Scottish dentist struck off

A dentist described as the ‘worst in Scotland’ has been struck off from the profession. Andrew Boyd, who practised at the Barassie Street Dental Practice in Troon, Ayrshire, left one man looking ‘like the Elephant Man’.

While another patient was forced to spend £17,000 on private treatment to repair the damage caused by Mr Boyd.

Health campaigners have called him the ‘the worst dentist in Scotland’.

Mr Boyd was accused of not examining patients properly, failing to take x-rays and not recording treatment.

The General Dental Council (GDC) chairwoman, Marilyn Green, said: ‘He omitted to take proper care of his patients on a large number of occasions, and failed to provide the basic diagnosis and treatment of common oral disease which would be expected of a competent dental practitioner. This amounted to the supervised neglect of his patients.’

She added: ‘The committee has to protect the public and maintain its confidence in the profession. Therefore the committee has decided that erasure from the Dentists’ Register is the only appropriate and proportionate sanction in this case.’

Margaret Watt, chairwoman of Scotland Patients Association, said: ‘This dentist is the worst I’ve ever heard about in Scotland. It’s shocking that it took so long for his behaviour to be exposed when he was very clearly endangering patients’ lives.

Bad oral hygiene can cause all sorts of health problems especially if the patient has an underlying health condition such as a heart problem.’

The hearing heard that around a hundred of Mr Boyd’s patients needed ‘immediate treatment’ after going to see him.

Dozens of them suffered from problems with gum tissue and tooth pulp.

Dental experts discovered other patients’ fillings had not stopped their teeth rotting because Boyd had failed to remove decay.

Boyd was removed from the NHS practitioners’ list after a misconduct hearing in 2006.

In 2007, he admitted a series of misconduct charges involving sub-standard dental care and was suspended for five months.

He failed to attend a review hearing in June 2008 and was banned from working for another 12 months.

Mr Boyd did not attend his hearing at the GDC.

Rochdale sees NHS boost

Rochdale is to get five new NHS dentists as part of a £1.3 million plan to improve dental services in the area.

NHS Heywood, Middleton and Rochdale want to open a surgery in Brimrod with four NHS dentists.

A fifth dentist will be based at an existing practice in Littleborough.

It is hoped that the extra dentists will be in place by the end of the year.

All of the dentists will provide NHS treatment and are expected to treat an extra 17,000 patients.

Caroline Williams, the Trust’s primary care dental lead, said: ‘We have been working really hard to bring more dental services to the borough and it’s fantastic that we are able to do this before the end of the year.

Access to NHS dentistry has slowly improved over the past two years but these new services will accommodate in the region of 17,000 new patients when at full capacity, significantly boosting our local NHS dental services.’
Patient left to suffer ‘extreme pain’

A dentist has been accused of leaving a woman to suffer months of ‘extreme pain’, according to a misconduct hearing at the General Dental Council.

Simon Rudland, of Falgrave Road surgery in Scarborough, installed bridges to the patient’s upper and lower mouth between 2005 and 2006.

The woman told the hearing at the General Dental Council (GDC) that the pain was so bad she was unable to sleep at night.

She had a number of further appointments with Mr Rudland but he failed to correct the problem.

He said that he thought Mr Rudland did not carry out enough investigations into the cause of pain as there were no radiographs.

The GDC heard that Mr Rudland sold his practice in 2006 and moved to Spain where he is thought to be living in Marbella with his wife. He has not been present at the hearing.

If found guilty, he could be struck off.

The hearing continues. 📚

UDA system ‘bad’

Over 80 per cent of dentists disagree with using units of dental activity as a way of measuring the work they do, according to a recent survey.

The survey carried out by Challenge, a pressure group for dentists, found that 91 per cent of respondents believe that the introduction of units of dental activity (UDAs) to measure activity, has had a damaging influence on diagnosis and treatment planning for patients.

While 89 per cent felt that the new contract did not make it easier for them to give preventive advice and treatment for their patients than previous General Dental Service (GDS) arrangements.

A spokesman for Challenge said that the findings showed that ‘dentists working within the GDS feel that UDAs are a bad system, damage treatment planning and do nothing to encourage prevention’.

He added: ‘They also feel that the contract makes providing appropriate care more difficult, produces more financial risk, alters the management of disease and that patients are less happy.

Newly qualified dentists don’t find the contract easy to manage, don’t feel their education and skills are fully used or that UDAs measure work effectively.

While dentists outside the GDS withdrew from the GDS because of the introduction of the contract, they found more untreated disease on new patients than before.’ 📚

Smile-on helps deliver better oral health

Smile-on, the learning resources provider, has come up with an innovative e-learning solution to help dental practices implement Government guidance on improving patients’ oral health.

The two-hour programme, ‘Prevention in Practice: Using Delivering Better Oral Health’, was developed by Smile-on at the request of NHS Education South Central (NESS).

It has had input from members of the team that produced the Delivering Better Oral Health toolkit, which was sent to all NHS practices in England in 2007, by the Department of Health.

