Support Chairs

Ergonomically designed for optimum comfort!

It is universally accepted that maintaining a correct posture whilst at the chairside is essential for operator efficiency, comfort and health. This is particularly important during procedures, where the clinician spends long periods bent over a patient, staying relatively still in order to perform intricate procedures. Poor posture can easily result in back pain, a problem that haunts most Dentists daily result in back pain, a problem that haunts most Dentists.

Support Chairs’ Support Stools have been developed for professionals working in sedentary positions, where both body support and the ability to move freely are essential. The seat and back of the Support Stool is designed to take the weight off the incumbent’s back and provide maximum comfort. The fully adjustable back support and bowl-shaped seat ensuring a proper posture.

The Swing-Mini Armrest has the same features as Swing but is smaller. Designed for use specifically with Support Stool, its lighter size suits their beautiful and stylish design to perfection.

For further information contact your regular Dental Laboratory on 01296 581764, fax 01296 586585, email sales@supportstool.co.uk or visit www.supportstool.co.uk.

SaniSwiss – Cost saving surgical essentials!

Are your surgical consumables costs creeping up? The new range of Swiss quality Drape kits and disposable giving sets from SaniSwiss may be the answer for you. The sterile giving sets are compatible with all major manufacturers including W&H and Nouvag and can save you up to 9% on your current costs. The Sanikit pre-packed drape kits provide a time and cost saving solution for your surgical needs. They contain a comprehensive range of drapes and gowns and feature a detachable traceability label for your records and are currently on offer from £20 per pack.

To place an order or for further information contact SaniSwiss on 01555 656512.

The Astra Tech Implant System™

It’s all in the documentation

You can count on Astra Tech for solid documentation and reliable clinical results. In fact, our entire implant system is exceptionally well documented. At Astra Tech, documentation is an integrated and essential part of the quality assurance process.

A comprehensive study programme that began in 1986 now includes more than 500 published, scientific references supporting our products. Due to the consistency of our implant design, the results from those references are in fact applicable for the implants that we are selling and marketing today.

The system has been documented for a range of clinical indications, surgical applications and prosthetic solutions. High implant success and survival rates:

- Maintained marginal bone level i.e. no or limited marginal bone resorption
- The same optimal clinical outcome with one-stage and two-stage surgical protocols
- Predictable results for early loading and immediate loading protocols

The results from our research and documentation are published in scientific journals and summarised in our Scientific Reviews and Documentation Summaries. For more information please e-mail info.uk@astratechuk.com or call 0845 450 0586.

Digital Dental

Looking at Cone Beam Technology! Digital Dental have the range to suit every requirement and budget.

Digital Dental offers a complete range of cone beam digital imaging systems.

As an adjunct to the Gradia system, GC developed a light cured composite for the highly aesthetic reproduction of gingival tissue. GC Gradia Gum is particularly indicated for implant superstructures and for other fixed or removable prostheses.

GC Gradia Gum allows you to reproduce unlimited natural gingival shades, as the layering technique combined with a variety of modifiers provides endless possibilities.

GC FitChecker II is the perfect material to check the fit of your crowns and bridges, as well as the fit of your orthodontic appliances. The translucent material has excellent flow characteristics enabling minute surface detail to be recorded. You can easily identify even subtle misfitting according to the tone and translucency of the set FitChecker II, which has a film thickness of just 15 microns.

For further information please contact GC UK on 01908 218999 or visit www.geceurope.com.
The rehabilitation of the edentulous maxilla and the mandible always presents a challenge for professionals. The All-on-4 evidence based approach enables implantologists to predict results in even the most difficult of cases.

