Extremely compact, it is easily transported between surgeries and fits comfortably on any work surfaces. It features an adjustable, easy-to-view LED display and an easy to remove and clean handpiece mounting, which also acts as a carrying handle.

SIBOEndo Pocket is incredibly versatile and can be used with both nickel-titanium and steel file systems. Recommended torque and speed settings are stored in a pre-programmed library which is then shown on its visual display. They can be altered to individual preference or to locate apex accurately. SIBOEndo Pocket has a pre-set torque to file breakage. Similarly its Reverse function reverses rotation at the touch of a button. This action is signified audibly. The volume of all the audible signals is easily adjusted.

For further information please ask your local Minerva Representative or telephone 029 20 442800.

Digital Dental

Independent advice you can trust

Digital Dental provide unbiased advice to enable Dentists to choose the right products for their individual digital imaging needs.

With over 10 years experience, they appreciate every Practice is different and has individual requirements. Therefore they offer a range of options enabling their clients to make the best choice for them in order to integrate the latest and most appropriate digital tools into their Practices. Not restricted to one or two manufacturers, they believe they supply the best products on the market, products that can integrate with any Practice Management Software to deliver seamless integration and paperless Practices.

Their technically trained advisors are the same people who demonstrate, install and train their customers on the equipment they select. Ensuring their clients get exactly what they were promised. These advisors can demonstrate all their products at one visit and at a time to suit the Practice. This includes “live” demonstrations rather than mock ups on dummy systems, enabling Practices to evaluate the actual performances of different options. They then install the equipment and provide comprehensive free hardware and software training until all the staff are fully trained.

Should a problem arise they can provide loan equipment to minimise disruption.

Proud of their reputation, Digital Dental have testaments to prove it.

For further information telephone Digital Dental on 0800 027 8959, email sales@digitaldental.co.uk or visit www.digitaldental.co.uk.

Minerva Dental

Galileos 3D x-ray system

For unparalleled functionality in diagnosis, planning and treatment

Part of Sirona Dental’s XG family of digital radiography units, which also includes the Orthophos XG 2D imaging system, Minerva Dental’s NEW Galileos 3D cone beam digital x-ray offers unparalleled functionality in diagnosis and treatment planning.

Galileos 3D gives operators the power of integrated diagnostics and treatment planning via a single imaging system. It is particularly appreciated by anyone involved in implantology, periodontology, oral/maxillofacial surgery and orthodontics. Enabling them to reduce risks, plan surgical interventions, coordinate treatment planning with colleagues and explain treatments to patients with greater clarity and certainty.

With its innovative Cone Beam technology, Galileos 3D calculates a large volume 3D image set (over 200 exposures) in a single low-dose 3D scan of 15 seconds or less. The image set is then processed and presented using GALAXIS software, an advanced version of Sirona’s SIDERIS XG imaging software.

Galileos 3D not only shows 3D displays in perfect image quality, but also enables clear navigation and diagnosis in traditional PAN, CEPH and TSA displays. The Gentle Dentist’s unmatched flexibility and diagnostic potential.

Intuitively controlled by its EasyPad Touchscreen, it is an all-in-one diagnosis and planning system which offers a very short, low dose scan cycle for optimum speed and integrated workflow.

For further information ask your local Minerva Representative or Telephone 029 20 442800.
Optergo Prism Spectacles and Loupes - bending light instead of your neck

New refracting prism spectacles and loupes from Optergo can help put an end to neck and back problems.

Rather than bending towards a patient Optergo prism spectacles and loupes change the angle of image projection to the eyes. This allows the wearer to see below the normal line of sight and sit upright while working normally. There is no loss of vision, a straighter neck and back, and a reduced downwards-rotation of the eyeball resulting in less fatigue.

The prism is part of the lens, incorporating an individual's prescription and sitting in tilted, ultra-lightweight titanium frames. The lens is multicooated glass with antireflective treatment, has a large field width and a slight magnification. Flip-up loupses and through-the-lens loupes provide a 2x magnification with all the same benefits if required.

Optergo, part of the Multi-lens All group, has a world leading position in the manufacture of bespoke and specialist optics.

For further information about Optergo prism products call 0207 251 9648 or email info@optergo.co.uk

Minerva Dental
Planmeca Compacti for unmatched user and patient comfort

Minerva Dental are distributors for the Planmeca Compacti Treatment Centre, which integrates the dental unit and patient chair into a comprehensive floor-mounted unit.

The Planmeca Compacti incorporates a spacious environment, balanced instrument delivery and features simultaneous access to the patient chair without leaving the operating position in the manufacture of bespoke and specialist optics.

It features an innovative polywave LED which emits a broad light spectrum of 350 to 515nm, similar to daylight, with the low cost generic Chlorhexidine gluconate mouthwash.

As we all know Chlorhexidine Gluconate is an exceptionally well-proven anticariogenic agent, which reduces the formation of plaque and combats gingivitis and oral candida infections.

The Chlorhexidine gluconate formula has been universally recommended by GDPs for the maintenance of good oral health for decades, which is a testament to its efficacy.

Chlorhexidine Gluconate Mouthwash is also recomended for both pre and post-operative use in the rapidly expanding areas of endodontics and dental implants, where leading dental specialists are increasingly exploiting its qualities to reduce infection and minimise patient discomfort and helps speed the healing process.

BDEA can find permanent and locum Practice Managers, Dentists, Nurses, Hygienists and Receptionists, and even provides emergency locum placement at short notice.

With some recruitment agencies, you are never sure how the new team member will fit in, or whether they will be as good at their job as they say they are. With BDEA you know you will get the right person for the right job. Candidates are given in depth interviews over the telephone by an experienced Dental recruitment team, and are thoroughly assessed to find out their skills and qualifications.

BDEA obtain previous employment references and, when locum assignments come to an end, sends a quality control questionnaire to the client, to ensure that their temporary staff are reliable, knowledgeable and confident.

To contact Browns Dental Employment Agency, call 0845 150 5848, or email info@brownslocumlink.com

More information about the BOS and its work with The Orthodontic Technicians Association can be found on www.bos.org.uk.
