Having spent the last ten years heavily involved in dental implant education Dr Ken Nicholson has a team of 20 students, the GDC and academic colleagues, and combined his own wealth of practical experience to provide a learning experience. This includes an intensive education and training to introduce dental implant treatment to their dental practice.

The Ultimate Implant Course includes 3 residential days, 10 clinical days, 85 hours of online lectures as well as deleges playing an integral role in placing and restoring implants on live cases.

Don’t forget your Associates’ Agreement

Taking on a new associate can be an exciting experience for everyone involved, but you will need to clarify everyone’s duties and responsibilities on paper. One way of doing this is to draft a watertight associates’ agreement with the help of an experienced solicitor.

Consider how you would like your associate’s performance to be evaluated, and what cases can he or she be allowed to work on. This will include the patient group of which you associate will be allowed to treat. You should also check that your associate's agreement will sit in everyone's interests. This will cover issues such as:

- Financial arrangements
- Bad debts
- Terminations
- Non-competition
- Disputes
- Emergency arrangements

Goodman Legal, Lawyers for Dentists will listen closely to the requirements of each individual practice and will draw up a fair and professional agreement. Goodman Legal's team of solicitors is well placed to advise all parties on the issues such as:

- Employment
- Partnership
- Buy-out agreements
- Share agreements
- Limited company agreements
- Clinical negligence
- Professional indemnity
- Data protection
- Tax

For more information please contact Ray Goodman, Goodman Legal, Lawyers for Dentists on 0171 707 0090, email mgp@raygoodman.co.uk or visit www.goodmanlegal.co.uk

Guiding practitioners towards implant success

The NobelGuide® state-of-the-art computer based implant rehabilitation system assists clients with pre-planned, predictable guided implant surgery to accomplish both provisional and final prosthetic results.

In simple terms, NobelGuide will assist in quick, effective dental treatment, reducing the time the overall patient spends in the chair:  
- Planning
- The surgical procedure
- The temporary prosthesis solution
- The final prosthetic solution

NobelGuide can be used in conjunction with conventional model-based techniques, or CT scanning and 2D-CAD/CAM software. The system allows you to plan the exact position of your implants before commencing surgery and also to plan for prosthetics well in advance. Nobel Biocare will then produce a detailed surgical template, incorporating the exact data from your own scanning and planning.

This innovative tool will enable dentists to offer their patients efficient and precise treatment, while at the same time maintaining their profitability. Patients leave the practice with a natural looking and functional smile.

For more information, contact Nobel Biocare on 0208 750 3320 or visit www.nobelbiocare.com

Endodontic and General Dentistry treatment: Kerr products

As a brand Kerr has been responsible for a number of innovations in the world of dental practice, introducing revolutionary new products and streamlining the process of endodontic and general dentistry.

Kerr provides a range of endodontic and general dentistry products including KerrHawe metal-free, autoclavable handpieces and handpiece accessories, as well as specialist dental anaesthesia.

The Hawe Recall Set is a kit containing everything needed for professional implant care and is compatible with KerrHawe Pico and other brands of implant drills.

For gentle and efficient elimination of soft deposits around and on implant surfaces, it is recommended to use KerrHawe's metal-free and autoclavable mouthwash. For this purpose, a selection of KerrHawe's most popular cups and brushes are available in two shapes: Universal (for more topical applications) and Original (for cleaning with a gentle cleaning and polishing session, using the new Hawe Implant Paste). For general hygienic procedures, KerrHawe's metal-free and autoclavable mouthwash is included in the set (etch-and-screw type, including mandrels to adapt to any system or brand). These plastic instruments do not scratch the implant surface, thereby offering a fast and safe solution.

To see how you can benefit from using Kerr’s products please telephone 01733 892292 or visit www.kerrdental.co.uk.

VERUSCLEAN Magnification Solutions With Therapeutic Benefits

Designed specifically to meet the needs of dental professionals, the OPMI Pico Dental Microscope harnesses the excellence of world-renowned manufacturer Carl Zeiss. Peterjohn’s First Veleto Picosse Laser
Peterjohn in Hampshire is now well and truly “up to speed” with their first Veleto Picosse Laser has been installed at the Judge’s Lodge College Road which will now offer all patients the availability of laser treatments as well as the high degree of operator control previously offered.

The Veleto Onde Laser contains two lasers: a 10 Watt Gallium Aluminium Arsenate (Gallium Arsenide) diode laser and a Veleto Picosse Laser is the ideal laser for soft tissue (gum) work – as it does not interact with teeth or bone. On Thursday 15th August Peterjohn was the first facility in the UK to install the Veleto Onde Laser. This is a super unit, neat and compact and easy to use.

The Veleto Onde Laser is a low energy laser with a user friendly, menu-based, control system that is easy to navigate. The unit can fit neatly onto standard dental cabinets or on a small trolley – the unit is the size of a large laptop.

Patient feedback continues to be very positive with many patients commenting on the exceptional results that are possible to achieve.
