Dentomycin: An Effective Adjuvantive Treatment for Periodontal Therapy

Dentomycin® Peridontal Gel from Blackwell Supplies is an effective treatment of moderate to severe chronic adult periodontal disease, when used in conjunction with scaling and root planing.

Supplied in easy to use, pre-filled applicators that allow the delivery of the gel directly into the periodontal pocket for immediate effect. Dentomycin binds to the tooth surface and is released slowly to attack the bacteria causing periodontal disease.

The combination of SRP and Dentomycin can reduce pocket depth by an average of 42% in just 12 weeks, whilst the anti-inflammatory effect and the inhibition of destructive collagenases helps promote connective tissue attachment.

Dentomycin Periodontal Gel from Blackwell supplies a cost effective and proven method of enhancing periodontal treatment.

Since keeping gums healthy is vital for our general health, Blackwell has created a leaflet offering advice and guidance about preventing and treating gum disease in ‘How healthy are my gums? - Help and advice on your oral care’ is available free to all practices and patients.

For more information please call John Jessop of Blackwell Supplies 0207 224 1457 or fax 0207 224 1694 or email john.jessop@blackwellsupplies.com

Helping patients and professionals deal with dental phobia

www.dentophobia.co.uk is a specialist website dedicated to helping nervous patients overcome their fear of the dentist.

The website offers information to patients and professionals about their Dental Phobia and how to manage anxiety about treatment. Currently under development is the ‘How to spot Dental Phobia’ page. Google for the key phrase ‘Dental Phobia’, the website offers many excellent articles in patients and stories, and the availability to ‘Ask an expert’.

Dentophobia.co.uk also offers patients a directory of dental phobia certified dentists. Dental phobia certification is a very rare case in the industry with only given to professionals who meet minimum criteria to ensure an excellent standard of service.

Understanding and offering a service to patients who suffer with dental phobia will enable patients’ access to better oral health treatments, and another reason to come to your practice. Promoting this that a practice is understanding and offers a tailored service for nervous patients will not only improve all patient-practice relationships, but also encourage nervous patients to face up to their oral health, and help them conquer their fear.

For more information about Dental Phobia Certification or for placement on the dental/phobia directory, visit www.dentophobia.co.uk

Another new ultrasonic insert innovation from the UK’s leading manufacturer

DENTSPLY with its Cavitron™ ultrasonic scaling brand, continues to lead the way in technology innovation. The Thermit® was launched at the BIDT 2009 and joins the already extensive choice of magnetic inserts and tips available to practitioners, allowing them to provide the best care for their patients.

The Slimline® range allows maximum success when subgingival scaling because of its right, left and angled tips. The Slimline® ‘S’ insert is the latest innovation of the Slimline inserts. It is able to remove bovines and debris from surfaces concavities and locations with tight spaces at the same time.

The Cavitron® ‘S’ Tip™ insert allows comprehensive scaling around titanium implants with high success rates when faced with an implant. DENTSPLY’s current offering on a promotion in Cavitron, buy any 4 and get 1 free (send a copy invoice to DENTSPLY - please see web site for address).

Why not try the new Thermit®!

For more information, or to book an appointment with your local DENTSPLY Product Specialist, call (+44) 0208 017 3113 or visit www.dentsply.co.uk

Genius turns great expectations into outstanding results

State of the art, striking interior create a positive impression and improve confidence in your patients. Genius™ acclaimed Design and Build programme captures the customer’s unique vision for their practice and makes it a reality by transforming it into a stylish, functional environment. Genius prides itself on its flexibility. Without being bound to a particular manufacturer it offers knowledgeable, independent advice to all clients and always gives the extra mile in support, knowledge and concern.

Worried about budgetary constraints? Genius® fosters a partnership-driven approach through its next Best Practice Workshops, designed to foster better communication and understanding, reducing troubling factors cost and implementing improvements. This has already produced project savings in the excess of 15%.

Using the very latest in computer-aided design and 3d software, accurate preview of the finished project improve clarity and avoid any misunderstanding.

For a tasting, email David Cawse on davidc@dentsplyuk.co.uk.

Kendent revives the Bio-Recycle,再次焕发生机

Practical Safes and Charcoal Heavy Duty and Economy series are now even better value for money! Dental Practices can save up to 25% by recyclying, reconditioning and reselling.

The new versatile range of Kendent series should be used with confidence to clean sensitive and non-sensitive surfaces within the treatment area and the decontamination area of a Dental Practice.

Practical hygiene duty and economy series, which contain alcohol, are suitable for non-sensitive surfaces and soft tissue.

Chamical heavy duty and economy series, which do not contain alcohol, are especially formulated to clean sensitive and non-sensitive soft tissue attachments without losing their alcohol content.

The Kodent® Safe Rinse™ is a high performance, versatile and synthetic face of dental chairs. The recent DOP®Inspect Decontamination Health and Technical Memorandum has made it clear that primary care dental practices recommends that dental chairs are cleaned between each patient. The Kodent® Safe Rinse™ is a non-disposable, non-drip and durable. It is gentle on the hands but above all, very effective against harmful bacteria.

For more information, or to order, please contact the following numbers.

Kodent are keen on colour, non-drip and durability. They are gentle on the hands but above all, very effective against harmful bacteria.

Inaugural Study Club Event

The British Academy of Cosmetic Dentistry is pleased and excited to announce the inaugural Liverpool Study Club Event.

Taking place on Wednesday 21st April 2010 at the New College, the event aims to represent the commitment the BACD has towards promoting excellence in inter-disciplinary treatment planning and the execution of complex treatments to consistently high standards.

The highest and final stage of the BACD’s Career Path in Cosmetic Dentistry, Fellowship is aimed at those seeking an advanced level who are also sharing their knowledge with the rest of the profession.

For those considering submitting cases for examination, the deadline is 7th October.

The Fellowship is open to accredited members who have either published a scientific article on a clinical subject related to cosmetic dentistry in a peer-reviewed publication, or have given a postgraduate lecture at BACD meeting or national / international conference.

Benefits of Fellowship status include use of the title ‘Fellow of the British Academy of Cosmetic Dentistry’ a plaque acknowledging the individual and recognition that will be superior to the Accreditation plaque, and use of the approved Fellow logo.

For more information contact the BACD on 0207 612 4166. Email info@bacd.com
Dental care is all about the patient and what is best for them. Professionals aim to make surgery as non-invasive and painless as possible. Recent advances in technology have led to more precise, patient-friendly, less invasive and aesthetic dental solutions, and are passionate about your practice and your patients. Revolutionary technologies such as NobelGuide® help practitioners care for the treatment you need, in the way you want.

NobelGuide® allows practitioners to precisely place minimally invasive surgical access and restorative crowns and bridges, as well as providing unparalleled precision in 3D planning. This technology offers huge benefits to the patient, allowing professionals to place an implant in just one visit, thus reducing treatment time and adding patient recovery. Treatment plans can be designed according to the highly complex anatomy of each individual patient - especially useful when treating patients with challenging conditions.

Nobel Biocare located teams are on hand to offer support and advice, and the rapidly growing sales team is ready to discuss solutions for all practice budgets.

For more information on NobelGuide®, contact Nobel Biocare on 01895 452 912, or visit www.nobelbiocare.co.uk
