Mr Artio™ "Tools for a True Artist"

Mr. Artio™ – he is light and agile with an ergonomic grip and super strong tips, the DENTSPLY team often wonder how they would cope without him. He simply loves creating working of art with his DENTSPLY restorative friends!

DENTSPLY’s Indirect Restorative Team understand that crown & bridge restorations are amongst the most demanding procedures carried out by a dentist, with high expectations from their patients. DENTSPLY’s quality, branded products fit each step of this procedure, making it quicker and easier to ensure an accurate, long lasting restoration and help you to “get it right first time”.

Restorative Hand Instruments with Mr Artio™ “Tools for a True Artist”

Perfect Grip from Bien-Air

Bien-Air’s DIAMLINE, instruments offer you excellent hand grip due to the patented, high tech diamond powder surface treatment.

DIAMLINE handpieces allow for precision treatments with reduced effort and tension on your part combined with less hand fatigue, allowing you to work more efficiently. Clinical tests have proved that the high tech coating increases the life of your instrument’s surface by 5 times more than the coatings currently used. These investigations have shown that DIAMLINE instruments showed no wear after more than 50,000 friction cycles meaning that your instruments will last longer ultimately keeping costs down.

These contra-angled handpieces offer maximum power at both high and low speeds, particularly when combined with the MX motor from Bien-Air. With 5 contra-angled handpieces and a straight handpiece in the range of DIAMLINE, you will find that these instruments cover the full range of clinical applications.

For further information please contact Bien-Air on 01386 711 505 or visit www.bienair.com

A single use instrument at an affordable price

Decommission of instruments is a complex process that involves several stages, including cleaning, disinfection, infection and sterilisation, as outlined in the Government decontamination guidelines HTM 01-05.

With the ever increasing concerns from patients over cross infection and contamination, The Classic single-use range from UnoDent offers high quality, single-use plastic handpieces designed and manufactured to offer today’s modern dental practice, a cost effective way to offer patients complete peace-of-mind.

As an alternative why not try the metal handled instruments, manufactured from stainless steel to high standards, and intended solely for single-use. Supplied in bulk packs of 10 each instrument equates to as little as 49p each, which allows the dental practitioner to dispose of the instrument after use at minimal cost, and without compromising on quality.

For further information on the full instrument range available at The Dental Directory, please call our Team on 0800 585 586 or visit us at www.dental-directory.co.uk

‘Top Products’ recognition for Ivoclar Vivadent

Leading ceramic specialists Ivoclar Vivadent has gained prestigious recognition regarding a number of products in the range.

Brownie, Greencyne and Supergeenie silicone polishers for fast, brilliant polishing on previously produced metal amalgam, and the Super-Snap finishing and polishing disc system for all microfilled and hybrid composite fillings. One Gloss unique one-step finisher and polisher can be used to finish and polish all composites restorations simply by altering the contact pressure on the restoration, without having to change instrument.

To see what you can accomplish with Shofu’s polishers and to claim your free trial pack of One Gloss please call Shofu on 01802 870800. Hurry, trial pack stocks are limited!

Preparation with Mrs. Hi-Di® Diamond Burs

Mrs. Hi-Di® is well-received – with her years of experience, she is a key asset to the team. Her multiple layers of diamond grit mean that she is reliable & durable and always runs true. She ensures most clinical situations are met with her various patterns and she’s always kind to your handpieces.

Why buy other brands, when Mrs Hi-Di can offer you assurance with high quality – Diamonds are a Bur’s best friend!

The Celalux 2 is a high performance LED polymerisation device from Voco.

The new high performance LED polymerisation device from VOCO

Design and Functionality: Celalux 2

The Celalux 2 is a high performance, light-curing device of the latest generation that offers an especially high intensity of blue light.

With an average light output of 1000 mW/cm², the Celalux 2 is ideally suited for use on restorations with all composite materials, bonds and light-curing cements.

Design and functionality

Functionality and design have been perfectly united with the configuration of the Celalux 2. The hand piece is ergonomically shaped and constructed from anodised aluminium. With its rounded-off surface and extremely light weight of only 160 grams, the Celalux 2 feels good in the hand and provides excellent handling. The adherence and breeding of microorganisms on the hand piece are significantly impeded by lack of...
Biolhorizons are the exclusive UK distributors of Mem-Lok. For more information on Mem-Lok and the Biolhorizons product range and courses please contact the office on 01154 752390, email info@biolhorizons.com or visit our website at www.biolhorizons.com.

Building on a foundation of patient loyalty by providing reliable and demonstrable advice helps to develop good trusting relationships which are paramount to patients’ oral health. Committed to finding the evidence-based solutions for both dental professionals and their patients, Oral-B will continue to support the best in dental practice development.

Getting started is easy. All you need to do is undertake specialist training by a recognised provider. Med-fx Training is one such supplier who offers courses in one of five locations – London, Manchester, Newcastle, Birmingham and Glasgow. Their courses are conducted by experienced trainers all of whom routinely practice dental aesthetics alongside either dentistry or medicine. All Med-fx Training courses are certified, supported and recognised by the manufacturers of the treatments offered.

If you wish to register for a course, or to find out more about the treatments, please visit: www.medfxtraining.co.uk.

The result will be patients that stay with you for life.

Epicrem: Breaking down the barriers to softer hands

Epicrem is designed specifically to meet the hand care needs of dentists, hygienists and nurses in daily dental practice. Its non-greasy formulation replenishes moisture lost when handling instruments and provides a barrier to lock in moisture; also protecting against the irritation that may be caused by surgical gloves.