Dr Gill Davies, specialist in dental public health for Manchester Primary Care Trust, who wrote some of the educational material on the DVD said: ‘It deals with issues such as the best ways of communicating with patients and overcoming opposition within the practice and the perceived barriers to integrating preventive activity for every patient.’

She added: ‘A variety of teaching methods are used, including short film sequences, illustrations of key points and indications of the sources of the evidence on which the prevention toolkit is based. It is interactive in that it asks questions about attitudes at the start of each topic and then checks on knowledge gained at the end.

It can be watched from start to finish or the user can dip in and out of topics as they choose – the screen is very user friendly and constantly shows the stage the viewer has reached.’

The e-learning package can either be downloaded online or bought as a CD-ROM.

The programme is open to all dental professionals from dentists to orthodontists to hygienists.

Each DVD provides two hours of CPD.

For more information on the programme, call 020 7400 9980 or email info@smile-on.com. 📚 ☑️

Army dentist treats Kenyan villagers

A dentist with the Royal Army Dental Corps is currently visiting remote villages in Kenya, providing ‘once in a lifetime’ dental care for the villagers.

Captain James Scott, a dentist with the Royal Army Dental Corps, is one of 151 British Army medics, on exercise in Kenya, giving dental treatment, primary health care and inoculations to people in remote locations across Kenya.

Captain Scott has spent four weeks out there setting up temporary mobile dental clinics which provide villagers with often their only chance of dental care in their lifetime.

There is such a demand for the treatment that some villagers have walked more than 50 kilometres to be seen in the clinics which open at 8am and close when it gets dark.

Captain Scott said: ‘Most teeth we have been looking at have tooth decay, so if there is imminent pain, we suggest taking it out because the patients are unlikely to see dental care soon.

In some cases, we are providing the first and last dental care some of our patients will see.’ 📚
Filling baby teeth may have ‘no benefit’

A

n NHS study is looking at
treatment options, after
research found that filling
baby teeth may have ‘no signifi-
cant benefit’. Around 40 per cent
of five-year-olds in the UK have
tooth decay and at least one in 10
of these is treated with fillings.

Researchers from Manches-
ter looked at case notes of 50 den-
tists, which suggests that filling
baby teeth may achieve nothing
but expose children to the dis-
comfort of an injection and the
sound of the drill.

Children receive a wide vari-
ation of care on the NHS with
some dentists choosing to give a
filling with another opting to ex-
tract it.

Professor Martin Tickle, of
the University of Manchester,
found no difference in the num-
bers of extractions for pain or in-
fecction whether baby teeth had
been filled or not.

He also carried out a survey of
the parents of all five-year-olds
living in Ellesmere Port and
Chester in 2005, and found only
six per cent would want their
child to have a filling if they had
symptomless decay in a baby
tooth.

While a third would want the
dentist to monitor the tooth but
provide no treatment.

Kamini Shah, honorary sec-
etary of the British Association
for the Study of Community Den-
tistry, said: ‘There are two
schools of thought, one being
that baby teeth can cause pain
and sleepless nights and so den-
tists should fill.

The other is that actually the
evidence around filling baby
teeth is questionable.’

Advisers to the NHS are now
beginning a study on treatment
options to provide dentists with
clear evidence-based guide-
lines.

Experts working for the
Health Technology Assessment
Programme want to recruit over
1,000 children from across the
UK to take part in a study that will
compare the outcomes of three
treatment options.

They are drilling and filling,
no fillings or a painless paint-on
tooth treatment that merely seals
and contains the decay.

The trial will run for four
years from 2011 across England,
Scotland and Wales.

Charity
appeals for
donations

T

he Dentists’ Health Sup-
port Programme made an
appeal for more dona-
tions at the Local Dental Com-
mittee’s annual conference in
London.

The charity gives support to
dentists suffering from alcohol
and drug addiction. It is esti-
mated that one in 10 dentists suf-
fer from an alcohol or drug-re-
lated problem.

Brian Westbury, chairman of
the Dentists’ Health Support
Trust which runs the pro-
gramme, said: ‘We save the pro-
fessional and personal lives of
these people and every year we
take on about 70 new cases.

We inevitably have a growing
caseload. Many of these col-
leagues are helped to a stable
condition. None however are
truly cured and they may need
access to our help and support at
any time they feel vulnerable.’

The Trust enables the pro-
gramme to run a 24-hour service
with access to its co-ordinators
and UK wide network of volun-
tary special referees. The Trust
pays for the co-ordinators and
their expenses but not for the
dentists’ treatment, which must
be funded privately or through
the NHS.

Any donations should be sent
to the Trust’s treasurer Michael
Stern, 48 Pollard Road, Whet-
stone, London N20 OUD.
Scotland gets advanced treatment

Two dentists in Scotland have opened one of the country’s most advanced treatment centres combining dental treatment and alternative therapies.

Biju Krishnan and Lubino do Rego have opened Lubiju in Edinburgh, which offers some of the most hi-tech treatment techniques and equipment available in cosmetic dentistry.

