NEW CEREC® AC from Ceramic Systems
(CEREC®) makes impression free
dental practice a reality

The NEW CEREC® AC from Ceramic Systems (CEREC®) enables Clinicians to capture whole jaw arches – quickly and conveniently – without the need for impressions. It combines the NEW Bluecam camera with updated CEREC® 3D software, making it even easier to operate.

Bluecam features high-performance LEDs which deliver optical impressions of unprecedented precision: this ensures the final restoration's excellent accuracy of fit, speeds up the bonding process and reduces any excess luting cement to be removed. Each exposure triggers a series of measurements which are combined to generate the final image, which is virtually distortion-free even in peripheral areas. It can acquire optical impressions anywhere in the mouth, even those inaccessible to other cameras.

Bluecam delivers razor-sharp images, its built-in shake detection system enhancing overall precision. Its automatic exposure function and extensive depth of field means the entire impression-taking process can now be delegated.

For further information, contact Ceramic Systems Limited on 01952 582950, e-mail c selvill@ceramicssystems.co.uk or visit www.ceramicssystems.co.uk.

Extra Revenue Stream

Ever thought how you might expand the range of services you offer in the practice? What about considering facial aesthetics? After all, your knowledge of head and neck anatomy is second to none and even in the current economic climate this market is expect to grow 20-50% in 2009.

Getting started is easy. All you need to do is undertake specialist training by a recognised provider in order to gain the appropriate insurance.

Med-fx Training is a Hertfordshire supplier who offers courses in one of five locations – London, Manchester, Newcastle, Birmingham and Glasgow. Their courses are conducted by experienced trainers all of whom routinely practice facial aesthetics alongside either dentistry or medicine. After your training you are fully supported by Med-fx Training. You will be given a free post-course support e-mail address where you can make contact with your trainer should you have any questions or queries.

If you wish to register for a course, or find out more about the treatments, please visit www.med-fxtraining.co.uk.

Miris 2

Miris 2 is a development and improvement based on existing Miris outstanding technology. A radio-opaque, highly filled nano-hybrid composite providing excellent restorations that meet the highest expectations with harmony of light, material and colour; a new way to look at aesthetic dentistry from Coltene Whaledent.

This simple system enables you to change the torque, speed and ratio in just a few clicks. With 20 pre-set programmes in 10 designed specifically for endo work and 10 for operative procedures, the Optima MX INT allows you to set a further 20 programmes to your personal requirements. This good looking unit will suit all surgery décor and the unique mounting system allows optimum visibility.

For further information please contact Bien-Air on 01596 711 905 or visit www.bienaire.com.

Leading the way with flowable innovations

Accolade PV Veneer Placement System is a fantastic innovation from leading US company Danville and is now available in the UK from leading supplier Evident. Accolade PV includes a unique try-in paste, which is placed directly on the silane, allowing the veneer to be simultaneously tried-in for fit and colour. Accolade PV’s try-in fantastic aesthetic results due to the unique particle structure and light reflectiveness of Graha Direct.

Accolade PV Starflow and Accolade SRO are available exclusively from Evident. For more information please contact Evident on 0800 711 1211 or visit www.evident.co.uk.

Two NEW Gradia Direct Shades

You are not unusual if you find that you sometimes compromise your composite aesthetic results by using a single shade of composite for the majority of your patients. Help is now at hand with GC Gradia Direct.

Due to the remarkable shade adaptation of Gradia Direct to the surrounding tooth structure, you will be astonished by the brilliant aesthetics of your restoration, even when you use only one shade. This material will provide you with which is the first of its kind to combine 3 types of nano-particles, www.BestComposite2009.com. Additionally the Blue Phase LED Curing Light also won top honours.

Top Anterior Ceramic 2009 was awarded to the IPS Empress system, the leading all-ceramic material for meal-free restorations.

The final accolade for Top Resin Cement was given to the Ivoclar Vivadent Multilink Automix. The high, immediate bond offers many advantages, is set fast and is easy to apply creating a strong link to all types of restorative materials.

Darryl Muff, General Manager, Ivoclar Vivadent UK comments, “It is so rewarding for the entire team to receive such prestigious recognition and these awards reflect the quality incorporated into the design and innovation across our product portfolio.”

Herculite, a brand you can trust – Improved

Were you a loyal Herculite user but technology and patient demand forced you to use the latest nano composites? Now nano technology is available in the brand new Herculite XRV Ultra.

