**Inaugural Study Club Event**

The British Academy of Cosmetic Dentistry is pleased and excited to announce the inaugural Liverpool Study Club Event.

Taking place on Wednesday 21st April 2010 at the New Royal Liverpool Hospital, the event features a Practitioner to Practitioner panel, which represents the commitment the BACD has towards promoting excellence in the field of cosmetic dentistry in the UK.

The lecture, entitled 'Aesthetics and Function: An unbreakable bond', aims to provide attendees with a structured method for effective diagnostic treatment planning.

Dr Ian Buckle, a worldwide-renowned expert in the field of aesthetic dentistry, will be sharing insights from his 10 Steps to Predictable Aesthetics and Function to provide practitioners with the knowledge to tackle the bacteria in the mouth.

Supplied in easy to use, pre-filled applicators that allow the delivery of the gel directly into the mouth, Curasept Gel is an effective way to manage pain and achieve immediate effect.

Dentomyc is available exclusively in the UK through BioHorizons. For further information please call John Jeffery on 020 7224 1457 or visit www.dentomyc.co.uk.

For more information please call 0207 612 4166 or email info@dentalphobia.co.uk.

---

**The British Academy of Cosmetic Dentistry (BACD) is committed to promoting clinical excellence through education and professional development.**

- **Practitioners** with advanced levels of knowledge are also sharing their knowledge with the rest of the profession.
- "For those considering submitting cases for examination, the deadline is 7.10."

---

**Unified Kingdom Edition**

- "For more information contact the BACD on 0207 612 4166 or email info@dentalphobia.co.uk."
DENTSPLY’s Endodontic Procedural Team – Raising the exocess of root canal treatment

Since the fundamental goal of endodontic treatment is the elimination of bacteria from the tooth and treating the disease in situ, starting with the placement of A3 Rubber Dam prevents re-infection from saliva during the procedure.

Adequate preparation of the access cavity is critical in order to safely approach and remove all infected tissue. The use of the Carver DNX burrs is essential to remove necrotic dentin and to create a proper cavity preparation for endodontic treatment.

The Ray-Pen® S apex locator is indispensable for length control where radiographs are often inadequate. Since the advent of Nickel-Titanium files, instrumentation has become quicker and easier. DENTSPLY’s ProTaper® system provides a combination of speed, versatility and easy geometric control to help shape a root canal.

For more information please contact your local representative, Freephone +44 0800 072 3313 or visit www.dentsply.co.uk

Dentists targeted by HM Revenue & Customs

Majesty’s Revenue and Customs are focusing their attention on professionals who do not declare all their income and expenses. Our Majesty’s Revenue and Customs take a very strong view against any attempt to defraud the revenue.

Dentists targeted by HM Revenue & Customs: a timely reminder
