**NHS events**

Professor Jimmy Steele, chair of the independent review team for NHS dentistry, is calling for dental professionals to give their views on NHS dentistry at five ‘engagement events’ being held around the five nations of the UK. The five sessions are being held around the country over the next two months. Professionals are invited to join NHS commissioners and patient representatives at any of the five engagement events being held in Newcastle, Birmingham, Bristol, Manchester and London from April and May. Since its appointment in December 2008, the review team has been investigating why there are variations in access to dentistry in England and how the NHS can deliver continuous improvements for the benefit of patients. Professor Steele will discuss the emerging findings of the review with people involved in delivering and improving NHS dental services, inviting them to contribute to the development of recommendations.

Professor Jimmy Steele, chair of the Independent Dentistry Review Team, said: 'I want to continue to listen to the views of dentists and their teams, patients and NHS staff and to take their advice on improving access, promoting prevention and ensuring NHS dentists and their teams to share their opinions at these events and help us start to develop our recommendations.'

The results of the study, ‘Putting the future of NHS Dentistry in England will be published this summer.

**Dentist directory**

A new UK dentist directory, eDentics.co.uk, has been launched as a tool for both dentists and patients. With over 8,000 dentists, orthodontists, cosmetic dentists, NHS dentists, many with UK dentists' reviews and ratings by genuine patients, eDentics aims to be the largest and most comprehensive UK dentist directory to provide patients with a choice of services and UK dentists with free listings and many other additional features. eDentics enables patients to freely search for local dentists and read UK dentist reviews.

eDentics’s UK Dentist Directory contains all kinds of dentists including: dentists; orthodontists; cosmetic dentists; NHS dentists; Harley Street dentists and emergency dentists, who offer a range of treatments such as general dental, bridges, dentures, dental implants, mini-implants, orthodontics (both braces and Invisalign), prosthodontics, porcelain crowns and veneers, restoration implants, root canal therapies and tooth whitening.

**News in brief**

**More extractions?**

Extractions have gone up by 50 per cent in the last four years says new figures, but it’s important to ‘put these figures into context’ says Dr Crookcroft.

**Shaping up**

If your practice needs a makeover then it’s time to do something about it, so don’t be afraid of investing money as the rewards can be considerable.

---

**More dentist directories to be launched**

For details on how you can promote your practice, or to find out more about DENTSPLY’s range of products, visit our website, call our and read NHS dentist reviews.

**Money matters**

**Tax implications**

If a self-employed associate turns out not to be employed, the situation can be considerably different.

---

**Clinical**

**Alignment innovation**

Never forget that orthodontics is a ‘prized speciality’, where specialist orthodontists have to train hard to understand the complexities says Dr Tif Qureshi.

**‘Derisory’ pay rise to hit the profession**

Derisory pay rise to hit the profession

Dentists look set to get a 0.21 per cent increase in earnings following a recommendation of the Review Body on Doctors’ and Dentists’ Pay.

The Dental Practitioners Association, claims that as the Retail Prices Index is currently 5.2 per cent—anything less than this is effectively a pay cut.

Jim Donaldson, chairman of the Dental Practitioners Association (DPA) said: ‘The DDRB seems to assume no responsibility for difficulties in NHS access.

Year after year we have tried to explain to them that dentists are motivated to either join or leave the NHS based on comparison with similarly skilled groups and also the disparity in terms and conditions between the public and private sectors.

Pay is a vital element of the NHS package, yet year after year it is cut in real terms.

The new contract is sufficiently unattractive and uncompetitive that any further increase in dental prices of equipment and materials will now have to be imposed year after year by below-inflation awards.

While Brian Levy, president of the DPA said: ‘With the RPI at 5.2 per cent, this recommendation can only be viewed by NHS dentists as another pay cut. This will further reduce our members’ ability to accept and treat NHS patients.

Derek Watson, chief executive officer of the DPA, claimed that the Review Body is ‘hopelessly confused about how to set wages to retain dentists in the NHS’.

He added: ‘Four years ago they used the doctors’ increase. Three years ago they used the average Earnings Index. Then they used the Hospital and Community Health Services sector where dentists are salaried and have their expenses fully reimbursed. This year they have under-cut even that award. No wonder high street dentists are choosing to do less NHS work! The government has broken its promise to provide a comprehensive dental service to the nation in return for the high levels of tax and national insurance paid.’

The British Dental Association (BDA) echoed the DPA’s concerns.

The 0.21 per cent rise is based on a formula that, taking estimated increased expenses into account, suggests GDPs will actually see a 1.5 per cent increase in net incomes.

However John Milne, chair of the BDA’s General Dental Practice Committee (GDPC), said: ‘Sadly, the basis of the formula which suggests that the increase might amount to 1.5 per cent in real terms does not take account of the effect of the devaluation of sterling and its effect on the prices of equipment and materials that are largely manufactured overseas.

These expenses, and dentists’ ability to access the finance necessary to meet them, are both adversely affected by the recession.

He added: ‘We appreciate that a measure of financial restraint is necessary in the current economic climate. Clearly, eco-
