**BACD Bellstall Dental Centre**

Dr Ian Buckle will be sharing his expertise with members of the British Academy of Cosmetic Dentistry (BACD) at Bellstall Dental Centre on Thursday 17th June 2010.

The lecture, entitled ‘3D Treatment Planning: 10 Steps to Predictable Aesthetics and Function’ will give delegates a structured method for effective diagnosis and treatment planning.

Whilst photographs and radiographs provide the information to visualise the position of the teeth in two dimensions, it is rarely by the depth of the teeth in relation to each other and the patient’s face a challenge for the practitioner.

With twenty years of experience, Dr Buckle will be showing members how to successfully realise optimal dentistry from an aesthetic, functional, biological and structural perspective.

Special emphasis will be placed on the four options of treatment ( reshaping, restorations, restorative and surgical correction), so that the correct options) are chosen for each patient.

The lecture will also demonstrate how to segment large treatment plans, so that patients with financial issues can receive optimum care over time.

For more information or a booking form please contact Suzy Rowlands on 020 7905 1234 or email suzy@bacd.com.

**UCL Eastman CPD launches new programme**

"Developing Leadership and Clinical Excellence within the NHS"

The UCL Eastman Dental Institute, in the support of the Chief Dental Officer and the Department of Health, is excited to announce the Autumn 2010 launch of a unique new programme bringing together leadership and clinical excellence within the NHS.

The programme will incorporate the following modules:

- Clinical Leadership and Service Delivery
- Developing Leadership and Clinical Excellence within the NHS

The programme is for those who want to develop their skills in leadership and clinical excellence within the NHS. The programme comprises four modules, each one day in duration, including a presentation by Dr. Ken Parrish, previously primary surgeon at the Centre for Oral & Maxillofacial Surgery. The programme is designed to provide delegates with an understanding of the leadership and management skills necessary to manage and lead teams and departments effectively.

For further information or to register for the programme, please contact the UCL Eastman CPD team at: Tel: 020 7905 1000 or email claire.lafford@ucl.ac.uk.

**BACD: Create Beautiful Restorations with GC Gradia Direct Treatment**

The BACD: committed to excellence in cosmetic dentistry.

GC Gradia is a unique light cured composite that allows you to fabricate natural looking restorations.

The hands-on Gradia course shows how to craft functional composite restorations, even monochromatic restorations become beautiful due to the unique chameleon effect of GC Gradia.

Gradia’s new appearance has been achieved by creating a new type of composite resin that is comparable to porcelains and close to natural teeth, which would previously have been impossible to attain using traditional composite materials.

**Experience the benefits of Nobel Biocare All-on-4™ Concept for yourself**

Practitioners seeking alternative solutions for treatment of edentulous jaws in patients attended Nobel Biocare’s course on the all-inclusive All-on-4™ Concept.

Most dentists are unaware that completely edentulous jaws are a widespread problem. Percutaneous and high complexity treatment costs often still stand in the way of offering this procedure.

The All-on-4™ Concept system enables the practitioner to avoid sinus grafting and facilitates immediate loading to the final prosthesis. Lower costs and shortened treatment time inevitably translate to higher patient acceptance and the system is widely used for patients in need of extractions.

The concept of the courses in Cardiff is to be followed by a presentation by Dr. Ken Parrish, previously primary surgeon at the Centre for Implant Excellence at the Cleveland Clinic, and who now runs a private practice for periodontics and implant surgery.

The All-on-4™ Concept is a proven, yet cost effective immediate loading technique, unique to Nobel Biocare.

For more information contact Nobel Biocare on 01888 452 912 or visit www.nobelbiocare.com.
