Whose been sitting on my chair?

Bambach’s revolutionary stool could become a hot seat – and not just for you!

We all know about healthy eating and taking regular exercise but what about healthy seating? As dental professionals we tend to sit a lot of the time and increasingly complex treatment cases it looks like longer sessions in the chair are not just in store for our patients but us too.

Sitting with the correct posture is very important as it reduces the strain on your lower back. Bambach’s unique saddle seat design allows the spine and pelvis to work together to create balance and mobility in the up-right position. As a result good posture happens naturally as you sit on this cleverly designed stool which encourages ‘dynamic’ seating where body weight is additionally taken on the feet further promoting health.

So for natural relief and to prevent occupational back pain for all members of the dental team call Bambach today on freephone 0800 581108 or visit www.bambach.co.uk. There’s even a free 50 day trial period!

Heka Dental

Get a FREE trip to Copenhagen. With Heka Dental you’re in safe hands!

Heka Dental invite Dentists to visit Copenhagen to see their design and production facilities, as well as their beautiful city. There will be several trips a year, normally running from Thursday morning to Saturday afternoon. During which guests will have an opportunity to visit their factory as well as Wonder-ful Copenhagen. For Dentists ordering a Heka Dental pack-age here or during the trip the entire visit will be free. Otherwise, Dentists will only need to pay for the flight and hotel.

ABAC compressors

Many dental practices face unexpected interruptions and high repair costs, caused by fail-ing and overheating compressors. An old compressor can also provide poor quality air, which reduces lifetime of den-tal units and handpieces, and can seriously compromise the effects of your work, if contaminat-ed with oil.

Manufactured to order they meet all the incumbent’s needs including specific require-ments on colours and materials. Support Chairs also offer a wide range of accessories including new Swing and Swing Mini Armrests.

Easy to fit and convert between left and right handed oper-ators, the Swing Armrest of-fers a number of options for varied seating positions and is easy to use with Support Chairs’ complete range.

The Swing Mini Armrest has the same features as Swing but is smaller. Designed for use specifically with Support Stool, its smaller size suits their beau-tiful and stylish design to per-fect.

For further information contact your regular Dental Dealer or Support Chairs on 01296 581764, fax 01296 586585, email sales@support-stool.co.uk or visit www.supportstool.co.uk.

ABAC compressors are char-acterized by the four most im-portant features for a dental prac-tice: very low noise level, medical grade clean air, reliabil-ity and best price to value ra-tio. A wide range of products is available to suit all needs: Basic when sound level is not crucial; Sky and Silent, when quiet oper-ation is required; Plus, with an ad- sorption dryer, when the compressor is fitted outside the practice or in a basement.

Contact Profi on 01794 675157, for a free survey and quota-tion. Abac compressors are of-fered with free delivery and installation, starting from £599 for a single surgery and £899 for 3 surgeries.

Ceramic Systems (CEREC®) NEW CEREC® AC makes impression free dental practice a reality

The NEW CEREC® AC from Ceramic Systems (CEREC®) enables Clinicians to capture whole jaw arches – quickly and conveniently – without the need for impressions; generating vir-tual 3D models enabling Den-tists to offer an even wider range of restorations. It com-bines the NEW CEREC® Blue-cam camera with updated CEREC® 3D software which makes it even easier to operate.

Instead of conventional laser or infra-red light sources, Bluecam features high-per-formance LEDs which deliver optical impressions of unprece-dented precision; this ensures the final restoration’s excellent accuracy of fit, speeds up the bonding process and reduces any excess luting cement to be removed.

Bluecam delivers razor-sharp images, its built-in shake detection system enhancing overall precision. Its automatic exposure function and exten-sive depth of field means the en-ire impression-taking process can now be delegated.

For further information, con-tact Ceramic Systems Limited on 01932 582956, e-mail j.colville@ceramicsystems.co.uk, or visit www.ceramicsys tems.co.uk.

Are You Sitting Comfortably?

Introduce leading cutting-edge technology into your prac-tice with KaVo and see fantastic results.

The KaVo ESTETICA E80 is a suspended chair that gives the patient and dentist exceptional freedom of movement. The area under the unit is completely open for the dentist and assist-ant; there is plenty of room for comfortable leg positioning. Procedures run much smoother and more efficiently leaving the professional free to focus on quality dental care.

The ESTETICA E80 takes your health into consideration as the individual working positions and habits ensure that your posture is constantly healthy, stress-free and re-laxed.

The Primus 1058 is designed to offer all the quality and tech-nology advantages of a KaVo unit, with the added benefit of working flexibility. This unit al-lows for permanent installation in either the right or left-hand position, whilst offering ideal patient positioning in-cluding an offset backrest artic-

• 09.05.09, Manchester
  • 06.06.09, Uxbridge
  • 26.09.09, Uxbridge
  • 25.10.09, Newcastle
  • 21.11.09, Uxbridge

Triotray

The smart new Triotray by Triodont is a rigid and accurate posterior impression tray, producing consistently successful impressions. It removes that dreadful moment of doubt when you fit a new crown and saves time and money spent on ad-

justments and extra appoint-

ments. Triotray’s sturdy metal frame with unique side tabs controls the tongue and avoids the major cause of post-impression ‘bounce-back’. The tray comes in left and right styles, with the tabs pre-shaped to de-

flect the tongue. The tray’s thin-

ness and strength in the retro-

molar area allows the patient to close easily and comfortably in centric occlusion (maximum intercusps position). The impression material locks into the side tabs, avoiding the need for adhesive. The tabs can be bent to fit all molars, including those of patients with a shallow palate, wide buccal plate or mandibular tori. Triotray elimi-

nates the frustration and em-

barrassment caused by poorly fitting crowns due to distorted impressions.
