Digital Dental

Digital Imaging in the 21st Century

As easy as 1...2...3D!

Cone Beam CT scanning redefines 3-Dimensional cranio-maxillofacial imaging, enabling convenient and comprehensive imaging of the head and teeth in a single 15-minute visit, with no additional radiation exposure when compared to previous radiographic methods.

The new Cone Beam system offers the choice from the complete range of OsteoBiol bone graft material products and membranes including OsteoBiol MP3. The perfect answer to Sinus Lift GBR programmes for bone surgery (Cortical, Spongious plus “Special”) together with their complete sequences the Chiropro L can also be customised to your needs.

General Medical are the UK Distributors of the NEW BioHorizons iSD900 3D System, the world’s first true 3-Dimensional 3-D imaging system, with unprecedented imaging power.

The BioHorizons 2010 Symposium in Turkey features an impressive line-up of international experts in implantology. To make the most of this unique opportunity it will be necessary to register for the symposium by登陆网站

The highly surgical reproduction of missing gingival tissue. GC Gradia Gum is a high strength micro-ceramic composite with its aesthetic and functional characteristics combined.

Optimum infection control.

The intuitive interface can be customised to suit the needs of the operator. The Chiropro L can also be customised to your individual requirements.

In Cone Beam format, the FLXscan offers a choice of two optimum fields of view – 2.5 x 3.7 cm for single-implant complete edentulous, peri-implant and surgical applications, and 8 x 10 cm for guided implant surgery and larger procedures.

The BioHorizons iSD900 Symposium is scheduled for 24th to 25th September, 2010.

You will enjoy:

The intuitive interface of the FLXscan can be tailored to suit your requirements.

As an adjunct to the Galaxy system, GC’s BioHorizons iSD900 FLXscan offers a choice of the highly aesthetic reproduction of missing gingival tissue. GC Gradia Gum is particularly indicated for implant superstructures and for other fissures and grooves.

Freehand imaging is the material of choice for sinus, crowns and bridges.

Please register now to reserve your place at this outstanding educational event. To register please contact your Product Support Specialist or visit our website at www.bionorica.com.

The new iSD900 cordless prosthodontic screwdriver also features NSK’s unique Torque Calibration System (TCS) which ensures that the correct torque is applied at all times. This helps the clinician to screw and unscrew abutments reliably and without the risk of damage.

Torque Calibration System (TCS) which ensures that the correct torque is applied at all times. This helps the clinician to screw and unscrew abutments reliably and without the risk of damage.

Using Piezosurgery 3 by Mectron is the safest way to cut bone and other mineralised tissues without any risk to adjacent soft tissues. It has been in use for many years with proven results. Piezosurgery 3 by Mectron, like the preceding piezosurgery systems, uses a one-touch-power settings for Perio, Endo and Implant inserts, variable from 0 to 200 W.

Great value – Diamond Capsules

Now is the ideal time to try Diamond GIC Capsules. Buy 2 packs of Diamond Capsules and get 3 more packs at half price.

Diamond is manufactured by Kenmdent in the UK. The long-term alliance between Kenmdent, Exeter University and Bristol University Dental School has brought about up-to-date research and development projects into Diamond Glass Ionomer Cements.

Diamond GIC Capsules are used for Class I and 2 restorations together with bulk fillings and laminas, core build up and reintegrate root fillings. The polkae consistanty of Diamond Capsules means that the restoration will set quickly to a rock hard state. No light curing is required as the restoration is covered by a cure and repeat the set into position. The restoration is completely watertight once the chemical/c-map set is complete.

The result is a treatment that irritates neither tooth-nor gingiva – and which deliverstainless tooth surfaces without ablating the enamel.

Philips has also announced that Paediatric Dental Hygienists have been accredited by the British Dental Health Foundation. An independent panel of dental academicians drawn together by the BDHF assessed the benchmark for a new Paediatric Dental Hygiene curriculum by Philips about the Sonicare For Kids and approved them. This allows dental professionals to receive the benefits of a state-of-the-art product which is designed especially for children, safe in the knowledge that they have been independently verified:
• Sonicare For Kids removes significantly more plaque than a manual toothbrush
• Sonicare For Kids is safe and gentle on your child's gums
• Sonicare For Kids helps establish healthy brushing habits early on in Practice-make-perfect.

Good news comes in threes and Philips has also announced that Paediatric Dental Hygienists have been accredited by the British Dental Health Foundation. An independent panel of dental academicians drawn together by the BDHF assessed the benchmark for a new Paediatric Dental Hygiene curriculum by Philips about the Sonicare For Kids and approved them. This allows dental professionals to receive the benefits of a state-of-the-art product which is designed especially for children, safe in the knowledge that they have been independently verified:
• Sonicare For Kids removes significantly more plaque than a manual toothbrush
• Sonicare For Kids is safe and gentle on your child’s gums
• Sonicare For Kids helps establish healthy brushing habits early on in Practice-make-perfect.
