IPS e.max Bleach Shades for all-ceramic perfection

The IPS e.max system from Ivoclar Vivadent enables the Laboratory provision of beautiful all-ceramic restorations in an extensive range of indications, including crowns, bridges and veneers. This unique & simple system allows the restoration to be made using CAD/CAM technology or press technology. When ever option is chosen, they offer enhanced aesthetics and biocompatibility compared with metal-ceramic restorations, and max believes the best restorative solution for strength, aesthetics and minimally invasive preparation.

SBIOLaser

The latest “Practice Building” technology for Cosmetic Dentists

Possessing the latest technology is the ideal way to promote your Practice. That is why Sident Dental Systems, the UK’s leading provider of Sirona equipment, believe there has been such a tremendous response to their Sirona SBIOLaser.

SBIOLaser can be used for soft tissue surgery in a variety of cosmetic dentistry applications as well as for disinfection in endodontics, soft tissue localising bio-availability, soft tissue lengthening, treating periodontal pockets, resolving peri-immediate healing, and treating periodontal disease as well as for disinfection in extensive range of indications. The Sirona SIROLaser offers tremendous response to their Practice. That is why Sident Dental Systems place a greater emphasis on training. With over 40 years of experience, Sirona now has a product that is unrivalled by any other manufacturer. Sirona now has a product that is unrivalled by any other manufacturer.

Dentist Tooht whitening Systems

Dentist stocks a range of reasonably priced tooth whitening products for in surgery or at home use.

Blue lightening 40 is an in surgery premixed gel system with an orange tint to aid placement. The hydrogen peroxide gel is only activated when expressed from the tube. Kit also contains gingival barrier and silky touch lip cream.

Blue lightening Home is an at home kit containing high stability gel, that is only activated by saliva. The peroxide therefore does not break own before use, as it is passive. It does not contain carbomer (as carbomer can cause irritation. pH neutral. Each kit contains neutral, antiallergen, odorless vacuum sheet not a vinyl-acetate based vacuum sheet.

Banan Tooth Whitening Sensitivity

Sensitivity is often an issue associated with Tooth Whitening, which applies to both home and power (surgery) whitening procedures.

GC has introduced Tooth Mousse that is the perfect addition to your usual tooth whitening treatments. Apply immediately after tooth whitening to relieve sensitivity caused by dehydration in the surgery or provide your patients with a tube to take home with their home whitening kit.

GC Tooth Mousse is water based, sugar free topical cream that contains Recalend® CPP-ACP (Calcium Phosphate – Amorphous Calcium Phosphate). This topical paste will provide extra protection for the patients’ teeth. It has been shown that the twice daily use of 1% CPP-ACP solution produced a 10% reduction in enamel demineralisation (Reynolds, 1988).

When CPP-ACP is applied to the tooth surfaces, it binds to biofilms, plaque, bacteria, hydroxyapatite and surrounding soft tissue localising bio-available calcium and phosphates. Saliva also enhances the effectiveness of CPP-ACP and the flavour of the tooth mousse helps to stimulate saliva flow. The longer CPP-ACP is maintained in the mouth, the more effective the result.

There is a wide range of benefits for GC Tooth Mousse. It can be used to protect tissue for teeth and to help neutralise an acidic oral environment. Additional professional applications of the mousse will be immediately followed by sealing, after ultrasonic, hand scaling or root planing, after removal of orthodontic brackets, following professional tooth cleaning, after appointment for the treatment of post-operative pain. Weighting 450gm, it features the very latest diode technology which means that the unit size is kept to a minimum. The control unit has a clear menu of easy to select functions, while its LED display shows all the treatment parameters.

VivaStyle The Complete Serious Whitening System

Utilising carbamide peroxide oxygen releasing agents the VivaStyle range has a gentle, but effective action on tooth structure. It is available in various concentrations of two basic presentations – VivaStyle and VivaStyle Paint On Plus - each designed with a different application in mind.

VivaStyle gel is applied (according to a Dentist’s instructions) by the patient at home, for an hour or longer per day, using an individually customised tray. It is available with either 10% or 16% carbamide peroxide content.

VivaStyle Paint On Plus is recommended for patients if they don’t want or can’t afford fitted trays. Applied by brush, the varnish remains on the teeth for 10 minutes before being removed with a toothbrush. This procedure is normally performed twice daily for 7 days, it can be used to whiten the complete den-
