“Since joining up with Dental Phobia we have seen an increase in new patient case acceptance”

www.dentalphobia.co.uk offers both patients and practitioners extensive support, advice and up-to-the-minute information on accepting and dealing with dental treatment and its consequences. The site acts as a central hub of information, and is supported by a search engine Google for the key phrase “dental phobia”, and it provides visitors with useful features such as patient articles, tips, an extensive FAQ, an in-depth interview on the latest research, and detailed, and available, and detailed explanations of the most common dental procedures. Not only does it contain vast amounts of information for dentists, as well as a free search feature, but it also is a useful research tool for practitioners who wish to learn more about the best treatment options. Dr. Chris McConnell of St. Peter Dental, Corby is one of the Dental Phobia website’s users. He says: “Since joining up with Dental Phobia we have seen an increase in enquiries for sedation and an increase in new patient case acceptance. It has been incredibly helpful in setting everything up for us with no fuss and has been supportive throughout. For anyone serious about treating anxious or phobic patients, you should talk to these guys. Thanks Dental Phobia!”

No Prep Veneers

If you want to find out more about the new materials and take this 'no intro' / no prep veneers then you need to attend the dental seminar or the UK BACD meeting. ‘Elektro meets Alefthi’ in London, 23-25th September.

For more information please call James Russell alongside Jurgen Wahlmann between 9am and 12pm on the morning of Friday 24th, the following day is casual dress.

- The importance of orthodontics
- Improved communication between dentist and technician
- Improving communication through orthodontic synergy
- Advantages and disadvantages of layered and stackable porcelain

To find more info call Luke Barnett on 01325 251557 or for book to book the AADC on +44 20 222 8853.

The best image quality with Eyemag the Light and V2 Illumination System

Training. It also boasts the Continu range of alcohol-free disinfectants.

Exceptional colour clarity, and does not promote curing of composites.

Nobel Biocare – A high cost effective solution that enables practitioners to fit a full range of implants in a single appointment as an extraction.

The benefits of this to the patient are that it is shorter treatment time and offers greater comfort for the patient.

NobelPrex® – Allows practitioners to deliver high quality aesthetics simply, quickly and importantly, affordability. This is achieved by combining individualised shape with the highest quality biocompatible aesthetics.

A breakthrough in implant design. With an expanded tapered body and built in Platform Shifting. Drilling blades on the apex enable optimum initial implant stability and will also benefit from the back tapers design on the coronal part.

NobelReplace® – The fastest growing product on the market for GDP. Colour co-ordination with the best image quality components, including a step by step drilling protocol for predictable surgical procedures. Its unique root shape ensures reliable initial root stability. For more information contact Nobel on 0208 756 330 or visit www.nobelbiocare.com

Root end therapy is designed to save teeth when a carious cavity in operative dentistry, whether or not the pulp is exposed. The V2 illumination unit uses two lithium batteries allowing up to 7 hours of continuous use.

Carl Zeiss provide optimum image quality at 2.5X magnification. The V2 illumination unit and clients with a wide range of magnification for surgical and minimal power consumption.

Dr. Chris Evans of Whittard Dental Practice uses the Eyemag Smart and finds the illumination system a superlative tool.

“I am impressed with the Eyemag Smart lenses and have found them to be especially beneficial for lesser arth work. As for the illumination system, the light is intense just and the batteries long-lasting. My clients have taken quite an interest in them too!” The V2 illumination unit and clients with a wide range of magnification for surgical and minimal power consumption.