For over 20 years, Herculite XRV has been the standard of the industry for composites. Dentists have filled over 250 million teeth using Herculite XRV. Following a legacy of innovation, quality, and success, Kerr is making history again, launching another breakthrough composite connected to a powerful brand: Herculite XRV Ultra nanohybrid composite — an other high-quality product clinicians can trust from Kerr.

Herculite XRV Ultra is an extension in Kerr’s composite line that offers a highly aesthetic composite restorative for anterior and posterior use. The ever popular original Herculite XRV...
still sets a standard as the tried and tested micro hybrid com-posite with proven perform-ance, it will not be discontinued.

The extended Hercule family covers all demands in the modern day dental practice.

For further information please contact Kerr UK on 01755 802929.

Building on CEREC success.

The chairside CEREC 5D CAD/CAM system couldn’t be simpler. After taking an optical impression of the preparation and the antagonist, you are in complete control of the finished prosthesis. You specify the position of the margins and the proximal contacts. From there on the CEREC system fabricates the crown, inlay, onlay or veneer accurately, quickly and to the very highest quality. The finished prosthesis is highly aesthetic and exhibits excellent strengths. CEREC automatically and accurately computes the occlusal contacts referring to the antagonist to do so.

Using the CEREC system you will produce perfect chair-side ceramic restorations. The system allows you to place the new prosthesis in the same visit saving you and your patient time, laboratory fees and ultimately making your business more profitable.

To find out how the Sirona team can directly support your practice and for a no ob-ligation demonstration of the CEREC 5D system telephone 0845 871 5040 or email: info@sironadental.co.uk, www.sironadental.co.uk.

Seminar Success For Ivoclar Vivadent

An extremely favourable re- sponse has been received from those who attended the Ivoclar Vivadent seminars recently held in Lichtenstein and the UK. Many have stated the positive benefits and relevance in attending the workshops, with some expressing an interest to attend future seminars that will be held later in the year on a va- riety of topics.

A substantial number of delegates who attended the first seminars hosted by the company felt the courses proved in- valuable in relation to impor-tant aesthetic dentistry topics. Developed to help further strengthen the skills of dental teams by enabling dental prac-titioners to achieve greater client care and long-term suc-cess individually, the courses will continue to run throughout the year at various locations.

Darryl Muff concludes, “it is always invaluable to listen to the opinions of industry profes-sionals who have a wealth of ex- perience from which everyone can draw initiatives.”

For more information on other seminars being run by Ivoclar Vivadent please call 0116 264 1786.

The Full Complement from Dental Sky

Being the exclusive supplier of R&S products in the UK, Den-tal Sky has brought together the perfect combination to enable you to place the perfect restoration.

The first step is to use Supraetch. This 57% phosphoric acid provides effective etching every time.

Step 2 is to use Suprabond single step bonding agent. Due to the high level of adhesion, micro-leakage around the mar-gins is virtually eliminated, al-lowng for a more durable restoration without the risk of secondary caries forming.

Step 3: Suprafil micro hybrid composite is perfect for both an-terior and posterior regions, Class I to Class V; due to the combination of a superior abra-sion resistance and the high translucency of the enamel shaper, you can work on the instrument; it stays exactly where you place it.

The lightweight, fully auto-clavable handle is ergonomi-cally designed for your ultimate comfort. It incorporates wide, flat buttons that are clearly set out, for ease of use.

For further information or to place your order please call Dental Sky on 0800 284 4700.

Highline Bespoke Endodontic Storage Solutions

Highline bespoke health-care storage solutions, from Support Chairs, incorporate a variety of features designed to make Canal Therapy even easier and more efficient. Available in a choice of nine formats they are extremely versatile and cost effective.

Composed of modules, containing sets of 4 different drawer sizes, they can be combined in to meet the needs of the workplace and to create units of the required height, width and mixture of drawer sizes. Some models feature an open space for storing equipment etc or a glass fronted cupboard with a height adjustable shelf. All are fitted with high quality wheels, offering high ground clearance for easy movement and hygiene, and handles as standard.

Highline offers a very eco-nomical alternative to tradi-tional fixed cabinetry.

For further information contact Support Chairs on 01296 581764, fax 01296 595685, email sales@supportstool.co.uk or visit www.supportstool.co.uk.

