo.com.

Going for Gold!

2009 sees Takara Belmont cele- brate the golden jubilee of their UK business and this auspicious occasion is the perfect opportu- nity to reflect on the last fifty years.

The pursuit of the twin objectives of health and comfort are what a lot of us will follow in our per- sonal lives, and Takara Belmont extends this to the workplace with their customary enthusiasm, vigour and high ethical standards. Their products are de- signed and delivered to ensure we move towards healthier lifestyles in a more comfortable environment. Takara Belmont, through their excellence in this sphere, have been at the fore- front of change and this has en- abled them to provide customers with the most up to date and in- novative products in the market.

In short, the provision of high quality, reliable products coupled with excellent service lev- els means customers can look forward with confidence to more happy returns in the next fifty years.

A new course on applied occlusion and progressive splint therapy

S4S Dental Ltd are pleased to announce a new course for 2009. Called “Applied Occlusion and Progressive Splint Therapy for Predictable Dentistry”, the six hour seminar will be presented by Dr Helen Harrison a GDP with extensive experience working with occlusal splints. To date over five hundred patients have been treated with occlusal splints in Dr Harrison’s practice and the course will cover both com- plex and routine dental care.

The in-depth seminar will cover temporomandibular function and anatomy, diagnosis and treatment planning, principles of progressive splint therapy – relief of pain and sta- bilisation and recommended next steps – options for defini-
Snappy Half Term Special Offer

Perfect Bleach

Homebleaching system for gentle and permanent tooth whitening.

Effective, permanent and gentle – with Perfect Bleach VOCO offers a bleaching gel which meets all requirements of modern tooth whitening. Whitening of vital teeth can be performed through ageing or deposits of discolours (e.g. from coffee, tea, red wine or nicotine), can be varied in a simple and effective manner. Simultaneous external and internal bleaching of endodontically treated teeth is also possible, as well as the treatment of tetracycline discolorations.

Conducted by Matt Everatt, technical director of S4S Dental, these sessions offer two hours verifiable CPD and the opportunity to understand how this split therapy can bring a useful revenue stream to the practice and provide effective pain relief for many patients.

The two hour course costs £40.00 and is being held on 19 March 2009 in London, 25 April 2009 in Glasgow and 25 June 2009 in Hertford.

To book your place please either call S4S Dental on 01455 401777 or visit www.S4Sdental.com.

Dentomycin: The Adjunctive Treatment for Chronic Adult Periodontitis

Dentomycin is clinically proven to reduce pocket depths by as much as 42% over 12 weeks when used in conjunction with scaling and root planing.

This adjunctive treatment for moderate to severe Chronic Adult Periodontal Disease does not interact with alcohol and is easily tolerated. Its pre-filled applicator enables direct application to the pocket base and makes it much easier to treat plaque and calculus in deep, irregular pockets and molar furcations. Key periodontal pathogens are significantly reduced following the application of Dentomycin in every 14 days for 5 or 4 applications1.
