Every year since 2002, Dental Tribune North America has conducted the "Student Clinicians of the American Dental Association (SCADA); Dr Linda Durning's research, entitled 'Analysis of a novel embryonic stem cell line exhibiting de novo promoter methylation of the metastasis suppressor gene p16' has been published in the International Journal of Cancer. This is the first of series of talks this year by Dr Winkler which will be supported by DENTSPLY. The THInsert™ insert is 40% slimmer than the Slimline inserts. It is able to access subgingival sites because of its right, left and straight angled tips. These tips allow excellent visibility and access throughout the oral cavity. The Slimline® range allows maximum success when subgingival scaling and root planing is being performed. Using a combination of these inserts with the THInsert™ allows for an effective treatment of keratinised and non-keratinised tissues. PracticeSafe disinfectant spray is alcohol based and when used correctly is able to provide a 4 log reduction of common oral pathogens including C. difficile, Pseudomonas and Staphylococcus. The kit is provide free to CODE members and is available to non-members as a stand-alone product for £150 (incl. VAT). Who purchase the kit have the opportunity to benefit from the savings of DMD membership and a reduced price by paying a further £195 to access the rest of 110 CODE modules without having to find the usual joining fee. For more information about the kit and watch videos at www.CODEnetwork.com/prevention

2010 DENTSPLY / BDA Student Clinician Programme

The 3rd DENTSPLY / BDA Student Clinician Programme Awards has been another successful event and an opportunity to celebrate the investment being made into the future of dentistry. DENTSPLY is the proud sponsor of this prestigious programme, which gives students a valuable opportunity to gain research experience in this field of dentistry.

The winning entry came from a student who is studying at Manchester Dental School. Lisa Durning, recipient of this award, embarked on a novel embryonic stem cell line exhibiting de novo promoter methylation of the metastasis suppressor gene p16. She said that her research will be of crucial importance as it could lead to the first use of any future adult tissues in transplant. Lisa Durning, President of the American Dental Association's Annual Conference. She also becomes a member of SCADA, an international association of student clinicians.

Both the BDA and DENTSPLY would like to extend their gratitude to the contributors made to the evening by Dr. Gareth Brock, President of the Student Clinicians of the American Dental Association (SCADA); Dr Linda Durning, DENTFLY's Vice President & Chief Clinical Officer; and Dr John Drummond, President of the BDA.

For more information, or to book an appointment with your local DENTSPLY Product Specialist, call 0800 072 3313 or visit www.dentsply.co.uk.

Another new ultra-invasive innovation from the UK’s leading manufacturer of resin flowable adhesives is its Carvex™ ultrasonic scaling brand, continue to lead the way in technology innovation. This latest THInsert™ was launched at the BDOCT 2005 Congress in London. As a result of this already extensive choice of magnetoreactive inserts available for practitioners, allowing them to provide the best care for their patients. The Slimline® range allows maximum success when subgingival scaling and root planing is being performed using a combination of these inserts with the THInsert™ allows for an effective treatment of keratinised and non-keratinised tissues. 1000th Aquacut Quattro Installed

Unlocking new patients with UA Performance Mouthwear®

Dental professionals can now help detail patients achieve the secret to peak performance. UA Performance Mouthwear® utilises patented technology that reduces pressure on the temporomandibular joint (TMJ). In turn, this inhibits the body’s excess production of cortisol, also known as ‘the stress hormone’. By wearing this revolutionary device, athletes and athletes and patients can benefit from greater focus, stamina and strength.

The mouthguard and non-contact sports versions are both custom-fit by a dental professional and UK Performance Mouthwear represents the potential for developing a new patient experience. For more information on how your patients can benefit from Under Armour Performance Mouthwear, call The Dental Directory free on 0800 585 586 or visit www.dental-directory.co.uk

Happy birthday Smile-on!

There was cause for celebration at the Smile-on headquarters, as January 2010 saw the 1000th Velopex installed, which marked an exciting milestone for the UK’s leading fluid abrasion practice management system.