Embrace Endodontic Success!

Mrs ProTaper Universal lies at the centre of most successful Endodontic procedures in the UK. It’s not just that she cuts quickly ensuring effi-ciency, whilst maintaining flex-ibility, whether you are heading straight or into a curve. She doesn’t mind how experienced you are, whether you are a GDP who hasn’t used her before or an Endodontist, she’s high qual-ity and easy to work with, ensur-ing excellent and consistent re-sults every time. She’s a true ex-ception – let her be at the centre of your endodontic success.

DENTSPLY’s Rotary En-dodontic Procedural Team un-derstands that excellence in en-dodontics is a must. So from ac-cess to restoration we will help you achieve consistent repro-ducible results. Each of the high quality products work perfectly together achieving excellent clinical outcomes, offering a simple, cost effective and pre-dictable way to excel in en-dodontics. “Embrace endodontic suc-cess” with DENTSPLY’s Rotary Endodontic Team!

Access with Mr Start-X™ Ultra-trasonic Tips “Access all areas”

Shaping with Mrs ProTaper™ Universal Rotary File “She’s a true exception”

Irrigation with Mr Glyde™ EDTA-based Lubricant “A smooth operator”

Obturation with Miss AH Plus™ Sealer “No compromise” & Mr Thermafil® heated Gutta Percha “Easy as 1, 2, 3-D”

Temporary Restoration with Mr Chemfil Molar® Glass-ionomer “He’s slick and non stick”

“ProTaper Universal is the mar-ket leader with 56.6% market share” (Q1 09 SDM data)

For more information or to book an appointment please contact your local DENTSPLY Product Specialist on: +44 (0)800 972 8310 or visit our web-site: www.dentsply.co.uk.

The exponential progress bar extends beyond the apex. This is accompanied by differenti-ated acoustic signals.

accurately Controlling Your Hand-piece Speed

The Optima MX INT system from Bien-Air provides a com-plete and reliable solution for your endodontic work.

With an easy to use, intu-itive display the Optima MX INT converts your air-driven system to an upgraded electric operation allowing, for exam-ple NiTi endodontics to be cov-ered with a standard 1:1 con- tra-angled handpiece. Most other procedures are covered with just two contra-angles (1:1 and 1:5), thus replacing several conventional instru-ments saving time and ex-pense.

This simple system enables you to change the torque, speed and ratio in just a few clicks. With 20 pre-set pro-grammes, 10 designed specific-ally for endo work and 10 for operative programmes, the Optima MX INT allows you to set up further programmes to your personal requirements.

As soon as the file reaches the apex of the root canal the-odontist can reverse the direc-tion of rotation via the foot switch.

Version 5.2 of Sirona Dental Systems’ SIROEndo software is the passport to more ef-fective and convenient root canal treatment. As soon as the dentist reaches the apex he can reverse the rotation of the file – either on the SIROEndo unit or via the foot control. Some brief touch is enough to change from clockwise to counter-clockwise rotation and vice versa.

Introduced six months ago, the new apex indicator keeps the user informed at all times. The exponential progress bar now consists of eighteen blocks as opposed to six. It in-dicates the distance between the file tip and the apex. When the file tip reaches the apex an “A” is displayed. The message “-1” is shown as soon as the tip extends beyond the apex. This is accompanied by differenti-ated acoustic signals.

For further information please contact Sirona Dental Systems 0845 971 5040 Info@sironadental.co.uk.

**Bridge 2 Aid Review**

On the 4th of April 2009 a team of 10 Izzy Mintova Minerva employees and 1 dentist flew off to Tanzania to renovate a dormitory in the village of Bukumbi. The team spent two weeks working alongside charity Bridge 2 Aid, to help in their bid to build a sustainable future for the residents of the Bukumbi Care Centre.

"I am delighted to be using Cariescan PRO™. For the first time we have a tool that can detect cavities in a pit or fissure and have a validated reason for leaving it or removing it. The results can be recorded for monitoring decay, without being operator sensitive."

For more information on the outstanding benefits Cariescan PRO™ can offer you, call the dedicated team on 0845 473 9873 or visit www.cariescan.com.
Fluid Abrasion is concerned! The latest Velopex Aquacut Quattro has been installed in Dr Marketta Keller’s busy Department in the Dental Institute. This light and airy building provides a superb backdrop for this busy department — which now offers all patients the availability of fluid abrasion: Cleaning and Treating, in a calm soothing environment. Dr Kellerhaer commented: “I’ve got one in my private practice as well and I’m happy to call myself a user”.