The procedure is based on placing two straight anterior implants and two angulated posterior implants to avoid the sinus/nerve but at the same time reduce the cantilever. Dental professionals will benefit greatly from the All-on-4 treatment outstanding features including:

- No complicated bone grafting procedures required
- No sinus lifts required
- No nerve repositioning required
- Limited/Shorter cantilevers on posterior implants
- Faster treatment time
- Compatibility with Nobel-Guide ™

Complete rehabilitation of the upper and lower jaw can be costly and time consuming. Practices that offer less expensive, immediate loading techniques will be able to create a better service patients and offer faster, less traumatic procedures and a speedy recovery.

For more information about a world class All-on-4 course date in your area or to find a Nobel Biocare mentor please call: +44 0845 452 912, or visit www.nobelbiocare.co.uk

A plus for any practice

You are your practice’s most important asset and maintaining your health is vital – Sirona’s aim is to design our treatment centers for your ergonomic needs and to promote sustained well-being. Devoting their attention to user-friendliness, flexible configuration, quality, cutting edge technological innovation, modern design and value for money.

Convenience

A relaxed practice team is the ideal basis for an efficient workflow. You can now actively shape your working environment. Thanks to their compact dimensions, our C+ products deliver clear ergonomic benefits, even in compact treatment rooms.

Optimal Workflow

The user-friendly features of the C5+, C4+ and C5+ not only clinically, surgically, labor fatigue symptoms, but also promote an optimum workflow. Each model is based on a proven ergonomic concept.

Enhanced comfort for patients

Make sure that your patients feel as comfortable as possible. Thanks to the ErgoMotion system, the thermo upholstery and the anatomically designed headrests, you’ll be uniquely placed to enhance the well-being of your patients – and to achieve optimum treatment outcomes.

Equipment options

Discover the various equipment options for the C5+, C4+ and C5+ treatment centers.

Support Chairs Highline Bespoke Implantology Storage Solutions

NSK’s powerful VarioSurg is the first choice for ultrasonic surgery as it is packed with features to help control exciting surgical procedures. Strong, precise cutting power is enhanced with TiN (Titanium Nitride) coated bone cutting tips that are available in a wide variety of shapes and sizes, increasing cutting efficiency, and leaving a surface that aids bone formation.

NSK’s VarioSurg employs ultrasonic cavitation of the irrigation solution reducing heat generation, minimising osseonecrosis and avoiding damage to any surrounding soft tissue.

The VarioSurg is fast becoming recognised as an effective tool for implant dentists, among them Dr. Joe Bhat BDS FDS RCS M ClinDent MrD RBDScEd, Specialist in Prosthodonetics and Oral Surgery, Director of Moor Park Specialist Dental Centre and Fellow of the International Team for Implantology. “I have found NSK’s ultrasonic surgical unit VarioSurg is a multifunctional yet very easy to use and it has certainly revolutionised my way of performing surgical implantation”.

NSK’s VarioSurg is versatile enough to be useful in numerous areas of implant surgery including bone surgery and sinus lift and periodontal surgery.

For more information call Jane White at NSK on 0800 6541900.
Introducing Sept Protector for complete surgery disinfection

Escmann, the first name in infection control, is proud to introduce the powerful Sept Protector, the complete surgery disinfection solution. Microorganisms and bacteria, particularly those distributed by dental turbines can contaminate exposed surfaces and remain active for many hours within the surgery.

The Sept Protector is specifically designed to safeguard against cross-infection risks.

- Reliable, automated, hands-free disinfection of all patient areas
- Protects against microbial, viral and sporicidal contagions
- Distincts all exposed surfaces more effectively than manual methods
- Proven broad spectrum Hydrogen Peroxide/Silver Nitrate disinfectant
- Silver Nitrate technology enhances the level and longevity of protection

The Sept Protector utilizes the specially formulated Sept Protocold, which is automatically dispensed at the correct volume for the size of the room. Treatment takes no more than 90 minutes and will not interfere with the usual daily routine. Full protection is achieved after only two treatments, providing protection in areas of normal traffic for several days.

For more information please call Mark Chapman on 07754 044872, or your normal Dealer.

Quiet & Compact

The R&S range of endodontic instruments are market leaders in Europe and with Dental Sky as the exclusive UK distributors they are sure to be a success in this country.

