entrapments which hinder the cleaning process, will disappear. A comprehensive range of accusamed® products/ solutions are available to efficiently clean and disinfect instruments, prostheses, and other items throughout the dental practice.

If you would like further information or to arrange a demonstration call free phone 0500 294 4700 or email sales@primedigital.co.uk.

Kerr’s Solutions for Infection Control

Have you ever had to deal with staff shortage and busy days, high-risk patients or autoclave breakdown? The new Sterile Oral Health Examination Kit from Kerr is here to help. This pre-sterilised examination kit is also perfect for domiciliary visits.

This small sterile package contains a tray with disposable instruments including a stainless steel explorer probe, tweezers and mirror. Also included are a patient bib, a napkin, 2 cotton wool rolls and 2 latex-free ‘ear loop’ masks. The sterile examination kits stack neatly for easy storage and are available in compact boxes of 50.

The kit was developed in 1997 by a maxillofacial surgeon who recognised the need for dentists to offer every patient a routine examination using a complete sterile kit. First introduced into dental practices in China the sales have grown to date in excess of 7 million kits per year. Users of the product already claim savings in autoclaving costs making it one of the most cost-effective products that you can buy today.

For further information please contact Kerr on 01755 892292.

Decontamination and Disinfection for Your Dental Instruments from Dental Sky

Many hospitals are taking advantage of theSterisafe burs to ensure complete infection control, particularly oral surgery departments and those clinics offering implant treatments. It has been shown that oral surgery burs may carry a risk, albeit low, similar to that of endodontic instruments in the possible transmission of vCJD. For absolute peace of mind Sterisafe burs are the only option.

For further information please contact Prima Dental Group on (0044) 1452 507 171 or visit www.primadentalgroup.com.

Pre-sterilised Burs from Prima Dental Group

With increasing emphasis being placed on infection control within the surgery environment, and in view of the recent well publicised reports regarding re-use of dental instruments, Prima Dental Group are proud to offer you the Sterisafe range.

At last a full range of burs are available in pre-sterilised packaging only from Prima. Whether you are looking for diamonds, tungsten carbide or steel rotary instruments Prima are able to supply the full complement.

More information is available from Prestige Medical direct by calling 01254 844 105 or email sales@prestigemedical.co.uk. In particular they make it their business to understand the requirements of their customers and to ensure complete infection control, particularly oral surgery departments and those clinics offering implant treatments.

IPS Empress Direct offers the aesthetic and ceramic combined with the convenience of a composite – due to a wide range of shades, various levels of translucency and good process properties.

The light-curing nano-hybrid composite IPS Empress Direct is based on the latest composite technology and was developed in cooperation with research, dental professionals and colour specialists. Due to the lifelike shades and opacities, natural looking and aesthetic results can be achieved for all indications.

IPS Empress Direct offers the advantages of all-ceramics and high-excitonic ceramics which will also improve the cleaning and disinfection of hand pieces.

Due to the lifelike shades and opacities, natural looking and aesthetic results can be achieved for all indications.

Anterior aesthetic

The properties of IPS Empress Direct are shown to full advantage in demanding anterior restorations in particular. The wide range of 55 dentin and enamel shades in five levels of translucency allow teeth to be faithfully reconstructed. Two high-end shade guides ensure that the quality of the shade selection, as the starting point of every highly aesthetic restorative procedure, is consistent.

Convenient handling

IPS Empress Direct offers high stability, shade fidelity and excellent modelling and polishing properties. The material’s handling is also exceptional: As the natural dentin is simply replaced by Dentin material and the enamel by Enamel material, there is no need for a “recipe”. Even the physical properties meet the highest demands, such as an optimum radiopacity and a low sensitivity to light. As a result of the low light sensitivity, enough time is available to design the restorations without pressure.

Proven system with new options

For nearly 20 years, IPS Empress has been synonymous with all-ceramics and high excitonic aesthetics for the reconstruction of dental defects. With the introduction of IPS Empress Direct, the aesthetics of the ceramic are now combined with the convenience of a composite.

IPS Empress Direct is available both in syringes and in Cavifills.

For more information please call Mark Chapman on 07774 044872, or your normal Dealer.

Calypso: Fighting bacteria with a tropical twist

Septodont’s fresh tasting Calypso mouthwash is specifically designed to cleanse and freshen the patient’s mouth before, during and after dental treatments.

Not only does Calypso mouthwash clean, but contains chlorhexidine gluconate which acts as an antiseptic agent against bacteria, viruses, bacterial spores and fungi infections.