The pair already run the Scottish Dental Implant Centre open to NHS patients, a specialist facility in Edinburgh, dedicated to providing patients with solutions to missing teeth or loose dentures.

Dr Krishnan said: "We're really excited about the possibilities at the new practice. Scotland has a patchy dental record and we are now at the leading edge of bringing the best new techniques and technology into the country.

We are looking at everything from the most advanced implants and surgical methods, to breakthroughs in needle-free and painless treatments and also the most up-to-date cosmetic dentistry."

Recession hits BDA Fund

The British Dental Association Benevolent Fund is struggling financially in the current economic climate with more and more people appealing for help.

Ian McIntyre from the Fund said: 'One of the problems is that beneficiaries are getting younger so they will be dependent on the Fund for considerably longer. The youngest applicant we have had was 24. We are currently helping the twins of a 35-year-old female dentist who recently died.

Her husband is a tenant farmer and the most up-to-date cosmetic dentistry."

Applications to the Fund are up 50 per cent on the year before and we are helping them to get back on their feet.'

The Fund operates by giving loans of up to £250,000 to dentists and their families.

However, the recession has hit the amount of money the Fund has tied up in bank dividends and it is 'facing a reduced income stream combined with an increased demand for help'.

Any donations are much appreciated. For more information, go to www.bdabenevolentfund.org.uk.
News & Opinions

DCPs storm GDC website

There has been a surge in the number of dental professionals using the General Dental Council’s website, since its relaunch.

Over 2,600 dental care professionals (DCPs) have created accounts on the General Dental Council’s (GDC) website, eGDC, since it was re-launched in April this year, according to figures from the GDC.

This brings the total number of dental professionals who are using the site, first launched last November, to over 7,200.

The eGDC site is designed to make things as easy as possible for registrants to keep on top of registration requirements at the click of a mouse.

It allows users to update their contact details, pay their annual retention fee and, in the future, submit continuing professional development returns.

A spokeswoman for the GDC said: ‘Whilst the new situation code exists on the site, users will now be able to make things as easy as possible by registering on the site, since its relaunch.

Over the years, and is delighted to continue supporting DCPs in particular take advantage of eGDC this summer.

They’re fast approaching the 31 July deadline to pay their annual retention fee and eGDC has plenty of extra information about how they can do that.

Some DCPs will also be asked to complete their continuing professional development returns this August and will be able to submit this on eGDC.

The deadline for all DCPs to pay their £96 annual retention fee and eGDC has on the site, since its re-launch.

For more information, contact the GDC customer service and information team on 0845 222 1141 or email CAIT@gdc-uk.org.

The topics to be covered during the day include justification and scope of orthodontics, background and principles of the PDS contract and orthodontic monitoring and BDA reports.

There will also be information on handling practice sales and retirements, referral management, the benefits of local managed clinical networks and dealing with orthodontic tenders and re-commissioning.

Registration for the meeting is free, but places must be booked in advance.

Lunch and refreshments will also be provided free by the British Orthodontic Society.

More information and a booking form is available from www.bos.org.uk.

BOS Education Day

The British Orthodontic Society is organising the UK’s first National Orthodontic Commissioning Education Day.

The event will be held this September and the day is aimed at individuals or organisations who are directly or indirectly involved in commissioning NHS orthodontic services.

A spokeswoman for the British Orthodontic Society (BOS) said: ‘Whilst the new contractual arrangements of 2006 in England and Wales brought about a number of positive changes, there are still many issues that would benefit from further clarification and guidance.

With this in mind, there is no doubt that shared knowledge between strategic health authorities, primary care trusts (PCTs), orthodontic managed clinical networks and providers is of huge benefit.

After discussion with both commissioners and the Department of Health, the British Orthodontic Society is keen to help facilitate this process and so is organising the day-long event as a parallel session at its annual conference which takes place on Tuesday 15 September in Edinburgh.

The BOS has already run a number of education days at a local level in the last year and these will form the blueprint for the first national event.

During the day, delegates will learn at first hand about several examples of commissioners and providers successfully working together as part of local clinical networks and there will be good practice to share with those involved with commissioning.

The BOS wants this day to be as inclusive as possible and, with that in mind, has announced that representatives from PCTs, the BSA, the Department of Health, as well as the British Orthodontic Society will give presentations.

Bridge2Aid has a ball

Tickets are now on sale for this year’s Bridge2Aid charity ball – a UK charity offering dental and community development programmes in North-West Tanzania.

The Bridge2Aid charity ball will be held on 15 November at the Hilton Metropole Hotel in Birmingham at the 2009 British Dental Trade Association (BDTA) Showcase and is being sponsored by Dentsply.

The Bridge2Aid charity runs a not-for-profit dental clinic, an innovative dental training programme for local health workers, and a community development programme helping the poor and disabled in North-West Tanzania in Africa.

A spokeswoman for Dentsply said: ‘Dentsply has provided continuing support to Bridge2Aid over the years, and is delighted to assist with the organisation of such a highly anticipated event.’

Tickets to the ball cost £42 each.

For further information on Bridge2Aid, please visit www.bridge2aid.org.