Being high quality, R&S endodontic instruments bring reliability to all of your endodontic work. The useful R&S EndoAccess Nickel-titanium instruments provide easy access by widening the coronal third. With a non-cutting tip to avoid widening the coronal third, the instruments provide easy access by allowing R&S EndoAccess to work. The useful R&S EndoAccess provides easy access by allowing R&S EndoAccess to work.

For more information, visit the website at www.DIOUK.com. Alternatively, email sales@DIOUK.com or call 0845 123 5996 to speak with a qualified representative.

Simplify Your RCT with R&S from Dental Sky

The R&S range of endodontic instruments are market leaders in Europe and with Dental Sky as the exclusive UK distributors they are sure to be a success in this country.

Being high quality, R&S endodontic instruments bring reliability to all of your endodontic work. The useful R&S EndoAccess Nickel-titanium instruments provide easy access by widening the coronal third. With a non-cutting tip to avoid damage to the canal R&S EndoAccess Nickel-titanium instruments help to simplify the introduction of endodontic instruments.

R&S Cat Files have been shown to be stronger and more flexible than regular k files due to the square cross-section of the instrument. These stainless steel files reliably move smoothly through the canal establishing a glide path in the canal for successive shaping.

The 21mm R&S Nerve Broaches are available in a range of sizes from 15-60 in pack of 12 instruments; all colour-coordinated to allow for easy identification.

To see the full range of R&S Endodontic Instruments or further information please contact Dental Sky on 0800 204 4700.

Ledermix: Effective Pain Relief for Endodontic Treatment

Blackwell Supplies is proud to offer Ledermix, the established solution to the pain and inflammation patients experience in cases of pulpsitis. Ledermix combines the antibiotic action of Dendrocycline with the anti-inflammatory action of Triamcinolone and is particularly useful as an emergency measure in endodontic therapy, where it can be used to fill in the root canals between appointments.

Ledermix is available in Combination kits comprising the Dental Paste and Dental Cement, with Hardeners for fast or slow setting. The Dental Paste contains one third more steroid than the Cement, and is preserved in the treatment of exposed pulp. In the case of irreversible pulpsitis, the Paste reliably relieves pain until definitive root canal therapy can be carried out.

In small pulp exposure cases, the Cement is excellent as a pulp-capping agent and if the dentine is hypersensitive, it can be used as a temporary sublining for deep cavities where no exposure has occurred.

For a copy of the Summary of Product Characteristics (SPC) please call John Jesshop of Blackwell Supplies on 01571 128077 or email john.jesshop@blackwellsupplies.co.uk.

How to score in Endodontics.

Old Trafford, Manchester United (5 Nov) & Stamford Bridge, Chelsea (6 Nov) football stadia are the exciting venues that will host this 2 day Endodontics course which is designed for the general practitioner to improve their daily endodontic skills.

The Griptab, which comes in three sizes, is effectively a small handle that is adhered to a restoration. The light-cured, silver-colored Grip is resistant to SiIl and moisture, but at the same time is easily and cleanly detached from the restoration at the end of the procedure.

By having a handle on the restoration, the dentist has a reliable grip using Trivident Pin Tweezers or a small hemostat, for total mastery of the placement process.

Griptab ensures precise control during try-ins, and during hydrofluoric acid etching, silanation and even ultrasonic cleaning. The restoration can be picked up and released multiple times in a passive, controlled way with no risk of dropping it.

For more information, go to www.triodent.com or phone 0800-511-2097.

Nothing Compares To Genus Design and Build

Nothing compares to seeing your dreams realised. Genus takes great pride in helping dentists achieve their ambition of cutting edge design in a stylish and fully compliant environment, with its celebrated Design and Build service.

