Kerr’s Solutions for Infection Control

Have you ever had to deal with staff shortage and busy days, high-risk patients or autoclave breakdown? The new Sterile Oral Health Examination Kit from Kerr is here to help. This pre-sterilised examination kit is also perfect for domiciliary visits.

This small sterile package contains a tray with disposable instruments including a stainless steel explorer probe, tweezers, and mirror. Also included are a patient bib, a napkin, 2 cotton wool rolls and 2 latex-free ‘ear loop’ masks. The sterile examination kits stack neatly for easy storage and are available in compact boxes of 50.

The kit was developed in 1997 by a maxillofacial surgeon who recognised the need for dentists to offer every patient a routine examination using a complete sterile kit. First introduced into dental practices in China the sales have grown today in excess of 7 million kits per year. Users of this product already claim savings in autoclaving costs making it one of their most cost-effective products that you can buy today.

For further information please contact Kerr on 01753 892292.

Pre-sterilised Burs from Prima Dental Group

With increasing emphasis being placed on infection control within the surgery environment, and in view of the recent well publicised reports regarding the use of dental instruments, Prima Dental Group are proud to offer you the Sterisafe range.

At last a full range of burs are available in pre-sterilised packaging only from Prima. Whether you are looking for diamond, tungsten carbide or steel rotary instruments Prima are able to supply the full complement.

No-Rust Cleaning solution - New Omnisan Forte from PANDENT

Ideal for cleaning and storing all dental equipment, the new Omnisan Forte cleaning solution

Monobond Plus – one primer for all materials

With Monobond Plus, Ivoclar Vivadent is pleased to announce the launch of a universal primer that helps establish a reliable bond to all restorative materials.

Monobond Plus meets a requirement that is essential for dental professionals: ease of use. The innovative combination of three different functional groups – silane methacrylate, phosphoric acid methacrylate and sulfide methacrylate – enables a strong and durable bond to be established to any restorative material.

Therefore, there is no need to purchase and store different primers for different materials.

Uniform reaction time, easy storage

Not only is the easy conditioning of the restorative surface an attractive feature of Monobond Plus, the primer also simplifies the bonding procedure because a uniform re-action time of 60 seconds is needed on all the various material surfaces.

In addition, Monobond Plus does not require cool storage. The universal primer can be stored at room temperature.

Calypso: Fighting bacteria with a tropical twist

Septodont’s fresh tasting Calypso mouthwash is specifically designed to cleanse and freshen the patient’s mouth before, during and after dental treatments.

Not only does Calypso mouthwash cleanse, but contains chlorhexidine gluconate which acts as an antiseptic agent against bacteria, viruses, bacterial spores and fungi infections.

Calypso is supplied in an assorted pack or as individual flavours of Orange, Raspberry and Mint. To use, simply squirt a pump-measured dose of the antibacterial wash into a cup and add water, it couldn’t be easier!

Calypso is formulated for use in the dental practice and is available now. For more information on Calypso and other products offered by Septodont please contact your preferred dealer, call 0800 455 155 or log onto www.septodont.co.uk

Sirona 3D imaging now even more user and patient friendly

Sirona’s all new GALILEOS Comfort and GALILEOS Compact systems offer noticeable advancements in the sphere of 3D X-ray equipment. Using innovative collimation these models will further reduce the radiation dose by 15% in comparison to the already low full volume dose of the original GALILEOS. The new GALILEOS collimation allows selection between 5 settings: Full, Mandibular view and Maxillary view. These enhanced views result in faster reporting times when follow-ups do not necessitate full volume images. Additionally the GALAXIS v1.7 upgrade further increases image quality and panorama precision.

Join the Corsodyl 21 Day Challenge For a Healthy Mouth

With 90% of people suffering from gum disease at some point in their lives, it’s important to maintain healthy gums and teeth everyday. That’s why GSK are launching new Corsodyl Daily Gum & Tooth Paste.

To coincide with the launch GSK is inviting people wanting to maintain healthy gums to take the ‘Corsodyl 21-day challenge’.

Participants to the Corsodyl 21-day challenge will be encouraged to use new Corsodyl Daily Gum & Tooth Paste in place of their regular toothpaste for 21 days. Corsodyl Daily Gum & Tooth Paste contains a special combination of plant extracts and mineral salt which means that it has a unique taste which may take a couple of weeks to get used to.

Interested participants can sign up for the challenge at www.gumsmart.co.uk. They will then receive a £1 coupon to redeem against a purchase of the toothpaste. Participants can view other people’s experiences of the challenge for 21 days on the website and will also receive supportive advice from a panel of experts over the three weeks of the challenge.

The Future of Cosmetic Dentistry

The British Academy of Cosmetic Dentistry is holding its 8th annual conference at the EICC in Edinburgh from the 19th to 21st of November. The leading source of innovative education, the BACD promotes a dynamic attitude to developing techniques, materials and skills in all areas of Cosmetic Dentistry.

Recognising a shift in preference from traditional orthodontic methods to less invasive dental treatment, the BACD presents ‘Simple Orthodontics For You and Your Patients – Panel Presentation’. Demonstrating the latest techniques available for GDP’s, each speaker is a pioneer in their field of alternative orthodontic treatment.

Attendees will gain confidence from demonstrated implementation techniques and explore a wide range of simple orthodontic systems to address both the patient’s aesthetic and functional needs.

Cosmetic Dentistry is moving away from aggressive tooth preparations and toward less invasive pre-alignment and alignment techniques. Ensure you are at the forefront of Cosmetic Dentistry in the UK and secure your place at the 2009 BACD!

For more information or a booking form please contact Suzy Rowlands on 02082 418526 or email suzy@bacd.com.