Hypoallergenic Epicrem leaves hands feeling soft and fresh and delicately perfumed. It can be economically supplied in a pack of 6 x 100g tubes for easy distribution into each surgery. For more information on Epicrem and to order your FREE sample please contact Septodont on 0800 455 155 or log onto www.septodont.co.uk

Friadent puts fizzle into implant dentistry

Many of Britain's most successful implant dentists joined DENTSPLY Friadent and DJ Frankie for a sparkling climax to this year’s Congress of the Association of Dental Implantology UK. Delegates were keen to get involved with the new dentists’ referrals campaign and the acclaimed Dental Training Programme. Product innovations which attracted a great deal of interest included ANKYLOS® C/A, with the unique indexing option and XIVE 5.0, one of the world’s narrowest implants.

For more information please contact Dentafix on (0044) 1276 691 821 or visit dentafix.co.uk.

Infected with common sense

CODE, the Association for Dental Practice has just launched an Infection Prevention Kit to make it as easy as possible for all dentists to comply with the new decontamination guidance HTM 01-05 from the Department of Health.

The CODE Infection Prevention Kit is a collection of practical tools, which distil the new guidance and break it down into sections to make compliance with all aspects of cross infection control, sterilisation and decontamination manageable.

The kit is provide free to CODE members and is available to non-members as a stand-alone product for £50 (incl. VAT). Those who purchase the kit have the opportunity to discover the benefits of CODE membership at a reduced price by paying a further £195 to access all the other £50 CODE modules without having to find the usual joining fee.

Sponsored by the Dental Directory, the CODE Infection Prevention Kit contains a companion catalogue with a useful range of equipment and products.

You can read more about the kit and watch videos at www.CODEuk.com/prevention.

Mem-Lok Resorbable Collagen Membrane: Easy Handling, Long Lasting

BioHorizons are pleased to introduce Mem-Lok, a new re-sorbable collagen membrane, to the UK Dental market. Mem-Lok is a Type 1 collagen matrix that hinders epithelium down growth and prevents connective tissue cell migration. Derived from bovine Achilles tendon, this permeable membrane offers high mechanical strength. Mem-Lok has an optimised balance of flexibility and rigidity and a macromolecular pore size that allows nutrients transfer into the wound site.

Mem-Lok is easy to use and adaptable to various deficiencies and it also demonstrates a predictable resorption rate of 26-28 weeks*. This illustrates a market leading resorbable collagen membrane, producing great results for dentists and patients.

The result will be patients who expect evidence-based care, which in turn benefits of Oral-B's oscillating-rotating power toothbrush technology and look towards a more service-oriented approach. Consequently, practices will have to change emphasis to look not only at retaining patients but also convincing new ones. Asking questions such as what can our practice offer that a neighbouring one does not?

The Instrument of Choice for You

Dentafix are proud to announce the addition of a new instrument range to their ever expanding portfolio. The Nova Resin Handle instruments are made and finished in the UK by skilled craftsmen to exceptionally high standards at economical prices.

These instruments are manufactured using a colour stable, autoclavable resin material, available in 7 pastel colours, which are combined with working ends manufactured from either T505, 440a or 440c grade stainless steel depending on the type of instrument. Manufactured from high quality stainless steel these instruments are incredibly strong and resistant to wear meaning they will remain sharper for longer saving you time and money.

This broad range of coloured handles allows you to easily identify the instrument you need. The instruments are completely scratch resistant and will look good even after repeated sterilisation due to the stable resin colour. With a choice of over 175 patterns to choose from, ranging from fine to coarser, for example, there is no choice but Nova Resin Handle Instruments!

For further information please contact Dentafix on (0044) 1276 691 821 or visit nova-instruments.com.

Oral-B help promote the patient-centred practice

Oral-B aims to help dental practices plan ahead as they move into changing times in oral care.

Oral-B believes that patients will increasingly look to dentists to advise on, and provide, oral health and prevention rather than treatment and repair. Spending on dentistry is likely to become more discretionary as a result because it will be competing with other health and leisure choices.

The result will be patients who expect evidence-based care, which in turn benefits of Oral-B’s oscillating-rotating power toothbrush technology and look towards a more service-oriented approach. Consequently, practices will have to change emphasis to look not only at retaining patients but also convincing new ones. Asking questions such as what can our practice offer that a neighbouring one does not?

EAPD Agree on updated Fluoride Guidelines

The European Academy of Paediatric Dentistry (EAPD) convened in Athens in November 2008 to agree guidelines on the use of fluoride in children. Paediatric experts from 25 European countries attended the workshop that was generously sponsored by P&G.

The proposed guidelines were approved unanimously by the EAPD Board and Council during their annual meeting in Helsinki on May 14-16th, following a 6 months discussion in order to achieve the highest level of consensus. The updated guidelines will appear shortly at the Academy’s site (eapd.gr) and will be published in the Academy’s official journal, European Archives of Paediatric Dentistry.

Spring Forward

Céad mile fáilte go mBaile Atha Cliath!

Lately ‘a hundred thousand welcome to Dublin’ for an historic event in an historic city. The British Orthodontic Society’s Spring Meeting was the first joint meeting between the BOS and the Orthodontic Society of Ireland. It was a resounding success with over 300 delegates attending the two day meeting, which was held in the capital city of Ireland - Dublin.

Unfortunately, the weather was not as welcoming as the people, with grey skies and rain predominating. However, this wasn’t enough to dampen the spirits of the avid golfers who arrived a day early to play the famous K Club – one of the finest in the world. Hygienist Alison Mackenzie arrived a day early to play the famous K Club - one of the finest in the world.

Many of Britain’s most successful implant dentists joined DENTSPLY Friadent for a star-studded celebration during this year’s ADI Congress.
