Masters at work

A state-of-the-art dental practice is building on its range of top-quality educational courses for dentists and dental health practitioners. Yvonne Gordon reports

Dr David Bloom and Dr Jay Padayachy are business partners at Senova Dental Studios, Watford, (formerly Bloomsbury Dental) which opened at new, stylish and hi-tech premises earlier this year with superb facilities, ideal for both practical dentistry and cutting-edge dental courses for dentists and dental health practitioners.

Senova has a large patient’s lounge area that doubles as a lecture theatre seating up to 45 delegates, as well as two rooms suitable for smaller seminars, perfect for lectures held on weekdays so that the practice doesn’t need to close.

For patients, there are nine dental studios including a dental operating theatre. The practice’s hi-tech equipment includes a Magnavu – a high-tec camera which can film in one studio and project into the lecture theatre.

Dr Bloom explains: ‘We use the Magnavu as a teaching aide and also as a video microscope. It even enables the practitioner to work off a TV screen.’

He continues: ‘All our facilities are located around a central sterilisation area, so everything is extremely accessible and absolutely ideal for both hands-on teaching sessions and lectures.’

Support is key

Dr Bloom and Dr Padayachy, who both have many years of teaching experience, are aided by Melonie Prebble, head of hygiene and co-director with Bloom and Padayachy of teaching company CO-OP.R8 Seminars, which offers a broad range of continuing education seminars on the premises, including bespoke training, hands-on clinical training and talks by internationally acclaimed speakers.

Specialised lectures and workshops include Hands-On Whitening programmes for dentists and dental health practitioners in May 2009 and the four-part, step-by-step, Aesthetic Hygiene Experience course, which runs from September to March. In addition, courses on Smile Design in September/October 2009 and Smile Make-Overs are offered, as well as a photography course in June by Peter Gordon and Facial Aesthetics run by Brian Franks, director of Facetec. The team also runs Implant Mentoring Programmes for Nobel Biocare and is planning, Hands-On Implant day courses. There are also Hands-On Occlusion levels I & II and Record-Taking courses which features Bo Bruce and Dave Newkirk, who also teach at the Dawson Academy and lectured recently at the BACD annual conference.

BACD past president

A graduate of the Newcastle-upon-Tyne Dental School, Dr Bloom, who has been a partner since 1990, is accredited by the British Academy for Cosmetic Dentistry (BACD) and is a past president of the organisation.

He says: ‘As members of the dental profession our passion lies in moving dentistry forwards. We believe that with our hands-on skills and knowledge we can assist like-minded dental professionals to reach their goals.’

‘My father was a dentist and we worked together for many years, so we worked together for many years, so we learned from each other and continued to develop our skills.’

Records for Excellence

Occlusal Registration and Blueprints to Success

25-26 April 2009

CO-OP.R8 Seminars Proudly Presents:

William ‘Bo’ Bruce, DMD
David R. Newkirk, DDS

“What MUST I have to treat plan aesthetic cases?”

This hands-on course is designed to answer that question. Knowing how to prepare and cement veneers is not enough to go forward with a comprehensive case. We must know what information and materials we need to put the puzzle together.

This course will give you the blueprints to any complex case in a simple and understandable way. You will learn not only the aesthetic requirements but also the functional necessities to the perfect case. Not required, but would be a real bonus if your dental assistant could attend with you.

This is a must take course for any dentist wanting to do more complex aesthetic and/or functional cases.

Course Synopsis

• Simple and easy way to master digital photography
• How to take the perfect centric relation bite and why
• How to use photography to treatment plan
• How to apply the principles of occlusion for longevity of your restorations
• How to take the perfect Centric Relation bite
• Why and how to take a face bow
• How to predict and easily verify a proper joint position
• How to diagnose a healthy joint from a problem joint
• How to verify mountings of all model work
• Pearls that will make every case 100% more predictable

14 hours of CPD

Instant Gratification for Denture Patients

Do Your Patients have denture problems?

IMTEC – world leader in Mini Dental Implants
Implant threads designed for different bone types
Four implant diameters to ensure best use of bone volume
Simple protocols and a cost effective solution for denture stabilisation

IMTEC Mini Dental Implant System

IMTEC’s Sendax MDI® Implant System offers a revolutionary one-hour, one-stage solution for long-term denture stabilization. This immediate loading mini dental implant system utilizes a patented, stopless placement protocol and works with the patient’s existing denture. The versatile MDI implant family includes the 1.8 and 2.1mm implants with standard thread design and the 2.4mm MAX thread for softer bone.

MDI Hybrid Implant
This one-piece implant enables placement with a procedure much like the Sendax MDI placement protocol. Using MDI fasteners, making it the most minimally invasive implant of its size.

One day Seminars: 8 hr CPD – Cover implant theory, patient selection, clinical protocols and instrumentation for MDI placement. Hands-on session of mock implant placement. £300.00
London: April 4, May 16, Sept 13, Oct 10, Nov 18
Manchester: June 27, Nov 21

One and a half day Surgical Hands on Seminars: 6hr CPD – Friday pm – theoretical aspects of MDI placement and case planning. Saturday all day – Hands-on live surgery and the opportunity for you to place implants, under supervision, either in a patient you bring along or a volunteer. £450.00
Smile Design dental Practice in Nantwich, Cheshire.
July 3 and Nov 13. More may be available

years. I started as an associate for a year in Gloucester before coming here and was a vocational trainer in the mid 90’s for three years. I love helping people improve their teeth from the cradle to the grave and enjoy enabling people to literally change their lives with both functional and aesthetic dentistry.

Making a difference
Also a Newcastle graduate, Dr Padayachy, who became a principal at the practice in 1998, adds: ‘I love the ability to make a difference through helping dental patients improve their teeth and I also enjoy the personal contact. Every month is completely different and presents a new challenge.

Dr Padayachy continues: ‘We moved practices because we outgrew our old building and it did not reflect the quality of what we were producing. The courses have been running for over three years with delegates giving us very positive feedback.

‘We regard ourselves as having one of the best dental facilities in the UK, because we provide lectures combined with state-of-the-art studios to provide hands-on programmes, which run seamlessly together. Location-wise, we are accessible nationwide with excellent rail and road links running from North to South and East to West.

‘Senova has a very well-established and loyal team and many of our dental patients and dental course delegates travel from a long distance for our services. We aim to become known as one of the best teaching facilities in the UK.’

A unique environment
The Senova team strives to make the dental practice unique by providing outstanding clinical skills, exceptional patient service, spa-like amenities, leading-edge dental technology, materials and equipment within a relaxed atmosphere. Depending on what is appropriate, patients can expect a personal CD or DVD player with music or film choices during treatment, aromatherapy oil fans, warm, scented neck pillows to ease comfort in the dental chair, paraffin hand-wax treatments and refreshments.
