A Dental Implant Course That Pays For Itself!
Sound and Safe
Live Training on Real Patients
Innovative and Immediate
No need to access the best courses and teachers. The Basic Dental Implant Course provides QP6s with the knowledge to learn with Nobel Implant Europe’s founder, Nadhem Zafee. To attend this course, no implant experience is required as it is taught at beginners level.

The main aims of the course are for delegates to:
• to be able to treat an implant plan and place dental implants confidently and safely in your own patients
• to understand how to construct prosthesis to fit onto your implants
• to have a broad knowledge of complex treatments and new trends in implantology

Main lectures and ‘Hands On’ models will take place from Wednesday 30th June to Tuesday 4th July 2010 (included) in London. UK. This is followed by a weekly residency in Brazil taking place between Monday 22nd August and Friday 2nd September.

Most dentists who complete this course have paid for their course fees within just one year!

Create Beautiful Restorations with GC’s Gradia Direct Treatment
A world-renowned expert in the field of aesthetic dentistry, Dr Ian Buckle will take delegates on a journey of aesthetic dentistry. He will discuss the theory and practice of aesthetic dentistry and how this represents the commitment the BACD has towards promoting excellence in the field of cosmetic dentistry.

This October will see the launch of a unique new programme bringing together leadership and clinical expertise. The GC Gradia hands-on course includes flights from London Heathrow, transfers to the hotel and training centre, 1 night hotel accommodation, all meals; together with all materials, models and equipment.

For full details of the Gradia courses, which are contained within GC’s Training Calendar Booklet or for further information please contact GC UK on 0908 219 999.

The main aims of the course are to:
• Enable participants to fabricate natural looking, aesthetic direct restorations.
• Experience the benefits of the latest technology in surroundings that meet the highest specifications in order to facilitate excellent treatment planning
• Learn how to craft functional, biological and structural perspectives.

Learn how to create probably the most beautiful composite restoration in the historic city of Leuven, Belgium with GC.

The GC Gradia hands-on course includes flights from London Heathrow, transfers to the hotel and training centre, 1 night hotel accommodation, all meals; together with all materials, models and equipment.

For full details of the course please contact the Course Administrator on 020 7905 1234 or 1261 218 999.

THE ECTAN
EUXAMEN

A popular speaker, Dr Buckle’s lecture will be sure to leave members feeling inspired and confident to offer the best treatment to patients.

For more information or a booking form please contact Suzy Rowlands on 0208 241 8283 or email suzy@bacd.com.

Important date for the diary
The British Academy of Cosmetic Dentistry (BACD) is pleased to announce another of its informative annual events – the London Study Club evenings, to take place on Tuesday 16th September 2010 at the British Dental Association 3D Treatment Planning: 10 Steps to patient Aesthetic and Function aims to give attendees a structured approach to diagnosis and treatment planning. A world-renowned expert in the field of aesthetic dentistry, Dr Ian Buckle will be choosing members who have an additional knowledge and gain confidence to offer the latest treatments and advanced techniques to their patients, through a series of lectures and interactive sessions from such luminaries as Dr Frank Spiekman.

As well as the AAO, the International Meeting will also see practitioners from across Europe attend the British Academy of Cosmetic Dentistry’s International Meeting at the Hilton London Metropolis. This is a fantastic opportunity to share ideas and experience with some of the world’s leading proponents of aesthetic and restorative dentistry.

UK dental professionals can add to their knowledge and gain confidence to offer the latest treatments and advanced techniques to their patients, through a series of lectures and interactive sessions from such luminaries as Dr Frank Spiekman.

Create Beautiful Restorations with GC’s Gradia Direct Treatment
A world-renowned expert in the field of aesthetic dentistry, Dr Ian Buckle will take delegates on a journey of aesthetic dentistry. He will discuss the theory and practice of aesthetic dentistry and how this represents the commitment the BACD has towards promoting excellence in the field of cosmetic dentistry. 2010 launch of a unique new programme bringing together leadership and clinical expertise.

This module will cover the scope of NHS general dental practice.

The module will provide a comprehensive overview of the diagnosis, management and treatment planning of patients within the ethos of our wellness centre of the future.

This module covers current concepts in the aetiology, symptoms, clinical features and investigations in order to provide customers with exceptional standards in healthcare.

For the first time, Clark Dental has provided us with a fully equipped dental surgery, complete with separate sterilisation room that fits in perfectly with the ethos of our wellness centre of the future.

The high quality of the equipment, calibration and installation was matched by the service we received from the team: helpful, courteous and a pleasure to deal with.

I look forward to working with Clark Dental on further projects in the future.

For more information contact Clark Dental on (0)1344 780380 or email cindy.matejic@clarkdental.co.uk

Dr. Ian Buckle's lecture will be sure to leave members feeling inspired and confident to offer the best treatment to patients.

High quality customer service excellence within the NHS

Dr Ian Buckle, Clinical Director of Dentistry for Bupa, describes why he is working with Clark Dental.

“Bupa is synonymous with high quality healthcare and we look to our partners to help us deliver the high standards our customers come to expect from us. A colleague who used Clark Dental to repair his surgery suggested them to me.”

Bupa is introducing a new concept in wellness centres bringing together the latest technology in technology and methodology, so that the correct option(s) are chosen for each patient.

The lecture will also demonstrate how to segment large treatment plans, so that patients with financial issues can receive optimum care over time.

For more information or a booking form please contact Suzy Rowlands on 0208 241 8283 or email suzy@bacd.com.

Course details
The hands-on Gradia course shows how to craft functional, biological and structural perspectives. Even the most challenging situations become beautiful due to the unique chameleon effect of GC Gradia.

Gradia’s new appearance has been achieved by creating a new optical system that is based on the optical properties of the teeth, rather than the paleness that is shared with composites. The result is a restoration with opalescence comparable to porcelains and close to natural teeth, which would previously have been impossible to attain using traditional composite materials.

Seeing is believing with GC Gradia.

The main aims of the course are:
• To achieve a good understanding of anatomy and occlusion of the maxilla and mandible
• To understand the principles that underpin the management of occlusal harmony

The All-on-4™ Concept is a proven, yet cost effective immediate loading technique. The treatment involves the implantation of only four implants to support a monolithic prosthesis. This revolutionary technique allows for a painless transfer to the final prosthesis. Lower costs and a stepwise approach to treatment make the All-on-4™ Concept a most attractive solution for patients seeking a simple yet effective treatment.
