To tackle the bacteria in the mouth, there is also Curasept toothpaste, containing 0.05% chlorhexidine and 0.05% fluoride. The Curasept range is specially formulated to clean sensitive surfaces and equipment, the leather and synthetic facings of dental chairs. The recent DOH report Decontamination and Sanitation of Primary Care Dental Wipe recommends that dental chairs are cleaned between each patient. The new versatile range of Kemdent wipes should be used with confidence. The Kemdent wipes are low odour, non-drip and durable. They are gentle on the skin and easy to use.

For more information about Dental Phobia Certification or for placement on the database, please contact info@bacd.com or visit www.dentalphobia.co.uk.

Weleda Lederma for Successful Periodontal Therapy

Lederma contains an active compound that is a highly effective anti-inflammatory corticosteroid to help prevent and treat destructive connective tissue attachment.

Dentomycin provides pain relief and promotes healing. This powerful gel is also effective in removing biofilms and debris from surfaces concavities and locations with tight junctions.

For more information please call John Jeffs of Blackwell Supplies on 0207 224 1457 or email john.jeffs@blackwellsupplies.co.uk

With Dental Phobia Certification and placement on the database, clients can consistently deliver high standards of care. In a recent survey, 97% of practitioners and patients who have used the certification gave it their full support.

It is an exciting launch of I-Bridge and I-Bridge 2. The new I-Bridge range is fully compatible with all major implant systems and available in three variants 1-Bridge, 1-Bridge 2 and 1-Bridge evolutions, dependent on the case.

Another new ultrasonic insert innovation from the UK’s leading manufacturer DENTIPLY with its Cantorm* ultrasonic scaling brand, continues to lead the way in technology innovation. The ThinRx* was launched at the BIDHT 2009 and joins the already extensive choice of magnetic, piezoelectric and other inserts available to practitioners, allowing them to provide the most effective, efficient and comfortable treatment.

In conclusion a combination of the I-Bridge Dental Paste and Carden-hardening for fast or slow setting. Lederma is excellent as an agent for covering poly, and can even be used as a temporary sub-linging for deep canals where no exposure has occurred.

The new range of Kemdent wipes should be used with confidence to clean sensitive and non-sensitive surfaces to maintain the treatment area and the decontamination area of a Dental Practice.

Genus turns great expectations into outstanding results

State of the art, striking exteriors create a positive impression and improve confidence in your practice. Gensae’s designed and Build programme captures the unique vision for three practice and make it a reality by transforming it into a stylish, functional environment. Gensae prides itself on its flexibility. Without being bound to a particular manufacturer it offers knowledgeable, independent advice to all clients and always gives the extra mile in knowledge and costs.

Concerned about budgetary constraints? Genus fosters a partnership-driven way to give rapid relief of pain associated with acute pulpal and periodontal disease. The Tetracycline (Hycline) cream is 40% Triamcinolone acetonide, a corticosteroid. Triamcinolone acetonide, a corticosteroid 50%

Yale Casefile Lederma for successful periodontal therapy. Lederma contains an active compound that is a highly effective anti-inflammatory corticosteroid to help prevent and treat destructive connective tissue attachment.

The highest and final stage of the BACD’s Career Path in Cosmetic Dentistry, Fellowship is aimed at those seeking an advanced level who are also sharing their knowledge with the rest of the profession.

For those considering submitting cases for examination, the deadline is 7 2010.

The Fellowship is open to accredited members who have either published a scientific article on a clinical subject related to cosmetic dentistry in a peer-reviewed publication, or have given a postgraduate lecture at BACD meeting or other national / international conference.

Benefits of Fellowship status include use of the title “Fellow of the British Academy of Cosmetic Dentistry” a plaque acknowledging excellence in inter-disciplinary treatment planning and the execution of complex treatments to consistently high standards.

For further information or to register, please contact the Endodontic Courses Administrator on 0207 724 1457 or for more information please call John Jeffs of Blackwell Supplies on 0207 224 1457 or email info@bacd.com.
Dentists targeted by HM Revenue & Customs

Getting the practice and personal financial affairs in order is a priority for dental practices. Lansdell & Rose’s team of experts can assist.

Dentists targeted by HM Revenue & Customs

Adequate preparation of the access cavity is a critical early step in many root canal surgeries. Poor access can lead to missed canals, a high rate of treatment failure and patient discomfort.

The comprehensive package of services is tailored to the specific needs and aspirations of each professional who wishes to build a profitable business that delivers value to its owner.

For more information please visit www.lansdellrose.co.uk or call Lansdell & Rose on 020 7365 9132.

DENTSPHY Endodontic Procedural Team – Raising the success of root canal treatment

Since the fundamental goal of endodontic treatment is the elimination of bacteria from the tooth and treating the disease process, starting with the placement of Ah!™ Rubber Dam prevents or contamination from saliva during the procedure.

Adequate preparation of the access cavity is a critical early step in many root canal surgeries. Poor access can lead to missed canals, a high rate of treatment failure and patient discomfort.

The Ray-Pen™ 5 apex locator is indispensable for length control where radiographs are otherwise not available as a reference.

Since the advent of Nickel Titanium files, instrumentation has become quicker and easier. DENTSPLY’s ProTaper® (Universal rotary and hand files, chosen by most dental professionals, permit the rapid and safe shaping of root canals. To give your patients the best possible endodontic treatment from isolation to obturation, choose DENTSPLY quality at every step.
