Implants

Biohorizons go Gold at the 2010 BSO meeting

Leading implant company, BioHorizons, are pleased to announce their gold sponsorship at the 2010 year’s European Association for Osseointegration (EAO) conference in Glasgow on 6th-9th October. Held at the Scottish Exhibition Conference Centre, this year’s annual event is focused on Clinical Controversies in Implant Dentistry and involves a diverse four day lecture and workshop programme.

The packable consistency of Diamond means that the restoration will set quickly to a rock hard state. No light curing is required as the restoration is chemically cured and rapid set up into position. The restoration is completely water tight and will not leak.

Diamond Capsules are available in 3 shades and Diamond Carbure/90 is available in seven shades. Diamond SIGG release fluid nurtures to a healthy environment for the mouth at all times.

Surgical Success from NSK

NSK’s surgical micro-motor, Surgic XT PRO, incorporates the unique Adjusto-View Calibration (AVC) technology, which effectively calibrates the micromotor to the rotational resistance of the individual handpiece, optimising speed and speed settings and ensuring accurate, safe and smooth operations.

Sirona Specialists, Sident Dental Systems offer the choice from the complete range of Sirona Implant Systems at the BDHA Annual Conference on 17th-20th May 2010.

For more information call on 01932 582900 or email info@biohorizons.com

All-on-4: Combining predictable treatment results with affordability

The rehabilitation of the edentulous maxilla and the mandible always presents a challenge for dental professionals, however, the All-on-4 system from Nobel Biocare helps provide predictable results for even the most challenging cases.

The revolutionary All-on-4 procedure is based on placing four straight anterior implants and two angulated posterior implants to exist the sinus nerve but at the same time reduce the cantilever.

Unlike mini implants, the All-on-4 system provides the complete rehabilitation of the upper and lower jaw, the fast and efficient All-on-4 system allows practitioners to provide patients with a faster, less traumatic procedure and a speedier recovery.

Benefits of the system include:

• No complicated bone grafting procedures required
• No soft tissue required
• No nerve repositioning required

Scented Service and Support Engineers

Countrywide Product Specialists for gae and after sales support - Low cost finance arranged for you - User friendly software to maximise efficiency

CEREC® enables Dentists to design and create all-ceramic restorations, saving Laboratory costs it enables Dentists to design and create all-ceramic inlays, onlays, partial crowns and crowns for the anterior, premolar and molar regions in one visit. The milling unit can be situated anywhere that is convenient within the Practice, even as an fascia-eye-viewer in the waiting room.

Combined with adhesive bonding techniques, CEREC® creates biocompatible, non-irritative, long-lasting restorations from durable high-quality ceramic materials in a single treatment session - without the need for provisional restorations.

For further information, contact Ceramic Systems Limited on 01925 828200, e-mail j.colville@sident.co.uk or visit www.ceramicystems.co.uk
