A busy year ahead

124th BDA President Amarjit Gill speaks to Dental Tribune about his role and the coming 12 months

The BDA Conference and Exhibition saw the handover of the BDA Presidency from John Drummond to Amarjit Gill.

Amarjit qualified in 1981 from the Royal Dental Hospital, London, where he associate in eight different practices, he became a principal in 1985, designing and building his own practice as part of a medical centre. In 1992 he became a Partner, relocating to a newly designed practice in the Wollaton area of Nottingham where he practices today.

Amarjit has significant experience of representing the dental profession. Locally, he has served as Chair of the BDA’s East Midlands Branch and the Nottingham Independent Practitioner Group, and as the development team leader of his Local Dental Committee. On the national stage he has chaired the BDA’s Private Practice and Equality and Diversity committees and served as Deputy Chair of the organisation’s Executive Board. He is also an invited member of the International Academy for Dental Facial Aesthetics.

‘Absolutely fantastic’ Speaking to Dental Tribune about the Conference and the year ahead, Amarjit’s enthusiasm for promoting the best in dentistry shines through. “Taking over as BDA President at the Conference in Liverpool has been absolutely fantastic. I’ve really enjoyed the conference for me it has had everything but time for me to attend all of the lectures and presentations I would have liked to! Of course with having become President at the event I have had a lot of meeting and greeting to do, thank yous to make and loads of presentations to attend. For me this has all been great and I’ve had a fabulous time at the conference, but the reasons I love this event is the various post graduate lectures and this year I’ve missed out.

“A big part of the role of being BDA President is ambassadorial – I’m going to be extremely busy going places at home and abroad representing the BDA and UK dentists. Let me give you an example: I’m shortly off to Las Vegas for a conference, then on to Singapore, a meeting in Sydney Australia with the Australian Dental Association, following that I am lecturing in Beijing. As you can see I’m not going to be around much!”

Impact on oral health As well as being involved with the BDA and practising in Nottingham, Amarjit is involved in other entrepreneurial activities, including acting as the spokesman for Dental Xpress (the mobile dental unit currently deployed in the Leicestershire area) and more recently as Clinical Dental Director for Philips Oral Healthcare. “What really impressed me was that Philips want to make an impact on the nation’s oral health and as our knowledge about the links between oral and systemic health grow, so the company has the potential to impact on the nation’s overall health too.”

Amarjit clearly relishes the wider challenges that participating in more than just life in the practice brings. “Being involved in an association such as the BDA lets you develop parts of yourself that you just can’t working as a general dental practitioner. It allows you to get out of your comfort zone”

“We are training more dentists than ever before, but we will need to look at opportunities for career advancement and Continuing Professional Development. Now that Dental Care Professionals are registered, how do they fit into the delivery of care by the whole dental team? A recent BDJ article found that patients attending a dental therapist had significantly higher levels of satisfaction compared to those who attended a dentist. The authors were from the Dental School in this very city. Be in the UK have been the true abusers of this change and where we have gone the rest of the world will surely follow.”

Let me say that whilst we have a right to expect the BDA to help change things for the better, it is not the true abusers of our responsibilities. The world famous Indian sage, Mahatma Gandhi, encapsulated this with “Be the change you want to see in the world.”

‘He who rejects change is the architect of decay. The only human institution which rejects progress is the cemetery’

Excellent Quality Excellent Value

Hydrophilic Impression Material

from £27.50 per pack (base + catalyst)
Super hydrophilic, thixotropic – NO SLUMPING
Convenient handling and easy to mix
Exceptional dimensional stability
Ample working time yet reduced setting time
Soft on insertion in the mouth for greater patient comfort
Easily removed from the mouth with optimum elastic recovery
Excellent storage stability
For best results use with Upasil Wash material

Proud to be associated with...