DENTALTRIBUNE

GlaxoSmithKline’s Talking Points in Dentistry lecture series just keeps getting better!

GlaxoSmithKline (GSK) is delighted to announce that it has achieved record-breaking attendance figures for its 2009 Talking Points in Dentistry lecture programme. With almost 5000 delegates over the seminar series, the attendance at the Motor Cycle museum in Solihull was up by 100% totalling 900 delegates alone.

For three weeks, the event aimed at the whole dental practice, visited 9 venues across the UK offering topical evening lectures to the whole practice team. Speakers this year included Philip Ower, Graham Smart and Ashley Latter.

Jeremy Meader, Sales Director Pharmacy and Dental Channels, comments, “The premise of Talking Points has always been to provide further education in an engaging and entertaining manner. Using the positive feedback that we have received from delegates over the years, has meant that Talking Points has grown into the largest dental seminar programme in the UK.”

It is vital that dental patients are made aware that gum health is paramount in keeping teeth healthy and that effective oral care can maintain gum condition, avoiding the deterioration that eventually leads to the onset of periodontitis.

The leaflet is packed with concise, clear information to help patients identify if their gums are healthy, the causes of gum disease and what to do if they are experiencing any of the symptoms described. The leaflet outlines exactly how dentists will assess gum health and what the treatment options are for controlling gum disease. There is also extremely useful information on preventing the deterioration of gum health.

Blackwell Supplies provides a highly effective yet affordable range of oral health care products to dental professionals, including products for use as an adjunctive treatment in scaling and root-planing when treating chronic adult periodontal disease.

A Tale of Refurbishment

It was time for a ‘makeover’ of my associate’s surgery, which would mean stripping the walls back to the brick, rewiring, re-plumbing and then replastering the whole room.

My bête noire is exposed pipework, and with careful planning and astute cabinetry placement, I was determined that the plumbing and wiring should be hidden within the walls and plastered over.

The choice of cabinetry had to take into consideration the decor of the rest of the practice, where we have bold reds and greens echoed throughout the other treatment rooms.

I was impressed with the elegant Tavom cabinetry range, offered by my local equipment dealer, RPA Dental based in Wigan whilst all the Tavom series is designed in Italy, my cabinetry were assembled for me locally at RPA Dental.

Working with Tavom was a real pleasure, and our major refurbishment was successfully completed within two weeks.

For further information please call Tavom UK on 0870 752 1211. Mr David Rhodes BDS can be contacted on 0161 8815599.

VOCO shows its latest innovations on the BDA conference in Glasgow

High-quality products “Made in Germany” for different indications

Several brand new products for different indications have been presented by VOCO on the British Dental Conference and Exhibition. Such as the non-running, non-dripping syringe based on the innovative non-dripping technology (NDT®) especially for highly flowable materials. The new NDT® syringe permits the products to be applied in exactly the desired amount without material waste. This means procedure that is not only safe and hygienic, but also economical.

New restorative in Gingiva shades

With Amaris Gingiva VOCO releases the only restorative that permits chair side gingival shade matching for highest standards in aesthetic dentistry. This new material permits the reconstruction of the “red window” to a much smoother cut for finer work.

For more information or to ask any questions, please contact: Mark Chapman Medivance Instruments Ltd Barretts Green Road LONDON NW10 7AP Tel 07754 048687

Exceptional Design, Outstanding Delivery

Genus provides a cost effective, high quality Design and Build service to the dental market, working closely with dentists to enable them to develop their own unique vision of a practice. The Genus team uses advanced software to create designs and provides advice on all fixtures and equipment before over seeing construction phase, to ensure that all runs smoothly.

Alison Telfer of the Glasshouse Clinic in Clapham, London felt that Genius truly understood and followed the brief to deliver a stunning practice design. “Nothing was too big or too small, nothing was a problem. They were amazing.” She praised the way they worked as a team and added, “The design is so exceptional that we’ve had lots of people popping in and asking about the design. Genius really delivered an outstanding package.”

Genus prides itself on creating top quality surgeries in line with the dentist’s vision, fully equipped to meet the needs of the whole dental team.