Calypso is supplied in an assorted pack or as individual sachets per patient.

Monobond Plus – one primer for all materials

With Monobond Plus, Ivoclar Vivadent is pleased to announce the launch of a universal primer that helps establish a reliable bond to all restorative materials.

Monobond Plus meets a requirement that is essential for dental professionals: ease of use. The innovative combination of three different functional groups – silane methacrylate, phosphoric acid methacrylate and sulfide methacrylate – enables a strong and durable bond to be established to any restorative material.

Therefore, there is no need to purchase and store different primers for different materials.

Uniform reaction time, easy storage

Not only is the easy conditioning of the restorative surface an attractive feature of Monobond Plus. The primer also simplifies the bonding procedure, because a uniform reaction time of 60 seconds is needed on all the various material surfaces.

In addition, Monobond Plus does not require cool storage. The universal primer can be stored at room temperature.

Contact keith.morgan@sybronde.com or email keith.morgan@sybronendodental.com.

The British Academy of Cosmetic Dentistry is holding its 8th annual conference at the EICC in Edinburgh from the 19th to 21st of November. The leading source of innovative education, the BACD promotes a dynamic attitude to developing techniques, materials and skills in all areas of Cosmetic Dentistry.

Recognising a shift in preference from traditional orthodontic methods to less invasive dental treatment, the BACD presents ‘Simple Orthodontics For You and Your Patients – Panel Presentation’. Demonstrating the latest techniques available for GDP’s, each speaker is a pioneer in their field of alternative orthodontic treatment.

Attendees will gain confidence from demonstrated implementation techniques and explore a wide range of simple orthodontic systems to address both the patient’s aesthetic and functional needs.

Cosmetic Dentistry is moving away from aggressive tooth preparations and toward less invasive pre-alignment and alignment techniques. Ensure you are at the forefront of Cosmetic Dentistry in the UK and secure your place at the 2009 BACD!

For more information or a booking form please contact Suzy Rowlands on 02082 418526 or email suzy@bacd.com.

No-Rust Cleaning solution – New Omnisan Forte from PANADENT

Ideal for cleaning and storing all dental equipment, the new Omnisan Forte cleaning solution with benzenthion kills 99.9% of microorganisms with 30 seconds (undiluted) and 5 minutes at 1:2 dilution (British Standard tests). More concentrated than most leading brands and with up to 15 days lasting action, Omnisan Forte represents outstanding value for money as an everyday cleaning solution in the surgery. RRP: £19.50 plus VAT and carriage.

Universal primer suitable for all restorations

The all new GALILEOS Comfort and GALILEOS Compact systems offer noticeable improvements in the sphere of 3D X-ray equipment. Using innovative collimation these models will further reduce the radiation dose by 15% in comparison to the already low full volume dose of the original GALILEOS. The new GALILEOS collimation allows selection between 5 settings: Full, Mandibular view and Maxillary view. These enhanced views result in faster reporting times when follow-ups do not necessitate full volume images. Additionally the GALAXIS v1.7 upgrade further increases image quality and panorama precision.

& Tooth Paste contains a special combination of plant extracts and mineral salt which means that it has a unique taste which may take a couple of weeks to get used to.

Interested participants can sign up for the challenge at www.gumsmart.co.uk. They will then receive a £1 coupon to redeem against a purchase of the toothpaste. Participants can view other people’s experiences of the challenge for 21 days on the website and will also receive supportive advice from a panel of experts over the three weeks of the challenge.

Join the Corsodyl 21 Day Challenge For a Healthy Mouth

With 90% of people suffering from gum disease at some point in their lives, it’s important to maintain healthy gums and teeth everyday. That’s why GlaxoSmithKline (GSK) Consumer Healthcare launched new Corsodyl Daily Gum & Tooth Paste.

To coincide with the launch GSK is inviting people wanting to maintain healthy gums to take the ‘Corsodyl 21-day challenge’.

Participants to the Corsodyl 21-day challenge will be encouraged to use new Corsodyl Daily Gum & Tooth Paste in place of their regular toothpaste for 21 days. Corsodyl1Daily Gum & Tooth Paste contains a special combination of plant extracts and mineral salt which means that it has a unique taste which may take a couple of weeks to get used to.

Interested participants can sign up for the challenge at www.gumsmart.co.uk. They will then receive a £1 coupon to redeem against a purchase of the toothpaste.