Areas covered will include diagnosis, case selection, the latest endodontic instrumentation and the cleansing, shaping and packing of the root canal system in three dimensions with warm obturation techniques and bonded obturation. Dr Rich Mounce, DDS, the widely published US endodontist, will conduct the day which includes refreshments, lunch & complimentary tour of stadium & museum. There will be an opportunity to use TF Twisted Files at the end of the presentation; kindly bring your own files.

The Handy Travel Sets are available in translucent yellow, green, red and blue include:

- Mini Tube of Curaprox Gel Chlorhexidine Toothpaste
- Non staining, contains fluoride and is antibacterial for effective, gentle cleaning
- Tartar Stick – Anatomically shaped with a mineral based surface specifically designed for ease of use
- Toothbrush – Modified CS5060 super soft head with detachable handle for folding away

For free samples please email clare@curaprox.co.uk.

Dentomycin for Effective Periodontal Management

With periodontal health a major element in the success of many dental treatments, Blackwell Supplies’ Dentomycin is an essential adjunctive treatment in the fight against periodontal disease.

When you work with Genus, your expectations are exceeded. At the design stage, the Genus experts use the latest software and technology to set out your vision, taking into account all new and existing industry requirements. Then you see your vision take shape during the construction phase, with a dedicated specialist ensuring that everything runs smoothly and that time and budget limits are respected.

Genus understands that this is your dream, and with an accountable point of contact throughout the project, you stay in control. With reliable advice from the Genus team, and access to cost-effective and high quality equipment, furniture, fixtures and fittings, the end result will match your vision and suit your needs down to the ground.

For more information please call Genus on 01582 840484 or email info@genusgroup.co.uk, www.genusinteriors.co.uk.

Lemonchase Denalt

Lemonchase, the renowned loupe and lighting specialist, have launched a dental consumables division. Their new range includes low-cost, high quality USA made Wolf Fibre Optic Handpieces that are compatible with all other brands, including Bien Air, Kavo, W&H, NSK, Midwest & Star. Iniquely designed to be self-maintaining, the handpieces are priced at only £569 + VAT and with the move to dental dishwashers and central sterilisation, they’re proving a very popular and cost-efficient alternative.

Lemonchase are also supplying a full range of KUT prosthetics linked individually packaged Diamond Burs at extremely competitive prices.

The company will continue to supply its world leading loupes & LED Lights from Designs for Vision – as used by over half of all USA Dentists.

Lemonchase can be reached on 01892 752305 and Lemonchase.com (or lemonchase-consumables.com for extra online savings).

A Six Hit

It’s becoming increasingly commonplace for dental practices to contain multiple surgeries. The advantages of this strategy are many; it allows dentists and hygienists to work concurrently, it minimises waiting times and allows more flexible opening times for patients (for example early morning or later evening to fit in with their working days).

This trend has led to a different and more exacting set of requirements for many of the tools and systems within a surgery, and Durr Dental’s VS1200 S suction system is the perfect response.

Durr Dental already provide a range of units (the VS 500 S, VS 600 and VS 900) to suit practices of varying sizes and the VS 1200S is the latest in this range. Like the others, installation and ongoing maintenance are trouble free and low cost. Furthermore, the VS 1200S is made from corrosive free materials and is therefore very extremely durable.

For further information contact your dental supplier or call 01151 526740.

Excellent Oral Health On the Go

Curaprox knows that maintaining an excellent level of oral health is sometimes difficult away from home or when short of time. The Curaprox Travel Care feature is great for regular cleaning, you need for healthy teeth and gums when you’re on the move, be it on holiday, business travel or just for your handbag.

The Handy Travel Sets are available in translucent yellow, green, red and blue include:

- Mini Tube of Curaprox Gel Chlorhexidine Toothpaste
- Non staining, contains fluoride and is antibacterial for effective, gentle cleaning
- Tartar Stick – Anatomically shaped with a mineral based surface specifically designed for ease of use
- Toothbrush – Modified CS5060 super soft head with detachable handle for folding away

For free samples please email clare@curaprox.co.uk.
